THE WASHINGTON SCHOOL is located in the suburbs of Washington, at an elevation of 400 feet above the Potomac; it is surrounded by woods and fields, yet it is within half an hour's ride by convenient trolley of the heart of the city. With its Boarding and Day Departments, with its Junior and Senior Schools, with its modern buildings and its extensive athletic grounds, with its able Faculty and its thorough course of study, it offers unusual advantages for the education of a boy from the time he leaves the Kindergarten until he enters College.

In a letter to the Head-Master **President Eliot** of **Harvard** says:

"Your programme of studies is much more comprehensive than is usual, and the provision you make for choice of studies in the interest of each individual pupil is excellent. Your proportion of the number of teachers to the number of pupils is also unusually large."

Ask Mr. Foster for an illustrated Year-Book or address the Head-Master

LOUIS LEVERETT HOOPER
3904 Wisconsin Avenue, Washington, D. C.

GUNSTON

A Boarding and Day School for Young Ladies.

1401 Massachusetts Avenue, 1212-1214 and 1232 14th Street, N. W.,

WASHINGTON, D. C.

The location on Highland Terrace, fronting on Thomas Circle, commands a beautiful view of the city. Reference is given, by permission, to Gen. John M. Wilson, Chief of Engineers, U. S. Army.

MR. & MRS. BEVERLEY R. MASON,
Principals.

MISS EDITH M. CLARK, LL. A,
Associate Principal.

Georgetown University

WASHINGTON, D. C.

Under the Direction of the Fathers of the Society of Jesus

THE COLLEGE.

THE GRADUATE SCHOOL offers to Graduate Students higher elective courses in Philosophy, History of Philosophy, Political Economy, General Literature and Philology, English Literature, French Literature, Constitutional History, Elementary Law, Theory of Music, Biology, Chemistry, Mathematics, Mechanical Drawing and Descriptive Geometry.

THE ASTRONOMICAL OBSERVATORY. The staff of the Observatory is chiefly engaged in original observation and research, but special students will be taken if qualified.

THE COLLEGIATE DEPARTMENT. Four years' course in Classics, Mathematics, English Natural Sciences, Philosophy, etc.

THE PREPARATORY DEPARTMENT. Four years' course, preparatory to college.

The School of Medicine and Dental Department.

Students are required to devote their entire time to the study of medicine. Evening classes have been abolished, as it was found impracticable to properly train men engaged in other pursuits during the day. The fifty-fifth session will begin October 1, 1904, and continue for eight months. A large corps of teachers in proportion to the number of students makes instruction more directly personal and adapted to the special needs of the individual. The clinical facilities of the University Hospital and other city and government hospitals are ample, and the laboratories are all well equipped.

Special attention is invited to the educational advantages of the National Capital, with its unrivalled libraries, the Army Medical Museum, the Museum of Hygiene, and the various scientific laboratories which are open to students.

A circular of information giving full details of requisites for admission, etc., will be sent on application to GEORGE M. KOBER, Dean, 1600 T Street, N. W., Washington, D. C.

The Law Department

has a faculty composed of jurists of national reputation. It utilizes to the full the advantages which make the national capital the greatest center of legal learning in the United States. S. M. YEATMAN.

Further information and catalogues may be obtained by addressing

SENATE EXTENSION.

Powell's Painting in the Capitol.

LANDING OF COLUMBUS ON SAN SALVADOR.

THIS BOOK

Is a complete and practical Handbook of Washington. It gives information that will add to one's convenience and pleasure here, and will enable the visitor to see Washington understandingly and to the very best advantage.

Make use of the full Index on third page beyond.

The Time Table on page 7 gives the hours to visit the public buildings. It will help plan the day's program.

There is a Ready Reference Map on pages 14-15; with a large folded map in the back, which is the most accurate, complete and beautiful map of Washington ever made.

More than 200 illustrations give an admirable series of views of all the objects of interest. Every care has been taken to make the book a delight to the eye; and the prose and the pictures will prove pleasant reminders of one's visit to Washington.

NOTE.—The text and illustrations are copyrighted throughout. All persons are warned against infringement or dealing in any infringements.

Street Plan

From the Capitol as a central point radiate North Capitol street, East Capitol street, South Capitol street, and a line drawn west through the center of the Mall. The city is thus divided into four sections—Northeast, Southeast, Northwest and Southwest. The streets and avenues are designated N.E., S.E., N.W., and S.W., as they lie in the respective divisions. As most of the points of interest to visitors are included in the western divisions, *all streets referred to in these pages are Northwest or Southwest,* unless otherwise designated.

The NUMBERED STREETS run north and south, beginning with 1st street at the foot of Capitol Hill. The lettered streets run east and west, beginning with B street at the Mall.

The AVENUES run northeast to southwest, and northwest to southeast. They are named after States.

HOUSE NUMBERS run (odd numbers on the right) in progression of 100 numbers to a block. Thus 510 Pennsylvania avenue is on the left-hand side, between 5th and 6th streets; and 510 14th street is between E (the fifth letter) and F streets.

PENNSYLVANIA AVENUE is the central avenue for the purposes of the visitor; it connects the railroad depots, Capitol, Treasury, White House and State Department. Other public buildings are but a square or two.

Street Cars

CAR FARE 5c., six tickets for 25c. An extensive system of transfers is in operation. The Pennsylvania avenue lines, the F street and the G street lines are those most used by the visitor to reach the several points of interest. The several routes are indicated by red lines on the large folded map.

Cab Fares

CAB FARES are fixed by law as follows: One horse vehicles, each passenger, fifteen squares or less, 25 cents; each additional five squares or parts of squares, 10 cents. Two horse vehicles, one or two passengers, fifteen squares or less, 50 cents; each additional five squares or parts of squares, 10 cents; each additional passenger, fifteen squares or less, 25 cents; each additional five squares or parts of squares, 10 cents.

Theaters

THEATERS.—The Theaters are: Academy of Music—9th street, corner D. Chase's New Grand Opera House—Pennsylvania avenue, near 15th street. Butler's New Bijou—9th street, corner Louisiana avenue. Columbia—12th and F streets. Kernan's Lyceum—1014 Pennsylvania avenue. Lafayette Square Opera House—East side Lafayette Square. New National—1325 E street.

Legations

EMBASSIES AND LEGATIONS.—Argentine Republic—1425 New York avenue. Austria-Hungary—1304 18th street. Belgium—1109 16th street. Bolivia—The Gordon. Brazil—2014 Columbia road. Chile—1747 Q street. China—1764 Q street. Costa Rica—1529 18th street. Cuba—1006 16th street. Denmark—1521 20th street. France—1640 Rhode Island avenue. Germany—1435 Massachusetts avenue. Great Britain—1300 Connecticut avenue. Guatemala—1753 P street. Haiti—1922 I street. Italy—1400 New Hampshire avenue. Japan—1310 N street. Korea—1500 13th street. Mexico—1413 I street. Netherlands—1612 20th street. Nicaragua—1704 Q street. Peru—1750 Massachusetts avenue. Portugal—1909

N street. Russia—1500 Rhode Island avenue. Salvador—1524 P street. Siam—The Arlington. Spain—1785 Massachusetts avenue. Sweden and Norway—2109 S street. Switzerland—2013 Hillyer place. Turkey—2101 S street. Uruguay—The Albany. Venezuela—1300 17th street.

Churches CHURCHES will be found listed on the large folded map in the back.

Societies SOCIETIES.—*Grand Army of the Republic*—1412 Pennsylvania avenue. *Masonic Temple*—9th and F streets. *Odd Fellows' Hall*—7th street, between D and E. *Scientific Societies* have their headquarters at 1518 H street, the home of the *Cosmos Club.*

Dead Letter Office THE DEAD-LETTER OFFICE MUSEUM is in the building of the Post-Office Department, Pennsylvania avenue and 11th street. Open from 9 to 4. No pass is required. The Museum is on the ground floor. (The exhibits are sometimes removed from Washington for long periods, during which the Museum is closed.)

Patent Office THE DEPARTMENT OF THE INTERIOR is at F to G and 6th to 9th streets. The building is of freestone, granite and marble, and is adorned on the F street front with a fine portico of Doric columns copied in pattern and dimensions after those of the Parthenon. The three other fronts also have porticoes, classic in design. Of the several fields into which the work of the department is divided, that relating to patents is most widely known, and the great building is popularly called the Patent Office. The Museum of Models fills the four halls on the second story, and contains an immense array of models. The number of patented articles approaches 400,000. In addition to those shown here, some 80,000 are displayed in the Union Building near by, on G street. The range of patented articles includes an almost complete list of the necessities and conveniences and luxuries of modern life. Here one may study the inventions in all the stages of their development, from the first crude forms to the perfect methods and appliances of to-day, and in every branch of mechanical, industrial, social and domestic life. The Patent Office is a vast exhibit, multitudinous and multifarious, of the products of American inventive genius and skill. Many of the models, regarded as relics, are now deposited in the National Museum.

Navy Annex THE NAVY ANNEX is in the Mills building, at 17th street and Pennsylvania avenue, one of the modern office buildings of steel cage construction which by their height dwarf the adjacent public buildings. The eagle on the flagstaff is an effigy in copper and aluminum of "Old Abe," a bald-headed eagle which was the mascot of the Eighth Wisconsin Volunteers in the Civil War. The bird on the flagstaff measures 8-ft. from tip to tip of wings; it is 142-ft. above the street, and always faces the wind.

SIGNAL OFFICE.—The Signal Office is on M street at 24th.

Army Medical Museum THE ARMY MEDICAL MUSEUM is in the Mall, at the corner of 7th and B streets; it is reached by Pennsylvania avenue cars, with transfer to 7th street line (one fare), and is open from 9 to 4.

THE DEPARTMENT OF AGRICULTURE BUILDINGS are in the Mall, a short distance west of the Smithsonian. They are open to visitors from 9 to 4;

and in the museum will be found an interesting display of various agricultural products, illustrating their growth and industrial and commercial treatment. **Agricultural Department**

THE NATIONAL BOTANICAL GARDEN, at the foot of Capitol Hill, is open to the public from 8 to 5. Its conservatories contain large collections of rare plants from all parts of the world. The traveler's tree from Madagascar, the Hottentot poison ordeal tree from the Cape of Good Hope, the Jesuit's Bark (cinchona) from South America, and specimens from the Sandwich Islands, Japan, Queensland, Norfolk Island, Sumatra and scores of other distant lands afford abundant interest. North of the conservatory is the Bartholdi Fountain, which was exhibited at the Philadelphia Centennial. It is the work of the French sculptor Auguste Bartholdi, famed for his statue of Liberty in New York harbor. **Botanical Garden**

THE GOVERNMENT PRINTING OFFICE is at North Capitol and H streets. Here all the Government publications are printed, including the bills of Congress, the daily *Congressional Record* of the proceedings of Congress, Department Reports and others. It is reputed to be the largest printing office in the world. Visitors are escorted through the several departments at 10 A. M. and 2 P. M., and at other times when a large number warrants it. The tour takes from one to two hours. **Printing Office**

FISH COMMISSION.—The building of the United States Fish Commission is in the Mall at 6th and B streets, S.W. **Fish Commission**

THE DISTRICT OF COLUMBIA comprises an area of 69,245 square miles and had by the census of 1900 a population of 278,718. The government consists of two civilian Commissioners, appointed by the President and confirmed by the Senate, and one Army engineer officer, detailed by the Secretary of War, the three constituting a Board of Commissioners for three years. The office is in the District Building, La. avenue between 4½ and 6. A new municipal hall is building at 14th and E streets, near Pennsylvania avenue. Residents have no vote. **District of Columbia**

OLD CAPITOL.—After the burning of the Capitol in 1814, citizens of Washington built on North A street a temporary Capitol, which was occupied by Congress until 1819, after which it was known as the Old Capitol. The building has been converted into dwelling houses. **Old Capitol**

UNIVERSITIES AND COLLEGES.—American University—Loughbury Road. The Catholic University of America—at the corner of Lincoln avenue and 4th street extended, near the Soldiers' Home; Eckington cars. Columbia University—15th street and H. Columbia Institution for the Deaf and Dumb and National Deaf Mute College—in Kendall Green, M street and Florida avenue. Howard University—7th street and Boundary. Washington Seminary—523 New Hampshire avenue. **Colleges**

THE YOUNG MEN'S CHRISTIAN ASSOCIATION is on G street between 17th and 18th streets. **Y. M. C. A.**

CEMETERIES.—The Congressional Cemetery, on the Eastern Branch north of the Navy Yard, contains graves of members of Congress, officers of the Army and other public men. In Oak Hill, on Georgetown **Cemeteries**

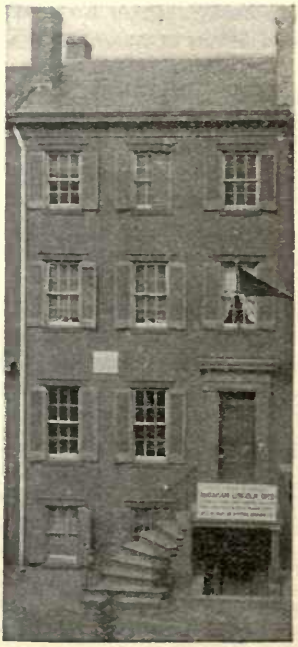
Cemeteries Heights, is the grave of John Howard Payne, author of "Home, Sweet Home." Payne died while United States Consul at Tunis, and was buried on a hill overlooking the ruins of Carthage. In 1882 Wm. W. Corcoran had the remains brought home to America. Edwin M. Stanton, Salmon P. Chase and other notable men are buried here. Rock Creek Cemetery, northeast of the Soldiers' Home, is noted for the two bronze statues, "Memory," by Partridge, and "Peace of God," by St. Gaudens. (See also Arlington and Soldiers' Home chapters.)

Carnegie THE CARNEGIE PUBLIC LIBRARY is in the Vernon Square, at the intersection of Massachusetts and New York avenues and 8th street. The building was given by Andrew Carnegie.

Market MARKET.—The Center Market, Pennsylvania avenue and 7th street, may be counted as among the Washington haunts of great men. Chief Justice Marshall, Daniel Webster and President William Henry Harrison were accustomed to do their marketing here in person.

Ford's Theater FORD'S THEATER, in which occurred the assassination of President Lincoln, April 14, 1865, is on 10th street, between E and F. The building is now used for public business and contains nothing of interest. Across the street, the house in which Lincoln died contains a collection of Lincoln relics.

Oldroyd Lincoln Museum OLDROYD LINCOLN MUSEUM.—The house in which Lincoln died (No. 516 10th street, between E and F) contains the Oldroyd Lincoln memorial collection, begun by O. H. Oldroyd in 1850, and now comprising thousands of objects connected with or relating to the martyred President. Among them are the following: Family Bible in which Lincoln wrote his name in boyhood; log from the old Lincoln home; stand made from logs of house in which Lincoln lived, 1832-36; rail split by Lincoln and John Hanks in 1830 (with affidavit by Hanks); discharge given to one of his men by Captain A. Lincoln, Black Hawk War, 1832; picture of Springfield House; flag carried in Lincoln and Hamlin campaign; office chair in which Lincoln sat when he drafted his first Cabinet; farewell address to neighbors; articles of furniture from the Springfield home; autograph letters; life-mask and cast of hands by L. W. Volk; hat worn on night of April 14, 1865; chair occupied in theater; bill of the play (Our American Cousin); 250 funeral sermons; 63 marches and



dirges; 263 portraits, including the earliest known; 209 medals; 1,000 volumes of biographies of Lincoln and works relating to slavery and the war.

Georgetown

GEORGETOWN.—Georgetown, or West Washington, three miles west from the Capitol, is reached by the Pennsylvania avenue or F street cars; it is on the route to Arlington. The city antedates the founding of Washington. The heights command noble views. The city is the seat of Georgetown College, the oldest and largest Jesuit college in this country. The first building was erected in 1789.

Key House

KEY HOUSE.—The house once occupied by Francis Scott Key, author of the "Star Spangled Banner," is on M street, in Georgetown, near the Aqueduct Bridge.

Suburbs

ANACOSTIA is on the Eastern Branch of the Potomac opposite. BENNING is on the Eastern Branch opposite Washington. BLADENSBURG is 5-miles northeast. BRIGHTWOOD is 3-miles north. CHEVY CHASE—Connecticut avenue extended and District line; reached by Rock Creek car line. FALLS OF THE POTOMAC—The Little Falls are 4-miles above the city; the Great Falls 14-miles. FORT MYER is in Virginia, 3-miles; reached by Wash., Arlington & Falls Church Ry. GLEN ECHO—Conduit Road, 6-miles northwest. MOUNT PLEASANT—Head of 14th street, ½-mile above Florida avenue. TAKOMA—5-miles north. TENNALLYTOWN—3-miles north of Georgetown.

Fort Myer

FORT MYER is near Arlington on the heights of Virginia, opposite Washington. The route is by the W., A. & F. C. Railway from the Aqueduct Bridge. It is the most important United States Army post near Washington. At the United States Signal Station, below the railroad at Fort Myer, is the new building erected for the signal balloon corps.

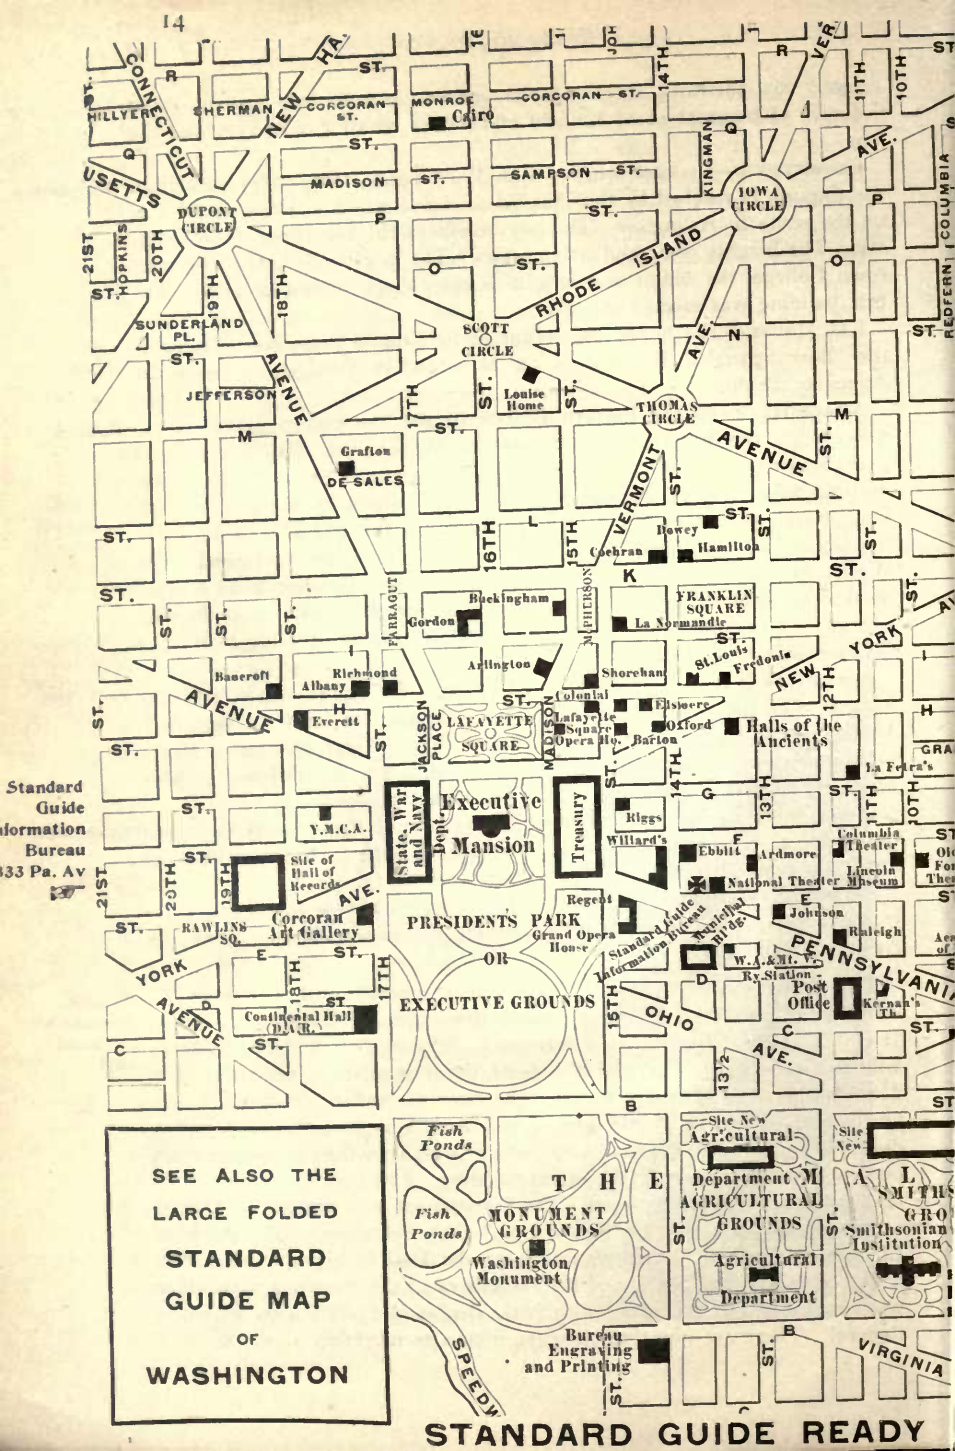
Cabin-John

CABIN-JOHN BRIDGE, 7-miles from Georgetown, forms part of the aqueduct system. The bridge is 420-ft. in length, and the arch, with a span of 220-ft., is reputed to be the largest stone arch in existence.

ARLINGTON MEMORIAL BRIDGE.—A project which is now before Congress is the construction of a Memorial Bridge to connect Washington with Arlington Cemetery.

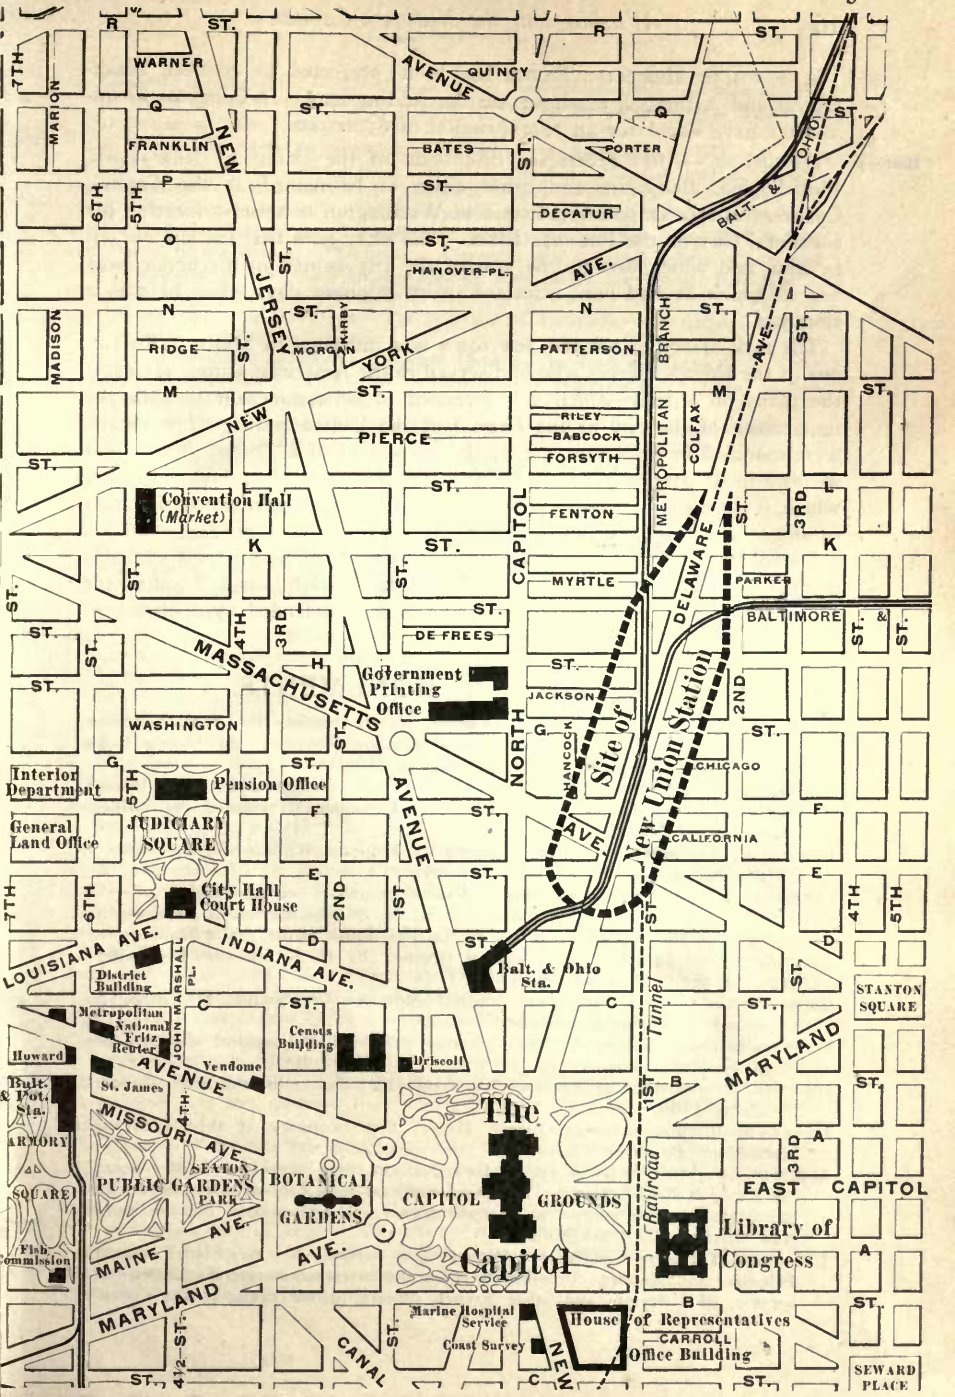
D. A. R. Continental Memorial Hall

THE CONTINENTAL MEMORIAL HALL will be erected by the National Society of the Daughters of the American Revolution, on Seventeenth street. It will have on the north the Corcoran Gallery of Art; and on the south will be the new architectural group of the Columbian University. The Memorial Hall is intended to meet the business and commemorative requirements of the D. A. R., and it will have a large auditorium. The design is by Edward Pearce Casey, who is well known in connection with his work in the Library of Congress building. The cost of the Memorial Hall will approximate $350,000. The cornerstone was laid with elaborate ceremonies in 1904, on "Lexington Day," the celebration of the Battle of Lexington, April 18. An illustration of the Hall is given in an earlier page. The National Society of the Daughters of the American Revolution was organized Oct. 11, 1890, with Mrs. Benjamin Harrison as President General. There are now 650 chapters, with a membership of 40,000.



SEE ALSO THE LARGE FOLDED **STANDARD GUIDE MAP** OF **WASHINGTON**

STANDARD GUIDE READY



ENCE MAP OF WASHINGTON.

A Potomac Memorial Bridge has been projected to connect Washington and Arlington, as shown on the folding map. In Congress its advocates have asked for an appropriation of $5,000,000.

History Historical.—After protracted discussion of the claims of New York, Philadelphia, Baltimore and other cities to be named as the Capital, Congress in 1790 empowered President Washington to select a location for a Federal City on the Potomac River. The story goes that the site chosen by him, and which became the seat of the city named in his honor, was one to which he had been attracted in his younger days when he was a surveyor.

The task of laying out the new town was intrusted to Major L'Enfant, one of the French officers who had served in the American army. He drew the plans on a scale which was intended to be commensurate with the importance of the city as the Capital of the United States. The details were modified in some measure by the successors of L'Enfant, but to him we owe in its general plan the beautiful Washington of to-day. The area which is devoted to streets, avenues and parks exceeds in proportion that of any other city in the world.

During the Civil War Washington was converted into a vast encampment of troops passing to and from the field; and into a hospital for thousands of sick and wounded. The city was defended by a circuit of sixty-eight forts.

STATUES AND MONUMENTS.

Dupont—Dupont Circle.—Rear-Admiral Samuel Francis Dupont. By Launt Thompson.

Farragut—Farragut Square.—Admiral David Glascoe Farragut. By Vinnie Ream Hoxie. Bronze cast from guns of the flagship Hartford.

Franklin—Pennsylvania avenue, 10th and D streets.—Benjamin Franklin—Printer, Patriot, Philosopher, Philanthropist. By Plassman. Presented by Stillson Hutchins.

Frederick the Great.—A statue presented by Emperor William will be placed in the grounds of the War College.

Garfield.—Maryland avenue entrance to Capitol grounds. See page 41.

Grant.—A statue of Gen. U. S. Grant, by H. M. Shrady, for which Congress has appropriated $250,000, will be placed in the Mall south of the White House.

Greene—Stanton Square.—Gen. Nathaniel Greene. By H. K. Brown. The uniform is that of the Continental Army.

Gross—Smithsonian grounds, near Medical Museum—Dr. Samuel D. Gross, distinguished American physician and surgeon.

Hahnemann—Scott Circle.—Christian Samuel Friedrich Hahnemann, German physician, founder of homeopathy.

Hancock—Pennsylvania avenue and 7th street.—Maj.-Gen. Winfield Scott Hancock. By Henry J. Ellicott.

Henry—Smithsonian grounds.—Joseph Henry, first Secretary of the Smithsonian Institution. By W. W. Story.

Jackson—Lafayette Square.—Gen. Andrew Jackson, here presented as the hero of the Battle of New Orleans. The bronze was cast from cannon taken in Jackson's campaigns, and the cannon were contemporary. A replica is in Jackson Square, New Orleans. By Clark Mills.

Lafayette—Lafayette Square and Pennsylvania avenue.—By the French sculptors Falquiere and Mercier. Provided by Congress to commemorate the distinguished services of Lafayette and other French officers in the cause of the Colonies.

Lafayette is represented in the uniform of the Continental Army. America extends to him a sword. The other figures of the group are Rochambeau, Duportail, D'Estaing and De Grasse.

The Marquis de Lafayette offered his services to the Americans in 1777, was commissioned Major-General, and served throughout the war. He took part in the battles of Brandywine, Monmouth and Yorktown; in 1824 he revisited America, and was given a continuous ovation by the twenty-four States. Count Rochambeau was in command of the French army of 6,000 men sent to aid the Americans in 1780, and contributed to the victory of Yorktown. Duportail was a French officer who served under Lafayette in America. Count d'Estaing commanded the French fleet sent to the assistance of America in 1778; and Count de Grasse, of the French fleet, took part in the victory of Yorktown. The portraits of Lafayette, Rochambeau and De Grasse are in Trumbull's Yorktown.

LINCOLN—Fourth and D streets.—Abraham Lincoln. By Scott Flannery.

LINCOLN—Lincoln Park.—Emancipation Monument, representing Lincoln as the emancipator. By Thomas Ball.

LINCOLN.—A Lincoln memorial will be placed on the bank of the Potomac west of the Washington Monument.

LOGAN—Iowa Circle.—Gen. John A. Logan. By Franklin Simmons.

LUTHER—Thomas Circle.—Martin Luther. Replica of statue at Worms, Germany.

MCPHERSON—McPherson Square.—Gen. James B. McPherson. By James T. Robisso. Erected by the Society of the Army of the Tennessee.

MARSHALL—Capitol west terrace.—John Marshall, Chief Justice of the United States from 1801 to 1835. By W. W. Story. The figures in the panels, of Italian marble, are: Minerva Dictating the Constitution to Young America, and Victory Leading Young America to Swear Fidelity at the Altar of the Union. See page 55.

NAVAL MONUMENT, or Monument of Peace, Pennsylvania avenue at the foot of Capitol Hill.—By Franklin Simmons; erected from funds contributed by members of the Navy. "In memory of the Officers, Seamen and Marines of the United States Navy who fell in defense of the Union and Liberty of their Country, 1861-1865." The figures are of America weeping; History with record tablet: "They died that their country might live;" Victory with laurel wreath, and Peace with olive branch. See page 54.

PIKE—Indiana avenue and 3d street.—Albert Pike.

RAWLINS—Pennsylvania avenue, Louisiana avenue and 9th street.—Gen John A. Rawlins. By J. Bailey.

ROCHAMBEAU—Lafayette Square.—Jean Baptiste Donatien de Vimeure, Comte de Rochambeau. By F. Hamar. Presented by France in 1902. See Lafayette.

SCOTT—Scott Square.—Gen. Winfield Scott. By H. K. Brown.

SCOTT—Soldiers' Home grounds.—By Launt Thompson.

SHERMAN—Equestrian statue south of Treasury. Gen. William T. Sherman. By Carl Rohl-Smith.

THOMAS—Thomas Circle.—Gen. George H. Thomas. By J. Q. A. Ward. Erected by the Society of the Army of the Cumberland.

WASHINGTON—Washington Circle.—George Washington. By Clark Mills. Washington is represented as he appeared at the Battle of Princeton, Jan. 3, 1777, when he checked the retreat of Mercer's wavering militia and turned defeat into victory. The portrait is from the Houdon bust made from life. The horse was modeled from one captured from a wild herd on the prairie near Fort Leavenworth, Kan.

WASHINGTON—Esplanade east of Capitol.—By Horatio Greenough. The inscriptions are chosen from Henry Lee's oration on the death of Washington, pronounced before both Houses of Congress, Dec. 16, 1799: "First in War—First in Peace—First in the Hearts of His Countrymen." The sculptor's signature runs: "*Simulacrum istud ad magnum Libertatis nec sine ipsa duratum* HORATIUS GREENOUGH *faciebat*"—"Horatio Greenough made this statue for a great examplar of Freedom; not without Freedom can it endure." See page 55.

WEBSTER—Scott Circle.—Daniel Webster.

THE NAVY YARD.

On the Eastern Branch of the Potomac, at the foot of 8th street east, and at the terminus of the Navy Yard (green car) line of the Pennsylvania avenue cars. Open to the public from 9 o'clock to 4 o'clock. No pass required. Local guides will facilitate inspection of the yard if one's time be limited.

IT is not a shipbuilding establishment, but an ordnance factory we find when we pass through the arched entrance of the Washington Navy Yard, and we are likely to be disappointed if we expect to find one of the armored ships of the White Squadron at anchor in the Eastern Branch. But there are guns to study, ancient relics of the past, trophies eloquent of the gallant exploits of the old Navy, and new guns here making for the equipment of the new Navy of to-day. The trophies meet us at the entrance. Just within the gate on Dahlgren avenue (the avenues are named after Commandants of the yard) we find two bronze cannons, which Capt. Stephen Decatur took from the Tripolitans, Aug. 3, 1804. Further down the avenue is the famous Long Tom.

Trophies

Long Tom

The Long Tom is a 42-pound cast-iron gun made in 1786. It belonged originally to the man-of-war Noche, one of the French fleet sent in 1798 to invade Ireland, and captured by the British under Sir John B. Warren. The gun was taken to England and sold to the Americans. It was afterward struck by a shot, and so injured as to be condemned, and was sold to Hayti, to be used against France, the nation in whose service it had first burned powder. Brought back to America again, the Long Tom formed one of the battery of the armed brig General Armstrong (fitted out by private hands and commanded by Capt. Samuel Chester Reid, On Sept. 24, 1814, off Bayal, one of the Azores, the Armstrong engaged single-handed in a fight with three ships of the British Squadron, which was then on its way to New Orleans, and so disabled the fleet that it was delayed, and failed to reach New Orleans for the great fight there, when Jackson won the day. The Armstrong was afterward sunk to save her from the enemy, but the Long Tom was removed and was presented by the Portuguese Government to the United States. It was sent to this country for the World's Fair.

At the end of the avenue, in front of the Commandant's office, and in the gun park south of it, there are other relics and trophies—guns captured by Decatur from Algiers and Tripoli, and taken in the wars of the Revolution, 1812, Mexican and Civil.

The Museum is shaded by a willow tree which was grown from a slip from one of the trees over the grave of Napoleon at St. Helena; it was brought home by Commodore Bainbridge and planted here. The Museum contains a collection of relics and of specimens illustrating different classes of ordnance, projectiles and naval equipments.

In the gun shop (reached by the small stairway on the right of Dahlgren avenue) may be seen one of the most impressive exhibitions on this continent of machinery in operation. Here are the great lathes, turning, boring and rifling the steel breech-loading rifles of the Navy. These are

formidable pieces of artillery, ranging from the 4-in. caliber to that of 13-in. caliber, which is 39-ft. 11-in. in length, weighs 65 tons, and carries a projectile of 1,100-lbs., with a range of thirteen miles. The calibers are 4, 5, 6, 8, 10, 12 and 13 inches; and their ranges correspond—4, 5, 6, 8, 10, 12 and 13 miles.

The Gun Shop and Its Work

The guns are forged at Bethlehem, Pa., and are brought here in a rough state to be finished. Each gun consists of a central steel tube, and its jacket and hoops also of steel. The jacket and hoops are shrunk upon the tube, i. e., are fitted on to it when expanded by heat, and are then shrunk by cooling, just as the tire is shrunk upon the wagon-wheel. All the successive processes may be witnessed—the boring of the jacket cylinder, trimming down the tube to fit the jacket, and fitting the heated jacket upon the tube; boring the hoops, trimming the jacket to fit the hoops, and fitting the heated hoops upon the jacket. As the jacket cools it shrinks upon the tube as compactly as if the jacket and tube were one solid piece, and the hoops in turn become as a part of the jacket. The gun, thus built up of separate layers of steel, is a product which in practice proves to possess greater strength than a gun forged of one mass of metal. The work involves an extreme nicety of calculation on the part of the engineers who plan the measurements.

From this stage of manufacture, the gun—weighing sixty odd tons—is carried by the powerful traveling crane to the barrel-boring lathes, where the barrel and chamber are bored out; and then to the rifling lathe, which cuts the grooves of the rifling, inch by inch, foot by foot, through the length of the barrel. The operations here are on a gigantic scale, the machinery is ponderous, the product titanic. The immense lathes do their work almost noiselessly, with ease, smoothness, precision and deliberation, which bespeak a reserve of strength and power irresistible.

Other shops which possess interest are those of the gun-carriage department. and the breech mechanism and projectile departments.

Marine Barracks

THE MARINE BARRACKS are on 8th street, near the Navy Yard; reached by Pennsylvania avenue cars. Concerts by the Marine Band in summer at 11 A. M.; guard-mount daily at 9 A. M.

Arsenal

THE ARSENAL (or Washington Barracks) is at the foot of 4½ street, S.W., on the Potomac; reached by the 7th street cars. Only the grounds are open to the public, and there is no special interest for the visitor.

Washington Barracks

THE WASHINGTON BARRACKS, at the foot of 4½ street and the Potomac, will, upon completion of plans now under way, become the most important military post in the country. The Engineers' School of Application, now at Willet's Point, N. Y., will be transferred here. This school is for the final military instruction of the honor graduates of West Point. Here, too, will be the new War College and the School of National Defense, the classes in which will be composed of honor graduates of the infantry, cavalry and artillery schools at Fort Leavenworth and Fort Monroe. The corner stone of the War College was laid in February, 1903.

Naval Observatory

THE UNITED STATES NAVAL OBSERVATORY, in charge of the Bureau of Navigation, is on the heights north of the Georgetown and Rockville road. It has a 26-in. equatorial telescope, is admirably equipped for astronomical work, and holds a high place among the institutions of its class. From the Observatory Washington time is telegraphed daily to all parts of the United States. Open to visitors from 9 to 3.

SOME HISTORIC HOMES ON LAFAYETTE SQUARE.

Many of the houses surrounding the square possess interesting associations as the homes of public men. The plot of ground now occupied by the Lafayette Square Opera House, on Madison place, was in the '30s owned by Henry Clay; he traded it for an imported and long-pedigreed jackass to Commodore Rodgers, who built the home, which stood until torn down in 1895 to make way for the opera house. After Commodore Rodgers, Secretary of the Treasury Roger B. Taney lived here; and then followed Secretary of the Navy James K. Paulding; Secretary of State William H. Seward, who in one of the upper rooms was struck by the would-be assassin in that fateful night of April 14. 1865; and James G. Blaine, who in the same room died in 1893.

Further north, on the corner of Madison place and H street, the home of the scientific Cosmos Club was formerly known as Dolly Madison's house. Here Mrs. Madison lived from 1837 to her death; then Admiral Wilkes occupied the house until the Civil War, and it then became the headquarters of Gen. McClellan. Diagonally across the street is the red brick house (now an annex of the Arlington Hotel) which was for more than twenty years the home of Charles Sumner. Further west, on the corner of Connecticut avenue and H street, is Corcoran House, the home of the late W. W. Corcoran, and before him of Daniel Webster while Secretary of State. It is recorded that the Ashburton Treaty was discussed and practically concluded in this house.

The house on the southwest corner of H street and Jackson place was built in 1819 by Commodore Decatur (the author of the toast, "My country: may she be always in the right; but right or wrong—my country"), and it was occupied by Henry Clay, Martin Van Buren and Edward Livingston, during their respective terms as Secretary of State, and by Ministers of Russia, England and France.

City of Magnificent Distances.—This phrase as descriptive of Washington was original with Abbé Carrea, Minister from Portugal in 1816

THE BEAUTIFICATION OF WASHINGTON.

The Beautification of Washington is a subject which has engaged the attention of Congress. Plans have been submitted by a Park Commission appointed by the Senate, and consisting of Messrs. Burnham, McKim, St. Gaudens and Olmstead. The report recommends the establishment of a parkway comprising the Mall, extending from the Capitol to the Monument, one and one-half miles, and with a width of 800 feet. From this territory would be removed the buildings now upon it, to the end that there might be an uninterrupted vista, whether of the park in a natural state, or given a formal arrangement as the Commission recommends.

THE UNION RAILWAY STATION.

The Union Railway Station, which will supersede the present railway station, is under construction at a point northeast of the Capitol, as shown on our map, pages 14-15. It is building by the Pennsylvania and Baltimore & Ohio railroads, the United States and the District of Columbia.

THE CAPITOL.

THE CAPITOL is situated on Capitol Hill, 1 1-3 miles from the White House and Treasury, ½-mile from the Baltimore & Potomac Station, and one square from the Baltimore & Ohio Station.

It is reached by the F street and the Pennsylvania avenue cars, both of which ascend the hill. One may leave the Pennsylvania avenue cars at the Peace Monument, near the west entrance, and thus gain the grandest approach; or may continue (on the Navy Yard car) to the top of the hill.

The building is open daily, except Sundays and holidays, from 9 to 4:30, or until one-half hour after adjournment. During a term of Congress the forenoon is the best time for inspecting the legislative halls and the various committee rooms. Congress goes into session at 12 o'clock noon; visitors are allowed upon the floor of Senate and House until 11:45, thereafter in the galleries only. The several galleries are designated over the doors: Gentlemen's, Ladies', Reserved, Diplomatic Corps, Press. Those marked Ladies' and Gentlemen's are open to the public.

*** THE CAPITOL GUIDES.—There is a staff of regularly authorized Capitol guides, who conduct visitors through the building, and point out and explain all objects of interest; and it will be found advantageous to employ their services.

THE CAPITOL is distinguished for its commanding situation and majestic proportions, for the dignity, grace and beauty of design, and the adornments and decorations which beautify it without and within. All these unite to give it rank as an architectural object among the noblest in the world. From an elevated site on Capitol Hill, 97-ft. above the level of the river, it overlooks the amphitheatre of the Potomac and is a conspicuous feature of the landscape from miles on every side. It is set amid grounds whose extent and arrangement add much to the architectural effect.

The building faces the east, for in that quarter the projectors assumed that the city would grow; but the development of Washington has been toward the west, and it is from this direction that the Capitol is usually approached. From the main western entrance of the grounds, near the Peace Monument, the approach leads up the gently rising lawns to flights of steps, which give ascent to the upper terrace or open court, which extends the entire length of the west front and around the north and south ends. Here a beautiful view is afforded of the city and encircling hills. From the court the west door of the building gives access to flights of stairs which lead to the Rotunda.

On the east front are three grand porticoes with Corinthian columns, and there is a portico of similar columns on the end and west front of each extension, and a loggia on the west front of the main building. Broad flights of marble steps lead up to the porticoes from the esplanade on the east.

The central building is constructed of Virginia sandstone, painted white; the extensions are of Massachusetts marble. The 24 columns of the grand central portico are monoliths of Virginia sandstone, 30ft. high; the 100 columns of the extension porticos are monoliths of Maryland marble. The entire length of the Capitol is 751ft. 4in.; width, 350ft.; area, over 3½ acres.

The corner stone of the main building was laid by President Washington on Sept. 18, 1793. The wings of the central building were completed in 1811, and were partially

PLAN OF THE PRINCIPAL STORY OF THE CAPITOL

THE CAPITOL consists of a main or central building (from which springs the dome) and two extensions, north and south, connected with the central building by corridors. It has three stories—basement, principal story and attic – and the roof is surmounted on all sides by an ornamental balustrade. In the central building are the Rotunda, the Supreme Court Room, Committee Rooms, and the National Statuary Hall. The north extension contains the Senate Chamber, and is known as the Senate Extension. The south extension contains the Hall of Representatives, and is designated as the House Extension.

TRUMBULL SERIES—I. THE DECLARATION OF INDEPENDENCE.

Capitol History

burned by the British in 1814. The entire central building was finished in 1827. The corner stone of the extension was laid by President Fillmore, on July 4, 1851; Daniel Webster was the orator. The extensions were first occupied by Congress 1857 and 1859. Up to that time the Senate Chamber was the present Supreme Court Room; and the Hall of Representatives was the present National Statuary Hall.

Dome

The crowning glory of the Capitol is the imposing Dome, springing from a peristyle of fluted Corinthian columns above the central building and terminating in a lantern, which is surmounted by the Statue of Freedom, towering 307½-ft. above the esplanade.

The height of the Dome above the base line of the east front is 287-ft. 5-in.; from the roof balustrade, 217-ft. 11-in.; diameter at the base, 135-ft. 5-in. It is of iron, and weigs 8,909,200-lbs. It is so constructed that with the variations of temperature the iron plates expand and contract, "like the folding and unfolding of a lily." The peristyle has 36 columns and 36 windows, with a balustrade above. The lantern is 15-ft. in diameter and 50-ft. in height; it has electric lights, which illuminate the Dome during a night session. The Dome was designed by Walter, and was completed in 1865. The Dome is ascended for the view by a winding stairway.

Statue of Liberty

The bronze statue of Armed Liberty, designed by Crawford, is 19-ft. 6-in. high, and weighs 14,985-lbs. It was set in place on Dec. 2, 1863. A full-sized model of the figure is in the National Museum, where the majestic expression of the countenance may be noted, and the details studied of the crest of the eagle's beak and plumes, sheathed sword, shield, and supporting globe with its legend, *E Pluribus Unum.*

Rotunda Portico

The east portico of the House is plain; on those of the Rotunda and the Senate has been expended the chief exterior adornment of the Capitol. On the tympanum of the Rotunda portico is an allegorical group (by Persico, after design of John Quincy Adams) of the Genius of America. In the centre stands America, with the eagle at her feet. Her shield, with its legend, U. S. A., rests upon an altar inscribed with the significant date, July 4, 1776. She is listening to the inspiration of Hope, and indicating her reliance upon Justice, whose scroll of the Constitution bears the date of the adoption of that instrument, September 17, 1787.

The Marble Groups

Of the two colossal groups in marble on the portico, one is Persico's Discovery of America; it represents Columbus and an Indian girl; the armor was copied from a suit worn by Columbus, now preserved in Genoa. The other group is Greenough's Settlement of America—a pioneer in desperate conflict with a savage. On either side of the doorway are marble figures (by Persico) of War—Mars in Roman mail, with shield and spear; and Peace—Ceres, with olive branch and fruits. Over the door is a composition of Peace and Fame placing a wreath of laurel upon the brow of Washington. At the Rotunda entrance is the Rogers Bronze Door.

Senate Portico

The fortunes of the American Indians furnish a theme which we shall find constantly recurring throughout the decorations of the Capitol. The marbles and bronzes of the Rotunda portico are suggestive of the first contact of the white race and the red; the marble group in the tympanum of the Senate portico is significant of what the coming of the new race was to mean for the old. The subject (by Crawford) is American Development and the Decadence of the Indian Race. In the centre stands America, in the effulgence of the rising sun, bestowing honor instead of gifts upon General Washington; on the right are Commerce, Education, Mechanics and Agriculture; on the left the Pioneer, the Hunter, a dejected

TRUMBULL SERIES—II. SURRENDER OF BURGOYNE.

Chieftain, and an Indian mother with her babe mourning beside a grave. In the wall above the Senate entrance are marble figures of Justice and History (by Crawford), and the door is the Crawford Bronze Door.

Rotunda

THE ROTUNDA in the centre of the main building is the room to which one usually comes first, and it is a convenient point from which to visit the various parts of the Capitol. The north door leads to the Supreme Court Room, the Senate, and the stairway to the Dome; the south door to the Statuary Hall and the House; the east door (Rogers Bronze) opens on the portico, and the west door leads to the west entrance.

Tour of the Capitol

A convenient programme for seeing the Capitol is to study first the Rotunda (from the floor), then to visit in succession the Hall of Statuary, the House and its committee rooms, the Supreme Court, the Senate and its rooms, the west portico for the view; then to ascend to the upper part of the Rotunda and beyond to the Dome and its view. Study the Capitol plan on a foregoing page.

Note the magnificent marble corridors and stairways of the extensions; the pilasters, columns and capitals, sculpture and frescoing; the tessellated floors, and the vistas through the windows, giving glimpses of the city and the Washington Monument, the new Library, and the Capitol itself.

Rotunda Paintings

The Rotunda is an immense circular hall 97 2-3-ft. in diameter, and rising clear from floor to inner shell of Dome and canopy, 180-ft. above. Light is admitted through the 36 windows of the peristyle. The walls are adorned with paintings, sculptures and frescoes, and the vaulted canopy top above the eye of the Dome glows with color. The eight oil paintings in the panels of the hall have for their subjects memorable scenes in the history of the continent and of the United States. The key to each picture hangs beneath it. They are:—

Landing of Columbus on San Salvador, Oct. 12, 1492. (By Vanderlyn.)
Discovery of the Mississippi by De Soto, 1541. (By W. H. Powell.)
Baptism of Pocahontas, Jamestown, Va., 1613. (By John G. Chapman.)
Embarkation of the Pilgrims from Delft-Haven, July 21, 1620. (Weir.)

Declaration

The Declaration of Independence, Philadelphia, July 4, 1776. (By John Trumbull, of Connecticut.) The scene is the hall of the Continental Congress. John Hancock, President of the Congress, is seated at the table, and in front of him stand the Committee of Five—Thomas Jefferson, John Adams, Benjamin Franklin, Roger Sherman and Robert L. Livingston.

Saratoga

The Surrender of Burgoyne, Saratoga, Oct. 17, 1777. (By Trumbull.) "The painting represents Gen. Burgoyne, attended by Gen. Phillips and followed by other officers, arriving near the marquee of Gen. Gates. Gen. Gates has advanced a few steps from the entrance to meet the prisoner, who is in the act of offering his sword, which Gen. Gates declines to receive; and invites them to enter and partake of refreshments. A number of the officers of the American army are assembled near their General."—*Elliot.*

Yorktown

Surrender of Cornwallis, Yorktown, Oct. 19, 1781. (Trumbull.) "The painting represents the moment when the officers of the British army, conducted by Gen. Lincoln, are passing the two groups of American and French guards, and entering between the two lines of victors."—*Elliot.*

TRUMBULL SERIES—III. SURRENDER OF CORNWALLIS.

Washington's Resignation

The Resignation of General Washington, Annapolis, Dec. 23, 1783. (Trumbull.) "After taking an affectionate leave of his old comrades at New York, General Washington, accompanied by only two of them, proceeded to Annapolis, where Congress was then sitting, and there resigned his commission into the hands of twenty-three powerless men, divested himself of all authority, and retired to private life."—*Elliot.* Washington's surrendered commission is preserved in the State Department, and the uniform of Commander-in-Chief worn on this occasion is shown among the Washington relics in the National Museum.

Trumbull Series

The Trumbull paintings have peculiar interest and value because the figures in them are authentic portraits. Col. John Trumbull, an aide-de-camp of Washington, "having a natural taste for drawing, took the resolution of cultivating that talent, with the hope of thus binding his name to the great events of the Revolution by becoming the graphic historiographer of them and of his comrades." With this view he devoted himself to the study of the art of painting, first in this country and then in Europe. To John Adams, then Minister to England, and Thomas Jefferson, Minister to France, he communicated his ambitious design of painting a series commemorative of the principal events of the Revolution, preserving faithful portraits of its conspicuous actors, and accurate details of scenes, dress and arms. He painted Adams in London, and Jefferson in Paris, and at the house of Jefferson the French officers who were to be included in the Yorktown picture. He was given sittings by Washington and others in New York, at that time the seat of government, and then traveled through the country, from New Hampshire to South Carolina, collecting portraits and other materials. In 1816, after more than thirty years of preparation, he was commissioned by Congress to paint the four great pictures now in the Rotunda—works which at once are held priceless for their portraits of the Fathers of the Republic, and are a realization of the artist's high ambition.

Sculptures

In the arabesques above the paintings are sculptured portraits of Columbus, Raleigh, Cabot and La Salle (by Capellano and Causici); and above the doors are sculptures of the Landing of the Pilgrims, Pocahontas Rescuing Capt. John Smith, William Penn's Conference with the Indians, and Daniel Boone in Conflict with the Indians. (These are by Causici, Capellano and Gevelot.)

Rotunda Frieze

At a height of 65-ft. above the floor, and encircling the wall, here 300-ft. in circumference, runs a fresco (by Brumidi and Castigini) in imitation of high relief, illustrating periods of the history of the continent. America is depicted with Indian and eagle, standing with History, who records on her tablet the progress of events. The subjects are: Landing of Columbus, Cortez and Montezuma in the Temple of the Sun, Pizarro in Peru, Burial of De Soto, Rescue of Capt. John Smith, Landing at Plymouth Rock, Penn's Treaty with the Indians, Settlement of New England, Oglethorpe and the Muscogees, Battle of Lexington, Declaration of Independence, Surrender of Lord Cornwallis, Death of Tecumseh, the American Army Entering the City of Mexico, California Gold Mining. The series is to be completed.

Canopy

The canopy overhanging the eye of the Dome, at a height of 180-ft. above the Rotunda floor, is 65-ft. in diameter, and gives a field of 4,640 square feet for Brumidi's colossal allegorical fresco. This may be studied to better advantage from the gallery which is immediately below it, reached by the Dome stairway. See page 35.

The gallery, which encircles the hall just beneath the canopy above, is

TRUMBULL SERIES—IV. THE RESIGNATION OF GENERAL WASHINGTON.

THE ROTUNDA CANOPY—APOTHEOSIS OF WASHINGTON.

COMMERCE.

FREEDOM.

AGRICULTURE.

MECHANICS.

MARINE.

ARTS—SCIENCE.

THE ROTUNDA CANOPY.

The allegory is of the Apotheosis of Washington. In the center is Washington, seated in majesty, like Jove on Olympus, with supernal beings attending him. On his right sits Freedom; on his left Victory; and about him float the Thirteen States as aerial figures, their banner inscribed: *E Pluribus Unum.* Beneath, and encircling the base of the canopy, runs an allegory of the Revolution. The group in line directly below Washington represents the Fall of Tyranny—Freedom with her eagle putting to rout the forces of War, Tyranny, Priestcraft, Discord, Anger and Revenge. Following to the right are depicted in succession; Agriculture (America, Ceres, Flora and Pomona); Mechanics (Vulcan); Commerce (Mercury, with portrait of Alexander Hamilton, and of Robert Morris, signer of the Declaration, financier of the Revolution, in the last days of his life imprisoned for debt, and here given enduring fame); Marine (Neptune, and Aphrodite with the Atlantic cable); Arts and Sciences (Minerva, with portraits of Franklin, Fulton and Morse).

Whispering Gallery

a whispering gallery, wherein two persons standing on opposite sides 65-ft. apart, may distinctly hear one another speaking in whispers.

The statues are of Lincoln, Jefferson, Baker, Grant and Hamilton.

Statues

Edward Dickinson Baker, of Oregon, 1811-1816; Fought in Mexican War; Senator from Oregon; commanded a brigade at Ball's Bluff, Oct. 21, 1861, and was mortally wounded. (By Horatio Stone.)

Ulysses Simpson Grant, 1822-1885. Lieutenant-General in the Civil War and commander of the Union armies; President 1869-77. (By Franklin Simmons.)

Alexander Hamilton, of New York, 1757-1804. Officer in Revolution; exerted important influence through the *Federalist* in securing adoption of the Constitution; President Washington's Secretary of the Treasury; author of our financial system. A panel in the Senate Bronze Door commemorates Hamilton's gallantry at Yorktown, when he led an advanced corps to the storming of a British redoubt. (By Stone.)

Thomas Jefferson, of Virginia, 1743-1826. Author of the Declaration of Independence and one of its signers; as Member of Congress, originated our system of coinage; as Minister to France negotiated important commercial treaties; Secretary of State, Washington's first term; Vice-President with John Adams; President 1801-9; founder of the first Republican Party, from which the Democratic Party of to-day claims descent. (By P. D. David d'Angers; presented by Lieut. N. P. Levy, U. S. Navy.)

Abraham Lincoln, of Illinois, 1809-65. President 1861-65. (By Vinnie Ream.)

Rogers Door

At the east door of the Rotunda is the Rogers Bronze Door, designed and modeled by the American artist, Randolph Rogers, at Rome in 1858, and cast by Von Miller at Munich. The panels are filled with high reliefs illustrating scenes in the career of Columbus. The subjects are:

Columbus before the Council of Salamanca; His Departure from the Convent of La Rabida; the Audience before Ferdinand and Isabella; the Sailing from Palos on the First Voyage; the Landing at San Salvador; the First Encounter with the Indians; the Triumphal Entry into Barcelona; Columbus in Chains; His Death.

On the transom arch is a portrait of the Discoverer; and on the panel borders, in papal robe and royal crown and suit of mail, are the personages who played their parts in the memorable world drama of the fifteenth century—the sovereigns Alexander VI. of Rome, Ferdinand and Isabella of Spain, Charles VIII. of France, John II. of Portugal, and Henry VII. of England; the friends and patrons of Columbus—Cardinal Mendoza, Lady Beatriz de Bobadilla, and Juan Parez de Marchena, prior of La Rabida; the companions of the Discoverer and conquerors of the New World—Pinzon, captain of the "Pinta"; Bartholomew Columbus, Ojeda, Vespucci, Cortez, Balboa, and Pizarro. The frames of the panels show portraits of Irving, Prescott and other historians of Columbus. The decorative scheme of the border is of anchors, rudders, casques and armor, symbolical of exploration and conquest; while four race types stand for the continents, Asia, Africa, Europe and America.

Inauguration

The Rotunda portico is the scene of the inaugurations. The retiring President and the incoming President ride together from White House to Capitol. The oath of office having been taken by the Vice-President in the Senate Chamber, all repair to the Rotunda portico, and its grand-stand erected for the occasion. It is a brilliant and impressive assemblage—the Chief-Justice and the Associates in their robes of office, the members of the Diplomatic Corps in resplendent uniforms; the members of the House and Senate, officers of the Army and Navy, and other dignitaries of the land; while on the esplanade in front are gathered tens of thousands of spectators. The President having read his inaugural address, the Chief-Justice administers the oath of office:—"I do solemnly swear that I will

THE ROGERS BRONZE DOOR OF THE ROTUNDA.

Inauguration faithfully execute the office of President of the United States, and will to the best of my ability preserve, protect and defend the Constitution of the United States."

The programme concludes with a review by the new President of the vast procession—of troops, marines, militia, political clubs and others—which marches from the Capitol down Pennsylvania avenue and past the reviewing stand in front of the White House.

Greenough's Washington On the great esplanade of the east front is Greenough's colossal marble statue of Washington. The figure is seated in a Roman chair, the left hand clasping a sword, the other raised in invocation of heaven. Accessories are Columbus with globe and an Indian; Phœbus-Apollo Driving the Chariot of the Sun—America rising among the Nations; and Hercules Strangling the Serpent—America's victory over tyranny. (See "Statues.")

View from Dome The top of the Dome is reached by a winding stairway which opens from the corridor on the left as one passes out through the north door of the Rotunda. The stairway affords an overlook of the Rotunda itself from the whispering gallery beneath the canopy, and a magnificent view from the balustrade beneath the lantern. The view from this point is such as amply to repay for the toilsome ascent; but the one from the first balustrade, lower down, gives practically the same outlook.

Statuary Hall THE NATIONAL STATUARY HALL, semi-circular in shape and designed by Latrobe, after a Greek theatre, is one of the most beautiful rooms of the Capitol. On the north side it has a colonnade of Potomac marble with white capitals, and a screen of similar columns on the south side supports a noble arch. The domed ceiling, decorated after that of the Roman Pantheon, springs 57-ft. to a cupola, by which the room is lighted. Above the door leading from the Rotunda is Franzoni's historical clock. The design is of History, with recording tablet, borne in the winged car of Time, its wheel supported on a globe circled by the Zodiac. In the arch above the south door is Causici's figure of Liberty Proclaiming Peace, and beneath is an eagle (by Valperti) poised as about to fly. Ranged around the hall are statues and portrait busts, contributed by various States.

This room was the Hall of Representatives, and was the forum of the debates by Webster and Clay, Adams, Calhoun and others whose names are indelibly associated with the history of Congress. A plate set in the marble floor southwest of the centre marks the spot where John Quincy

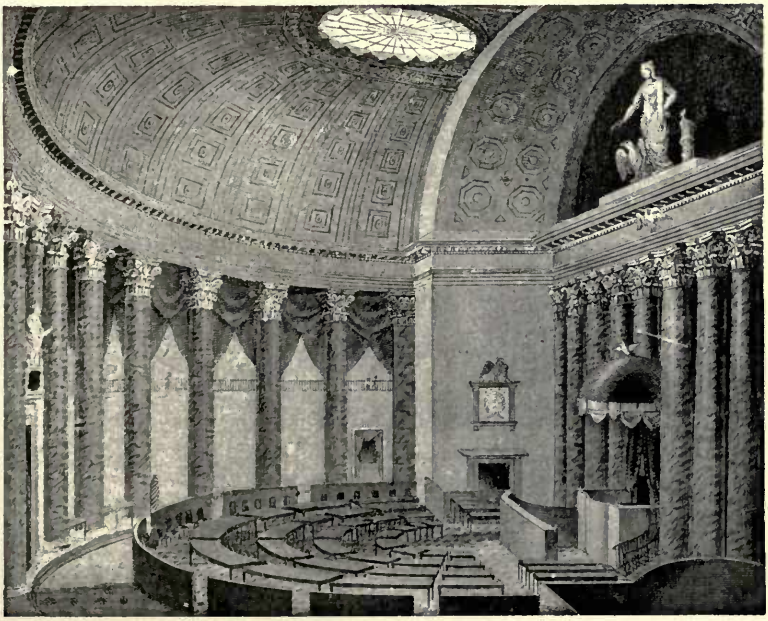
Adams Adams fell, stricken with paralysis, during a session of the House. In the room of the Clerk of the House, opening off from the Hall, is a memorial bust, whose inscription runs: "John Quincy Adams, who, after fifty years of public service, the last sixteen in yonder Hall, was summoned thence to die in this room, 23 February, 1848."

In 1864, at the suggestion of Senator Morrill, of Vermont (then a member of the House), the room was set apart as a National Statuary Hall, to which each State might send "the effigies of two of her chosen sons in marble or bronze, to be placed permanently here." The works are:

Adams Samued Adams, of Massachusetts, 1722-1803. Did perhaps more than any other one man to bring about the Revolution. On March 6, 1770,

FRANZONI'S CLOCK.

MARBLE ROOM.



OLD HALL OF REPRESENTATIVES—NOW STATUARY HALL.

Statuary Hall the day after the Boston massacre, he was spokesman of a committee sent to demand the withdrawal of the British troops, and the pedestal bears the ultimatum he then addressed to Governor Hutchinson: "Night is approaching. An immediate answer is expected. Both regiments or none." The troops were withdrawn. (By Annie Whitney.)

Allen Ethan Allen, of Vermont, 1739-1789. The hero of Ticonderoga. On the night of May 10, 1775, he led his Green Mountain Boys to the surprise of the fortress, and demanded its surrender "in the name of Jehovah and the Continental Congress." (By L. C. Mead.)

Allen William Allen, of Ohio, 1806-1879. Member of Congress; Senator; Governor. (By Niehaus.)

Benton Thomas Hart Benton, of Missouri, 1782-1858. Senator.

Blair F. P. Blair, Missouri, 1821-1875. Member Congress; General Civil War.

Carroll Charles Carroll of Carrollton, Maryland, 1737-1832. Signer of the Declaration; Senator.

Cass Lewis Cass, of Michigan, 1782-1866. General in War of 1812; Governor of Michigan Territory; Secretary of War under Van Buren; Minister to France; Senator; Secretary of State under Buchanan. (By French.)

Clinton George Clinton, of New York, 1739-1812. Member of Continental Congress; General in Revolution; first Governor of New York State; Vice-President, two terms, with Jefferson and Madison. (By H. K. Brown.)

Collamer Jacob Collamer, of Vermont, 1792-1865. Member of Congress; Postmaster-General under Taylor; Senator. (By P. Powers.)

Fulton Robert Fulton, of Pennsylvania, 1765-1815. First inventor to make practical application of steam power to navigation; built first successful steamboat, the "Clermont," 1807. (By Howard Roberts.)

Garfield James Abram Garfield, of Ohio, 1831-1881. Major-General, Army of the Cumberland; Member of Congress; elected to Senate; President. The bronze piece at base of pedestal—sword, wreath and palm—is symbolical of War, Victory and Peace. (By Niehaus.)

Greene Nathaniel Greene, of Rhode Island, 1742-1786. General in Revolutionary War; commander of the Southern Army. (By Brown.)

Hanson John Hanson, of Maryland. President Continental Congress. (Brooks.)

Ingalls John J. Ingalls, of Kansas. Senator. (By Niehaus.)*

Kenna John E. Kenna, of West Virginia. Senator.

Kearney Philip Kearney, of New Jersey, 1815-1862. Officer in Mexican War; Major-General Volunteers Civil War; killed at Chantilly. (H. K. Brown.)

King William King, of Maine. First Governor. (By Franklin Simmons.)

Lee Robert E. Lee, of Virginia, 1807-1870. (E. V. Valentine.) See p. 141.*

Livingston Robert R. Livingston, of New York, 1746-1813. Member of Continental Congress; one of the committee to draft the Declaration; first Chancellor of the State; Minister to France; completed the treaty for the Louisiana Purchase, and is here represented with the document. By the Louisiana Purchase the United States acquired for $15,000,000 all the French possessions from the Gulf of Mexico to the Canadian line, and from the Mississippi to the Rockies. (By E. D. Palmer.)

Marquette Pere Marquette. The statue, sent by Wisconsin, represents the missionary explorer in the dress of a priest, and holding a chart of the Lac

Statuary Hall des Illinois. The inscription reads: "Wisconsin's Tribute. James Marquette, S. J., who, with Louis Joliet, discovered the Mississippi River at Prairie du Chien, Wis., June 17, 1673." (By G. Trentanove.)

Muhlenberg John Peter Gabriel Muhlenberg, of Pennsylvania, 1746-1807. Major-General in Revolution; Member Congress; Senator. (Blanche Nevin.)

Pierpont Francis H. Pierpont, of West Virginia. First Governor. (By Franklin Simmons.)

Sherman Roger Sherman, of Connecticut, 1721-1793. Member committee to draft Declaration; one of the signers; Member Continental Congress, United States Congress and Senate. (By C. B. Ives.)

Shields James Shields, of Illinois, 1810-1879. Mexican War; Senator from Illinois, 1849; from Minnesota, 1857; General in Civil War. (By L. W. Volk.)

Stark John Stark, of New Hampshire, 1728-1822. New Hampshire's revolutionary hero; led a regiment at Bunker Hill; took part in many of the most important engagements of the war. It was at Bennington, where he commanded the New Hampshire militia, that he made the historic speech: "See there, men; there are the red-coats. Before night they are ours, or Molly Stark will be a widow." For his gallantry on that occasion he was made a Brigadier-General. His portrait is in Trumbull's Surrender of Burgoyne, which hangs in the Rotunda. (By Conrad.)

Stockton Richard Stockton, of New Jersey, 1730-1781. Member of Continental Congress; signer of the Declaration; imprisoned by the British, and subjected to hardships which eventually caused his death. (By H. K. Brown.)

Trumbull Jonathan Trumbull, of Connecticut, 1710-1785. Governor of Colony of Connecticut, and first Governor of the State; influential leader in the Revolution, and fertile in resources; a close friend of Washington, who "relied on him as one of his main pillars of support," and because of his skill in providing the sinews of war gave him the name of "Brother Jonathan," used ever since as the nickname of the United States. John Trumbull, artist of the Rotunda paintings, was his son. (By C. V. Ives.)

Washington George Washington, of Virginia, 1732-1799. This is a plaster cast. The original, of white marble, is in the Capitol at Richmond. It was ordered by the Virginia Assembly, and the eminent French sculptor Houdon was intrusted with the commission through Jefferson, then Minister to France. In 1785 Houdon accompanied Franklin to America, and visited Mount Vernon to prepare the model. It is life size; the dress is the military costume of the Revolution. Lafayette pronounced this the best representation of Washington ever made. (By Jean Antoine Houdon.) The inscription was written by James Madison, afterward President:—

"The General Assembly of the Commonwealth of Virginia have caused this statue to be erected as a monument of affection and gratitude to GEORGE WASHINGTON, who, uniting to the endowments of a HERO the virtues of the PATRIOT, and exerting both in establishing the liberties of his country, has rendered his name dear to his fellow-citizens, and given the world an immortal example of true glory. Done in the year of CHRIST one thousand seven hundred and eighty-eight, and in the year of the Commonwealth the twelfth."

Webster Daniel Webster, of New Hampshire, 1782-1852. Statesman, orator, the Great Expounder of the Constitution. This Hall of Representatives has rung with his eloquence. (By Conrad.)

THE STATUES IN STATUARY HALL.

Willard Frances Elizabeth Willard, of Illinois, President of the Woman's Christian Temperance Union; one of the organizers of the Prohibition Party; President of the Woman's Council of the United States.*

Williams Roger Williams, of Rhode Island, 1599-1683. Founder of the Colony; apostle of religious liberty. (By Franklin Simmons.

Winthrop John Winthrop, of Massachusetts, 1588-1649. First Governor of the Colony, 1629, under the new charter. (By R. S. Greenough.)

FRANCES E. WILLARD,
The first woman to be given place in Statuary Hall.

Acoustics The Hall has some extraordinary acoustic properties, by which whispers become shouts, and persons may converse with one another while their faces are buried in opposite corners. These peculiarities were a source of much vexation of spirit to the orators who debated here; but, as demonstrated by the guides, afford entertainment for the visitor of to-day.

Faces in Stone The variegated marble of the columns contains some astonishing natural pictures, perfect forms of birds and animals, and human faces, among which even grave Senators are wont to find likenesses of their associates.

The Hall of Representatives is a legislative chamber unsurpassed in the world. The dimensions are: length 139-ft.; width, 93-ft.; height, 30-ft. It is lighted by a ceiling of glass panels, set in a framework of iron. In the ceiling are painted the arms of the States.

The House The Speaker's desk, of white marble, occupies an elevated position in the centre of the south side, and the desks of the Representatives are arranged in concentric semi-circles, with radiating aisles. A silver plate on each mahogany desk (in House and Senate) has engraved on it the occupant's name. In front of the Speaker's desk are the desks and tables of the clerks and official reporters; on his right is the Sergeant-at-Arms; on his left, the Assistant Doorkeeper. The Speaker's Mace is set on its pedestal of Vermont marble at the right of the desk.

Mace The Mace is a bundle of ebony rods, bound together with ligaments of silver, and having on top a silver globe surmounted by a silver eagle. It resembles the fasces borne by the lictors before the Roman magistrates, and is the symbol of the Speaker's authority. The Mace is always placed on its pedestal when the House is in session, and is laid on the floor when the House is in Committee of the Whole. The Sergeant-at-Arms bears

*Statue not in place at this writing.

HALL OF REPRESENTATIVES.

WASHINGTON DECLINING OVERTURES FROM CORNWALLIS AT YORKTOWN.

the symbol before him when executing the Speaker's commands to enforce order, or to conduct a member to the bar of the House.

House Paintings

On either side of the Speaker's desk are full-length portraits of Washington (by Stuart, copied by Vanderlin) and Lafayette (by Ary Scheffer), presented to Congress by Lafayette on his last visit to this country. A fresco by Brumidi pictures the incident at Yorktown when Washington declined overtures from Cornwallis for a two days' cessation of hostilities.

Clock

Over the main entrance is the famous clock whose hands are turned back on the last day of the session, that the hour of adjournment may not be marked by it before the business of the House is finished. The clock is of bronze, with figures of Pioneer and Indian, and American eagle.

Lobby

Opening off from the Hall back of the Speaker's desk are the House Lobby and the Members' Retiring Rooms. There are landscapes by Albert Bierstadt picturing The Discovery of the Hudson by Hendrik Hudson in 1609, and the Expedition under Vizcaíño Landing at Monterey in 1601. The walls are hung with portraits of former Speakers. Under the galleries are the cloak rooms. The galleries are reached from the east and west corridors by magnificent stairways of Tennessee marble.

East Stairway

Facing the East Stairway is Hiram Powers' marble statue of Thomas Jefferson. Above the first landing hangs Frank B. Carpenter's picture of

Emancipation Proclamation

the First Reading of the Emancipation Proclamation before the Cabinet, Sept. 22, 1862. The portraits, beginning at the left, are: Edwin M. Stanton, Secretary of War; Salmon P. Chase, Secretary of the Treasury; Abraham Lincoln, President; Gideon Welles, Secretary of the Navy; William H. Seward (seated), Secretary of State; Caleb B. Smith, Secretary of the Interior; Montgomery Blair, Postmaster-General; Edward Bates, Attorney-General. The picture was presented to the United States by Mrs. Mary Elizabeth Thompson in 1878. Alex. H. Stephens, ex-Vice-President of the Confederacy, then a Member of the House, was one of the orators of its reception. In the corridor above are portraits of Gunning Bedford (of the Continental Congress), Charles Carroll (a signer of the Declaration of Independence) and Henry Clay (by Neagle).

West Stairway

At the foot of the West Stairway is a bronze bust (by Vincenti) of the Chippewa Chief, Be-She-Ke. On the wall of the landing (best seen from the upper corridor) is Emanuel Leutze's spirited painting, Westward Ho! It has for its legend Bishop Berkeley's line:

Westward the star of empire takes its way,

Westward Ho!

and finds its inspiration in a phase of Western settlement. The scene is laid in the Rocky Mountains, amid whose defiles and passes an immigrant train is pushing forward to a fair country beyond. The picture is full of life and action. Below is Bierstad't Golden Gate, harbor of San Francisco; and in the borders are portraits of Daniel Boone, the pioneer of the Southwest, and Capt. Wm. Clark, of the Lewis and Clark Expedition to the Columbia, 1803-6. In the upper corridor hangs a portrait of Chief Justice Marshall (by Brooke).

Some of the committee rooms opening off from the House corridors merit attention for their adornment. The Ways and Means Room and the

SUPREME COURT ROOM.

LEUTZE'S WESTWARD HO!

House Committee Rooms

Appropriations Rooms are handsomely frescoed. The Military Affairs Room contains a series of paintings of the forts of the United States. In the basement the scheme of decoration in the Territories Room is of Western Indian and wild life, and the Indian Affairs Room has a collection of paintings by Col. Eastman of scenes among the Sioux. In the Agricultural Room, elaborately decorated by Brumidi, are pictured Cincinnatus called from his plow to the Dictatorship of Rome, and Putnam summoned to his part in the Revolution. Ancient and modern harvest scenes—Flora (Spring), Ceres (Summer), Bacchus (Autumn), and Boreas (Winter)—portraits of Washington and Jefferson, who were both farmers, and other details make this one of the most richly adorned rooms of the building.

Supreme Court

THE SUPREME COURT ROOM, designed by Latrobe after Greek models, is a semi-circular hall, with a low-domed ceiling having square caissons of stucco work. The room is decorated with a screen of Ionic columns of Potomac marble, the white capitals modeled after those of the Temple of Minerva. The columns form a loggia and support a gallery. In front of them is the Bench of the Supreme Court. The chair of the Chief Justice is in the centre, with those of the eight Associates on either side. Outside of the space reserved for Counsel are seats for spectators. Ranged about the walls is a series of busts of former Chief-Justices: John Jay of New York, 1789-1795; John Rutledge of South Carolina, 1795-1795; Oliver Ellsworth of Connecticut, 1796-1800; John Marshall of Virginia, 1801-1835; Roger B. Taney of Maryland, 1836-1864; Salmon P. Chase of Ohio, 1864-1873; Morrison R. Waite of Ohio, 1874-1888. The Supreme Court Room was until 1859 the Senate Chamber.

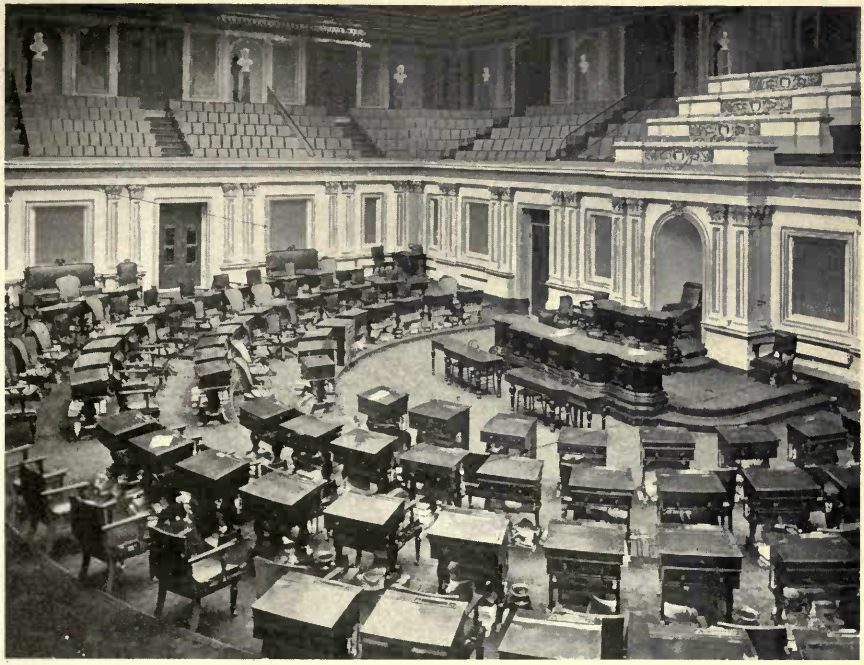
Mr. Justice Day. 10. The Clerk's Desk. 11. The Marshal's Desk. 12. The Reporter's Desk. 13. The Attorney-General's Desk. 14. Counsel's Desk.

Senate Chamber

THE SENATE CHAMBER is a spacious hall, 113-ft. in length, 82-ft. wide, and lighted by a ceiling 36-ft. above the floor. The seats of the Senators are arranged in concentric rows, with the aisles radiating from the dais of the President's desk on the north side. On the right of the President's chair is that of the Sergeant-at-Arms, on the left that of the Assistant Doorkeeper, and in front are the desks of the clerks and official reporters. The room is surrounded by galleries, whence one may watch the proceedings. The walls are richly decorated in gold arabesques on delicate tints,



SENATE CHAMBER.

with buff panels; and the glass of the ceiling is filled with symbolism of War, Peace, Union, Progress, the Arts, Sciences and Industries. In wall niches around the galleries are marble busts of the Vice-Presidents (Presidents of the Senate), and the series is continued in the various halls. In the main corridor are portraits by Stuart of Washington and John Adams; Patrick Henry by Matthews, Thomas Jefferson by Darby, Daniel Webster and Henry Clay by Darby, and John C. Calhoun. The mahogany hall clock has been in the Capitol since 1803. Its seventeen stars were for the seventeen States then constituting the Union, the last star being for Ohio, admitted in 1802. **Senate**

The rooms connected with the Chamber are notable for richness of material of construction and adornment. They are the President's Room, Vice-President's Room, Senators' Reception Room, Public Reception Room, and Room of the Committee on the District of Columbia.

The Room of the President of the United States is set apart for the use of the President on his visits to the Capitol, and is one to which he comes in the closing hours of the session to sign the last bills before adjournment. It is decorated (by Brumidi) with portraits of President Washington and his first cabinet—Jefferson, Hamilton, Knox, Randolph and Osgood; with allegories of Liberty, Religion, Legislation and Executive Authority; and portraits of Columbus with emblems of Discovery, Americus **President's Room**

Vespucius (Exploration), William Brewster (Religion), and Benjamin Franklin (History). Note the way in which the figure of Religion turns toward one from whatever part of the room it is seen.

Marble Room The Senators' Reception Room, known as the Marble Room, because constructed wholly of that material, has stately Corinthian columns of Italian marble, paneled walls of Tennessee marble, and ceiling of marble from Vermont. The walls are set with mirrors.

Vice-President's Room The Room of the Vice-President of the United States (who is the President of the Senate) contains Rembrandt Peale's portrait of Washington; a marble bust of Vice-President Henry S. Wilson, whose tragic death occurred in this room, Nov. 22, 1875, and a portrait of Lafayette S. Foster, acting Vice-President in Andrew Johnson's term.

Reception Room The Public Reception Room is a richly furnished apartment, decorated in oils and frescoes by Brumidi. On the south wall is a painting of President Washington in consultation with Thomas Jefferson, his Secretary of State, and Alexander Hamilton, his Secretary of the Treasury. The vaulted ceiling is all aglow with the brilliant colors of the allegories of War, Peace, Liberty, Plenty, Power, Temperance, Prudence and Justice.

District Room The Room of the Committee on the District of Columbia, originally designed for the Senate Library, has in the vaulted ceiling Brumidi frescoes of History, Geography, Science and the Telegraph.

Corn and Tobacco The columns of the Senate vestibule have Latrobe's tobacco-leaf capitals. Latrobe's (sometimes called Jefferson's) cornstalk columns, with capitals of corn in the husk, are at the foot of the East Stairway (near the Supreme Court Room) leading to the basement. They have ingeniously been termed the "American order" of architecture.

Crawford Door From the Senate vestibule the east door opens upon the portico. This is the Crawford Bronze Door designed by the American sculptor Thomas Crawford, and cast at Chicopee, Mass. See illustration, page 51.

In the niches of the corridor are busts of Vice-Presidents Tyler, Johnson and Wheeler.

HALSALL'S MONITOR AND MERRIMAC.

BATTLE OF LAKE ERIE.

East Corridor Paintings

From the east and west corridors stairways lead to the Senate Galleries. The East Stairway, of Tennessee marble, is lighted by a richly stained skylight over the landing. At the foot of the stairs is Hiram Powers' statue of Benjamin Franklin (note the inimitable shrewdness of the expression), and on the wall of the landing hangs W. H. Powell's spirited painting of the Battle of Lake Erie, Sept. 13, 1813. It pictures the gallant exploit of Commodore Perry, transferring his colors from the disabled flagship Lawrence to the Niagara, in the face of a terrific cannonading. It was after the victory won here that Perry dispatched the famous message, "We have met the enemy and they are ours."

In the corridor and halls are paintings: Heaton's Columbus Leaving La Rabida, Thomas Moran's Canyons of the Yellowstone and the Colorado, Halsall's First Fight of the Iron-Clads (Monitor and Merrimac, Hampton Roads, Va., March 9, 1862), and Mrs. C. A. Fassett's Florida Case before the Electoral Commission (in the Senate Chamber, Feb. 5, 1877). The last contains a number of portraits of the public men of the Hayes-Tilden period; a key to the picture hangs near the window.

The Electoral Commission was a special commission created by Congress in January, 1877, to decide the disputed electoral returns of the Presidential election of 1876. It was composed of five Senators, five Representatives and five Justices of the Supreme Court. The cases submitted to it were those of Florida, Louisiana, South Carolina and Oregon. From each of these States double or multiple sets of returns had been received; and the election depended upon which should be accepted and counted. By a party vote of 8 to 7 the Commission decided every case for Hayes.

There is here also a series of four old paintings by John B. White: Gen. Marion inviting a British officer to a dinner of potatoes; Mrs. Motte preparing to fire her house; Sergeants Jasper and Newton; Battle of Fort Moultrie, June 28, 1776.

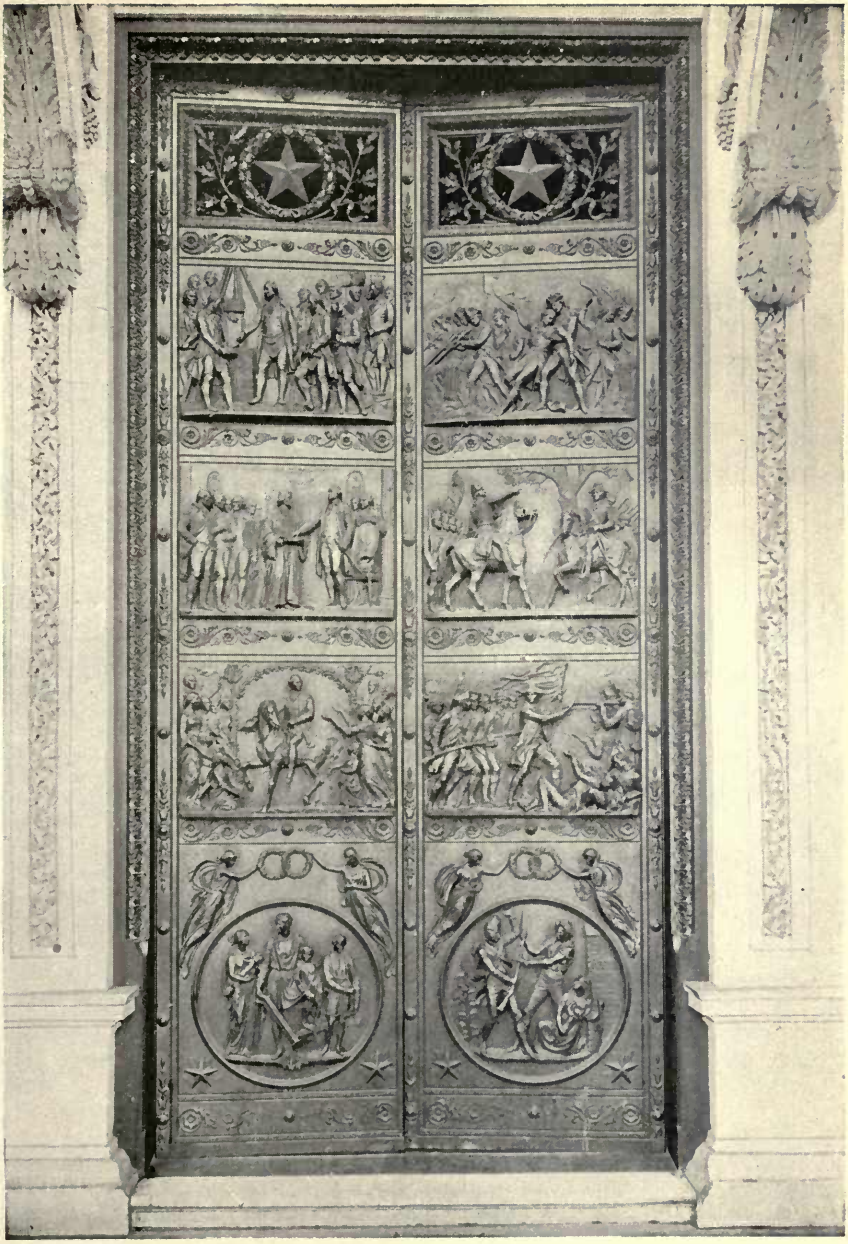
There are portraits in mosaic of Abraham Lincoln and James A. Garfield, and in oil of Charles Sumner (by Ingalls) and Gen. John A. Dix (by Morrell). The Stars and Stripes of the Dix portrait are put here in commemoration of the historic dispatch sent by him as Secretary of the Treasury to Wm. Hemphill Jones, in New Orleans, Jan. 29, 1861: "If any one attempts to haul down the American flag, shoot him on the spot." A painting of Niagara in Winter by Regis Gignoux was presented by Mrs. Carroll in memory of Charles Carroll. There are busts of Lincoln, Sumner, Crawford, Tyler, Garibaldi, Pulaski and Kosciuszko.

(*Note.*—The locations of objects are subject to change.)

West Stairway

At the base of the white marble West Stairway is Story's marble statue of John Hancock, whose name is first in the list of signatures of the Declaration. The pedestal is inscribed: "He wrote his name where all nations should behold it and all time should not efface it." On the landing is James Walker's Storming of Chapultepec, one of the defences of the City of Mexico, by the American Army under Gen. Scott, Sept. 13, 1847. In the upper corridor is Charles Wilson Peale's Washington.

Peale was an officer in the patriot army, and while in camp employed his leisure hours in painting. He began the picture of Washington at Valley Forge, obtained the final sitting from the commander-in-chief a day or two after the battle of Monmouth,



THE CRAWFORD DOOR—SENATE PORTICO.

The panels commemorate the Death of Warren at Bunker Hill, 1775; Washington's Rebuke of Gen. Charles Lee at Monmouth, 1778; Hamilton's Gallantry at Yorktown, 1781; Washington's Reception at Trenton, when on the way to his Inauguration as First President, 1789; Washington's First Inauguration, 1789; Laying the Corner Stone of the Capitol, Sept. 18, 1793. The panels below contain allegories of War (struggle between a Hessian and a settler) and Peace.

OFFICE BUILDING OF THE HOUSE OF REPRESENTATIVES
Under construction southeast of the Capitol.

Peale's Washington

and finished the picture at Princeton. Nassau Hall at Princeton is shown in the background, with a body of British prisoners. The sword worn by Washington is the one now preserved in the library of the State Department. The portrait in Vice-President's Room by Rembrandt Peale (son of Charles Wilson Peale) was painted from sittings given by Washington in 1795. Lossing records that it "was pronounced by the relatives and intimate friends of Washington the best likeness of Washington that was ever painted."

Bronze Stairways

Elaborate bronze stairways (designed by Crawford) lead to the Senate basement, whose corridor walls and ceilings are filled with frescoes, and some of whose committee rooms are deserving of attention. When Congress is in session the bronze stairways are reserved for the use of the Senators only; visitors should take the stairs leading from the east and west corridors.

Senate Committee Rooms

Among the basement decorations are arabesques, allegorical figures, birds and game, tracery of vine and foliage, the Indian, and portraits of distinguished actors and notable scenes in American history. America is pictured now as panoplied for war, and again as reading from the Constitution. The Room of the Committee on Indian Affairs (intended for the Committee on Agriculture) has above the door a painting of Columbus and an Indian maiden, and on its walls and ceilings are some exquisite vine and fruit pieces. In the room of Military Affairs five frescoes (by Brumidi) depict the Boston Massacre, the Battle of Lexington, the Death of Wooster, Washington at Valley Forge, and the Storming of Stony Point. Above the doors of the Foreign Relations Room is a fresco copy of West's painting of the Signing of Preliminary Articles of Peace between the United States and Great Britain, at Paris, Nov. 13, 1782; and within are portraits of Clay, Allen, Cameron and Sumner, in their times chairmen of the committee. The negotiations between the United States and France which led to the Louisiana Purchase (April 30, 1803), give the theme for

Senate Committee Rooms

the exterior decoration of the Territories Room. Other portraits are of Fulton, over the door of the Patents Room; Franklin, over that of the Post-Offices and Post-Roads Room; Fitch (steamboat inventor), over the Senate Post-Office, and Las Casas (Apostle to the American Indians), facing the foot of the west stairway.

Crypt

Underneath the Rotunda is a chamber formed by a colonnade of Doric columns with groined ceiling. A star in the floor designates the centre of the Capitol. A crypt below was designed to be the tomb of Washington, but it was never used for this purpose.

Corner Stone

The corner-stone of the original Capitol is to the right of the Rotunda portico; it may be reached by descending the flight of steps on the right after leaving the Rotunda by the north door. It is marked with a beautiful bronze memorial tablet, set in place in 1895.

House Office Building

An office building for the use of members of the House of Representatives is under construction, to occupy the block on B street, between New Jersey Avenue and First Street, southeast of the Capitol.

D'Angers Bust

In 1904 certain descendants of the French officers who fought in the American Revolution presented to this country a bronze bust of Washington, by David d'Angers, to replace one which was destroyed by fire in the Capitol in 1851.

THE LIBRARY OF CONGRESS

And its Mural Decorations.

*** The eighty-six key pictures of paintings and architecture are miniatures from the volume of reproductions entitled "Book of the Paintings of the Library of Congress," published by Foster & Reynolds, who publish also The Library Paintings reproduced in the original colors.

*** For public cafe and lunch room take elevator to top floor.

THE Library grounds adjoin those of the Capitol. The building faces west upon First street, and the outer walls have a frontage upon four streets (First, East Capitol, Second and B streets). The grounds and the seventy residences upon them cost $585,000. The foundations were laid in 1888, and the building was begun in 1889, and was completed 1897. The net cost, exclusive of site, was $6,032,124.54.

The original architectural plans were prepared by the firm of Smithmeyer & Pelz. These were modified by those of Edward Pearce Casey.

The building is of the Italian Renaissance order of architecture; it has three stories, with a dome; and is in area 470×340-ft., covering nearly 3½ acres of ground, with four large inner courts, 150 by 75 to 100-ft., and nearly 2,000 windows render it the best lighted library in the world.

The plan and arrangement are shown in our diagram. The building consists of a great central rotunda, which is the reading-room; from which radiate book-stacks, and which is inclosed in a parallelogram of galleries and pavilions. The building material employed is for the exterior walls white granite from New Hampshire, and for the inner courts Maryland granite and white enameled bricks.

There are three stories. On the ground floor are the copyright office, reading room for the blind, and superintendent's office. The first floor contains the reading room (where the books are consulted), the librarian's room, periodical reading room, Senate and Representatives' reading room, and map room. The pavilions and galleries of the second floor are devoted to

exhibits of engravings and other collections, including rare books, first editions, portraits of the Presidents and other personages.

Exterior Decorations.—The Dome is finished in black copper, with panels gilded with a thick coating of gold leaf. The cresting of the Dome above the lantern, 195-ft. from the ground, terminates in a gilded finial, representing the torch of Science, ever burning.

The thirty-three windows of the corner pavilion and of the west façade have carved heads representing the several races of men. The types are: Russian Slav, Blonde European, Brunette European, Modern Greek, Persian, Circassian, Hindoo, Hungarian, Jew, Arab, Turk, Modern Egyptian, Abyssinian, Malay, Polynesian, Australian, Negrito, Zulu, Papuan, Soudan Negro, Akka, Fuegian, Botocudo, Pueblo Indian, Esquimau, Plains Indian, Samoyede, Corean, Japanese, Aino, Burmese, Thibetan, Chinese.

The Bronze Fountain, by Hinton Perry, represents the *Court of Neptune,* with conch-blowing tritons, sea nymphs, sea horses, serpents, frogs and turtles.

The Entrance Pavilion has sixteen rounded pillars with Corinthian capitals. Four colossal Atlantes support the pediment, on which are sculptured American eagles, with supporting figures of children. In the windows are nine colossal portrait-busts in granite: *Emerson* and *Irving,* by Hartley; *Goethe, Franklin* and *Macaulay,* by Ruckstuhl; *Hawthorne,* by Hartley; *Scott,* by Adams; *Demosthenes* and *Dante,* by Adams. The sculptures over the entrances by Bela L. Pratt typify *Literature, Science* and *Art*

The Bronze Doors.

Bronze Door—Printing.—By Frederick Macmonnies.—Minerva presiding over the "Diffusion of the Products of the Typographical Art." Two winged figures of youthful genii are, as her envoys, conveying to mankind the blessings of learning and literature. By Minerva's side is her owl; other suggestions are the hour-glass, the old-fashioned printing press, the stork (as the bird of home), and a Pegasus. The legend: *"Homage to Gutenberg."* (Gutenberg was the inventor of printing, Germany, 1400-1468.) In the panels idealizations are of Intellect and Humanities.

Bronze Fountain—Court of Neptune.

THE LIBRARY OF CONGRESS—FROM THE CAPITOL.

LIBRARY OF ARCHITECTU
AND ALLIED ARTS

Bronze Door—Tradition.

Bronze Door—Writing.—By Olin L. Warner.—A mother is instructing her children from the written record of the scroll. On one side is an Egyptian scribe with his stylus, and a Jewish patriarch; on the other, a Greek with a lyre and a Christian with the cross. In the panels are Truth with mirror and serpent and Research with torch.

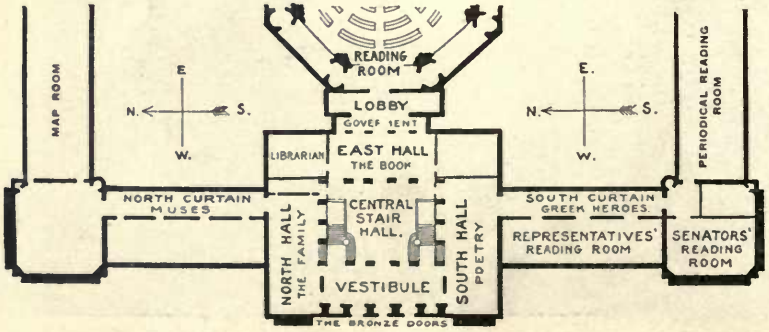
Bronze Door—Tradition.—By Olin L. Warner.—Tradition is typified as a woman reciting her story to a boy. Listening to the tale are four representative types of mankind—a Norse warrior, with winged cap and battle-axe; a shepherd with his crook; a primitive man with his stone axe, and an American Indian with his arrows. The Indian figure is a portrait of Chief Joseph of the Nez Perces. In the left panel is Imagination with the lyre, emblematic of recitation and song; in the right stands widowed Memory clasping the sword and helmet of her dead. The genii below support the wings of Imagination and the memorial urn.

Entrance Pavilion—Vestibule.

The Minerva of Defensive War and the Minerva of Wisdom and the Liberal Arts, sculptural figures, by Herbert Adams, are repeated in eight pairs. The white marble of the vestibule is from Italy. The gold of the ceiling is like that of the dome, 22-carats fine.

Entrance Pavilion—Grand Stair Hall.

The Central Stair Hall is a magnificent apartment, unsurpassed by any other entrance hall in the world. It is lined throughout with fine Italian marble, highly polished. On the sides rise lofty rounded columns, with elaborate carved capitals of Corinthian design; while the arches are adorned with marble rosettes, palm leaves and foliated designs of exquisite finish and delicacy. The great height of this entrance hall, rising 72-ft. to the skylight,



PLAN OF THE FIRST FLOOR AND DECORATIONS.

RELIGION.

with its vaulted ceiling, and the grand double staircase, with its white marble balustrades leading up on either side, exhibit an architectural effect which may fitly be termed imposing. The newel posts of the stairway are enriched by beautiful festoons of leaves and flowers, and are surmounted by two bronze lamp-bearers for electric lights. The staircases are ornamented with twenty-six miniature marble figures by Martiny, carved in relief, representing in emblematic sculpture the various arts and sciences. This beautiful and spacious entrance hall has been described as "a vision in polished stone," and, taken in connection with the grand corridors and the richly decorated Reading Room, the Library may be pronounced the finest marble interior in America.

Commemorative Arch.—The spandrel figures by Warner are of *Students*, one a boy, the other an old man, for books are alike for the instruction of youth and solace of age. The panel, with fasces and eagle on either side, records:

Erected under the acts of Congress of April 15, 1886; October 2, 1888, and March 2, 1889, by Brig.-Gen. Thos. Lincoln Casey, Chief of Engineers, U. S. A. Bernard R. Green, Supt. and Engineer. John L. Smithmeyer, Architect. Paul J. Pelz, Architect. Edward Pearce Casey, Architect.

Martiny Staircases.—In the south stairway railing the sculptures are: Mechanic with cog-wheel, Hunter with rabbit, Vintager with grapes and wine glass, Farmer with sickle and sheaf of wheat, Fisherman with rod and fish, Soldier with helmet, Chemist with blowpipe, and Cook with steaming pot. The buttress figures are of America and Africa, supporting a globe showing these continents. On the balustrade above are Comedy, Tragedy and Poetry.

The figures of the north stairway are: Gardener with rake and spade, Entomologist with net and specimen case, Student with mortar-board cap and book, Printer in paper cap with press and type, Musician with lyre and music book, Physician with mortar, retort and serpent, Electrician with telephone and electric light, Astronomer with telescope, globe and compasses. On the buttress are Europe (with lyre, book and column) and Asia (with dragon vase). The balustrade figures are Painting, Architecture and Sculpture.

In the cove of the ceiling are Martiny's flying half-figures supporting the device of lamp and book. Tablets bear the names of Moses, Herodotus, Dante, Homer, Milton, Bacon, Aristotle, Goethe, Shakespeare, Moliere; Cervantes, Hugo, Scott, Cooper, Longfellow, Tennyson, Gibbon, Bancroft.

The Points of the Compass radiate from a conventional sun inlaid in brass in the floor, surrounded by the Signs of the Zodiac. The Building faces west.

Europe and Asia.

America and Africa.

THE NORTH STAIRWAY IN THE CENTRAL STAIR HALL.

The Muse of Lyric Poetry.

Entrance Pavilion—South Hall.

Poetry.—By H. O. Walker. In *Lyric Poetry,* the central figure is an idealization of the Muse, laurel-crowned and striking the lyre. She is attended by Passion with arm upraised responding to the strains, Beauty, and Mirth, Pathos with eyes raised to heaven, Truth, and Devotion with bowed head.

Poets' Boys.—Six paintings present ideals of youthful subjects of the poets:

Uriel.

Boy of Winander.

Emerson—Uriel.

This was the lapse of Uriel,
Which in Paradise befell,
Once among the Pleiads walking,
Said overheard the young gods talking.
One, with low tones that decide,
And doubt and reverend use defied,
With a look that solved the sphere,
And stirred the devils everywhere,
Gave his sentiment divine
Against the being of a line:

"Line in nature is not found,
Unit and Universe are round;
In vain produced, all rays return,
Evil will bless and ice will burn."

As Uriel spoke with piercing eye,
A shudder ran around the sky;
The stern old war-gods shook their heads,
The seraphs frowned from myrtle-beds.

Wordsworth—The Boy of Winander.

THERE was a Boy; ye knew him well, ye cliffs
And islands of Winander!—many a time,
At evening, when the earliest stars began
To move along the edges of the hills,
Rising or setting, would he stand alone,
Beneath the trees, or by the glimmering lake;
And there, with fingers interwoven, both hands
Pressed closely palm to palm and to his mouth
Uplifted, he, as through an instrument,
Blew mimic hootings to the silent owls,
That they might answer him.—And they would shout
Across the watery vale, and shout again,
Responsive to his call, with quivering peals,
And long halloos, and screams, and echoes loud
Redoubled and redoubled; concourse wild
Of jocund din! And, when there came a pause
Of silence such as baffled his best skill:
Then, sometimes, in that silence, while he hung
Listening, a gentle shock of mild surprise
Has carried far into his heart the voice
Of mountain torrents; or the visible scene
Would enter unawares into his mind
With all its solemn imagery, its rocks,
Its woods, and that uncertain heaven received
Into the bosom of the steady lake.

This boy was taken from his mates, and died
In childhood, ere he was full twelve years old.
Pre-eminent in beauty is the vale
Where he was born and bred: the churchyard hangs
Upon a slope above the village school;
And, through that churchyard when my way has led
On summer evenings, I believe, that there
A long half-hour together I have stood
Mute—looking at the grave in which he lies!

Comus.

Adonis.

Milton—Comus.

COMUS, the enchanter, in the wood at night, listens to the song of The Lady, and at its conclusion exclaims:

Can any mortal mixture of earth's mould
Breathe such divine, enchanting ravishment?

Shakespeare—Adonis.

ADONIS, the young hunter loved by Venus, unmindful of the entreaties of the goddess, left her side to hunt the wild boar, by which he was slain. Venus discovers him.

She looks upon his lips, and they are pale;
She takes him by the hand, and that is cold;
She whispers in his ears a heavy tale,
As if they heard the woeful words she told;
She lifts the coffer-lids that close his eyes,
Where, lo, two lamps, burnt out, in darkness lies.

"Wonder of Time," quoth she, "this is my spite
That, thou being dead, the day should yet be light!"

Endymion.

Ganymede.

Keats—Endymion.

The story runs that from her silver chariot of the moon, Diana beheld the shepherd boy Endymion asleep upon Mount Latmos; and enamored of his beauty, descended to press a kiss upon his lips. Night after night in her course across the heavens, the goddess paused to caress the youth; and Endymion, each time but partially awakened, was conscious of her presence only as the sweet vision of a dream.

Tennyson—Ganymede.

When Jupiter came down to earth, to seek a successor to Hebe as Cupbearer to the Gods, he took the form of an eagle, and flying over Mount Ida, saw the Trojan Prince Ganymede, whom he carried off to Olympus. Tennyson in his "Palace of Art" describes, as among the pictures decorating its walls, one of Ganymede borne aloft by the eagle—

Or else flushed Ganymede, his rosy thigh
Half-buried in the Eagle's down,
Sole as a flying star shot thro' the sky
Above the pillar'd town.

Joy and Memory.

Joy and Memory are idealized in the painting above the arch in the west wall. Joy is attended by a boy with a lamb; Memory sits by a sculptured marble. The composition symbolizes the dual office of poetry as giving expression to the joyousness of life and as commemorating the men and the deeds of the past. The inscription is from Wordsworth:

> The Poets, who on earth have made us heirs
> Of truth and pure delight by heavenly lays.

In the mosaic ceiling are names of poets: Theocritus, Pindar, Anacreon, Sappho, Catullus, Horace, Petrarch, Ronsard, Longfellow, Lowell, Whittier, Bryant, Whitman, Poe, Browning, Shelley, Byron, Musset, Hugo, Heine.

South Curtain Corridor.

Greek Heroes.—By Walter McEwen. The paintings have for their themes incidents in the Greek myths of Paris, Jason, Bellerophon, Orpheus, Perseus, Prometheus, Theseus, Achilles and Hercules.

Paris.—When Juno, Minerva and Venus contended as to which was the fairest, they left the decision to Paris, a shepherd boy on Mount Ida. To influence him, Juno promised him power, Minerva martial glory, and Venus the most beautiful woman in the world. He decided in favor of Venus, and she gave him Helen, wife of Menelaus, King of Sparta. Paris accordingly repaired to the court of Menelaus, and Helen eloped with him to Troy. The Greeks, making the cause of Menelaus their own, besieged Troy to recover Helen, and the Trojan War followed.

Theseus sailed with a company of Athenian youths and maidens who were sent as a tribute to King Minos of Crete to be given over to the Minotaur, a monster half-bull and half human, which fed on human flesh. Ariadne,

Paris at the Court of Menelaus and Helen.

Prometheus

Theseus.

the daughter of Minos, fell in love with Theseus, and gave him the clue of the labyrinth, by which he was enabled to reach and slay the Minotaur. Ariadne set sail with the hero for Athens; but on the way, at the isle of Naxos, Minerva, in a dream, directed Theseus to desert her, and in obedience to the command he sailed away and left Ariadne sleeping.

Prometheus having stolen fire from heaven, Jupiter created the first woman, Pandora, for the punishment of mankind, and sent her to Prometheus. He refused her, and vainly cautioned his brother Epimetheus not to accept her.

Achilles.

Hercules.

Pandora holds the fateful box, from which were to be let fly into the world all human ills, only Hope remaining to bless mankind.

Hercules having killed a man was condemned to serve Omphale, the Queen of Lydia, as a slave. Appareled in feminine dress, the hero was put to spinning and other woman's tasks.

Achilles was disguised by his mother as a school girl and sent to a distant court in order that he might not be enlisted in the Trojan War. The wily Ulysses set out to find him, and assuming the character of a peddler displayed his wares. The girls chose feminine trinkets, but Achilles was attracted to a man's shield and casque, and thus revealed himself.

Bellerophon.

Perseus.

Jason.

Orpheus.

Bellerophon, commissioned to slay the Chimæra, a monster with lion's head, goat's body and dragon's tail, receives from Minerva the golden bridle of the winged horse Pegasus, by whose aid he is to accomplish the task.

Perseus was sent by King Polydectes to slay the Gorgon, Medusa, a creature of aspect so terrible that whoever looked upon her face was turned to stone. By the aid of Minerva Perseus beheaded the Gorgon, and returned to the court of Polydectes, as that monarch was celebrating with a banquet a forced marriage with Danaë, the mother of Perseus. The hero came just in time to rescue his mother by confronting the King and his company with the Gorgon's head and so turning them into stone.

Jason was the leader of the expedition of the Argonauts, who went in quest of the Golden Fleece. This was the fleece of a ram, which was preserved by the King of Colchis, and guarded by a dragon. By the aid of the sorceress Medea, Jason was successful and brought the Fleece back to Athens.

Orpheus, having failed to bring back his wife Eurydice from the realms of Pluto, retired to Mount Athos. Here his solitude was invaded by the Thracian women celebrating their Bacchic rites; and when he repelled their advances, in their fury they stoned him to death.

Representatives' Reading Room.

Mosaic Mantels.—By Frederick Dielman. The mantels of Italian marble are the richest and most beautiful adornments of the building. The mosaic panels (exceeding 7 feet by 3 feet in size) have for subjects Law and History.

Law, a woman of radiant countenance and wearing the ægis, is enthroned upon a dais. At her feet are doves of peace, the bound volume of the statutes, and the scales of justice. She holds a palm branch toward Truth with her lilies, Peace with twig of olive, and Industry with artisan's cap and hammer; and interposes a sword against skulking Fraud, Discord with malign serpents, and Violence with sword and torch.

History.—In the center stands the Muse of History with recording pen and gold-clasped volume. In the panels are names of great historians: Herodotus, Thucydides, Polybius, Livy, Tacitus, Bæda, Comines, Hume, Gibbon, Niebuhr, Guizot, Ranke, Bancroft, Motley. On the left side sits Mythology with recording stylus and globe symbolic of the myths of the worlds. Beside her are a winged Sphinx and Pandora's box. On the right is the venerable figure of Tradition, and by her with a lyre sits a youthful poet, who will sing the story that she tells. In the distance back of Mythology, rise the Pyramids

Mosaic Mantel—Law.

of Egypt, back of History the Parthenon of Greece, and beyond Tradition the Colosseum of Rome.

The oak tympanums over the doors are by C. H. Niehaus with motives of Minerva's owl and the American eagle.

Pictorial Spectrum of Light.—Carl Gutherz has painted in ceiling panels idealizations of the seven primary colors: *Indigo*, the Light of Science. *Blue*, the Light of Truth. *Green*, the Light of Research. *Yellow*, the Light of Creation. *Orange*, the Light of Progress. *Red*, the Light of Poetry. *Violet*, the Light of State.

Senate Reading Room.

The Senate Reading Room ceiling is decorated with a gold ground on which are floating female figures. Above the mantel is carved the shield of the Union surmounted by the American Eagle. (By Adams.)

Mosaic Mantel—History.

Entrance Pavilion—Reading Room Lobby.

Government of the Republic and the results of good and bad administration are symbolized by Elihu Vedder in five paintings as follows:

Government, majestic of mien and laurel-crowned, holds the scepter, and a tablet, on which is Lincoln's characterization: "A government of the people, by the people, for the people." Genii bear the sword of authority and the bridle of restraint. The oak typifies strength.

Good Administration, the genius of America, is seated beneath an arch, of which each stone fills its office of support for all the others, as every State

Government.

Good Administration.

must contribute to the upholding of the Union. She holds, evenly balanced, the scales of justice, and supports a shield whose divisions represent the idea of political parties. In her lap is the open book of the laws. To one ballot urn comes a youth to cast his vote; his books indicate that intelligence must qualify for the franchise. Into the other urn, public opinion winnows the wheat from the chaff. The fig tree and the wheat fields indicate domestic tranquility. Good administration insures peace and prosperity.

Peace and Prosperity are symbolized by a goddess who extends laurel wreaths in token of encouragement and reward to Agriculture and Art. In the background is the olive tree.

Peace and Prosperity.

Corrupt Legislation has gathered to herself cornucopias of gold, the sources of which are shown by the corruptionist placing his bribe in her sliding scale. That the Briber has purchased legislation is indicated by the book of the law which he holds on his own lap, and by the overthrown ballot urn at his feet.

Corrupt Legislation.

Anarchy.

The Cairn.

Oral Tradition.

The strong box, the coin and the busy factories tell of his prosperity. Honest Industry, with empty distaff, sues for recognition in vain. The factory chimneys in the distance are smokeless. The flying leaves of the vine presage decay. *Anarchy,* holding aloft as a brand the flaming scroll of the Constitution and clutching the cup of madness, is here the presiding genius amid universal wreck and ruin. Serpents are twisted in her hair. One foot rests upon the

Hieroglyphics.

The Pictograph.

downfallen arch of the State; with the other she is spurning religion, learning, art and law. Ignorance and Violence are assisting in the overthrow. The broken mill and cog wheels typify the ruin of industries. The tree is withered and dead. The bomb with fuse alight foretells the end.

Entrance Pavilion—East Hall.

The Evolution of the Book.—By John W. Alexander. A series of six panels: 1. *The Cairn* erected by prehistoric man on the seashore, a mere heap of boulders to commemorate some notable event. 2. *Oral Traditions.*—The Oriental story-teller, relating his tale to a group of absorbed listeners. 3. *Hieroglyphics* chiseled upon the face of a monumental tomb by the Egyptian stonecutter. 4. *The Pictograph,* or picture writing, by which the primitive American Indian records on the painted buffalo robe his rude story of the war trail

The Manuscript.

The Printing Press.

THE CENTRAL STAIR HALL OF ENTRANCE PAVILION.

This apartment, which has been styled "a vision in polished stone," is a fitting entrance hall to the superb building. In the dignity of its proportions and design, in richness and harmony of adornment, in the perfect adaptation to the purpose for which it is intended, the Library of Congress stands to-day as America's highest architectural achievement. The legend of Mr. Vedder's mosaic of Minerva runs: "Nil invita Minerva quæ Monumentum ære perennius exegit." Freely rendered: "Minerva was at her best when she builded this monument, more enduring than bronze." The architects, painters and sculptors are all American citizens, and it may well be an occasion of patriotic pride, that in conception, design and execution the building is a product of American talent, art and workmanship.

and the chase. 5. *The Manuscript* engrossed and illuminated by the monastic scribes of the Middle Ages. 6. *The Printing Press.*—Gutenberg, the inventor of printing, is reading a proof which has just come from the press.

North Hall of Entrance Pavilion.

The Ceiling Decorations are emblems of arts and sciences, with names of Americans who have achieved distinction in them: Architecture—Latrobe, Walter, architects of the Capitol. Music—Mason, Gottschalk. Painting—Stuart, Allston. Sculpture — Powers, Crawford. Poetry — Emerson, Holmes. Natural Science — Say, Dana. Mathematics — Pierce, Bowditch. Astronomy—Bond, Rittenhouse. Engineering—Francis, Stevens. Natural Philosophy—Silliman, Cook. Medicine—Cross, Wood, McDowell, Rush, Warren. Law—Hamilton, Kent, Pinckney, Shaw, Taney, Marshall, Story, Gibson, Webster, Curtis. Theology—Mather, Edwards, Channing, Beecher, Brooks.

Librarian's Room.

In the ceiling of the Librarian's room is E. J. Holslag's idealization of *Literature,* as a woman of benign aspect; she holds a scroll, and is attended by a youthful genius bearing a lamp. The theme is repeated in other female figures in the corners below, with the symbols of book, torch and lute. The ceiling decoration shows the Greek lamp, Minerva's owl, books, palms, girls with garlands and heralds of fame. The wall and ceiling quotations are given elsewhere.

Floating Scroll Bearers.

Entrance Pavilion—North Hall.

The Family.—Charles Sprague Pearce's paintings have for their theme The Family, and Religion, Labor, Study, Recreation and Rest, as elements of civil-

The Family.

Labor.

Study.

ization. In *The Family* the central figure is the child in arms, which the mother holds out to crow a welcome to the father just returned from the hunt. There are two older sisters in the group, while the grandfather and the grandmother look on with fond affection. In *Religion,* two worshippers kneel before a stone altar, from which ascends the smoke of their sacrifice. *Labor* is represented by two young farmers clearing the land. In the other panels are girlish figures; in *Study,* with books and compasses; in *Recreation,*

Recreation.

Rest.

delighting in the music of pipe and tambourine; in *Rest,* reclining by an inviting pool. Above the window two floating figures support a scroll with the wise saying of Confucius: "Give instruction unto those who cannot procure it for themselves." In the ceiling are names of educators: Froebel, Pestalozzi, Rousseau, Comenius, Ascham, Howe, Gallaudet, Mann, Arnold, Spencer.

Religion.

North Curtain Corridor.

The Muses.—Edward Simmons. *Melpomene,* Muse of Tragedy, has the tragic mask. The genii hold laurel crown and brazier of fire, suggestions which are repeated in the other paintings. *Clio,* Muse of History, whose records are of heroic deeds, has for symbols a wreathed helmet and torch. *Thalia,* Muse of Gaiety, Pastoral Life and Comedy; faun with Pan's pipes;

Clio—History.

Thalia—Gaiety, Pastoral Life and Comedy.

Polyhymnia—Inspired Song, Sacred Music.

Terpsichore—Choral Dance.

Urania—Astronomy.

Calliope—Epic Poetry and Eloquence.

Erato—Love Poetry.

Euterpe—Lyric Poetry, Mistress of Song.

comic mask. *Euterpe,* Muse of Lyric Poetry, the Mistress of Song, has a flute. *Terpsichore,* Muse of the Choral Dance, is striking the cymbals. *Erato,* Muse of Love Poetry, has a garland of white roses; a crouching lioness typifies her universal sway. *Polyhymnia,* Inspired Song and Sacred Music—an open book. *Urania,* Astronomy—mathematical instruments. *Calliope,* Epic Poetry and Eloquence—scroll and peacock feather.

THE MOSAIC MINERVA.
By Elihu Vedder.

Prudence. Courage. Patriotism. Fortitude.

THE VIRTUES.

THE SECOND FLOOR.

Entrance Pavilion—North Corridor.

The Virtues.—Geo. W. Maynard's paintings of floating female figures, in the Pompeiian style, on a vermillion ground, symbolize the Virtues. *Fortitude* is armor-clad, with casque, cuirass and greaves, buckler and mace. *Justice* supports a globe, and holds a drawn sword. *Industry's* emblems are the spindle, distaff and flax. *Concordia*, with olive branch, pours from a cornucopia grains of wheat symbolic of the prosperity of peace. (See South Corridor.)

Wisdom, Understanding, Knowledge, Philosophy.—By Robert Reid. *Wisdom* holds a tablet. *Understanding* has a scroll. *Knowledge* holds a book.

Wisdom. Understanding. Knowledge. Philosophy.

Philosophy's attitude is of reflection and meditation; in the background is a Greek temple, the ancient home of philosophy.

The Senses.—By Robert Reid. In the ceiling the *Senses* are idealized as beautiful young women. *Taste* is sipping from a shell; the accessories are bunches of grapes. *Sight* contemplates herself in a hand glass; she is attended by a peacock, pleasing to look upon. *Smell* inhales the fragrance of a full-blown rose, plucked from a bank of flowers by her side. *Hearing* presses

Temperance. Justice. Concordia. Industry.

THE VIRTUES.

to her ear a shell which murmurs of the sea. *Touch* looks with delight upon a butterfly which has alighted on her arm; by her lies a dog.

Ancient Games are shown in small ceiling panels, suggestive of the relaxation and recreation which must lighten labor and study—Throwing the Discus, Wrestling, Running, the Finish, the Wreath of Victory, the Triumph.

Printers' Marks, the distinctive emblematic devices, answering to trade-marks, used by printers and publishers on the title-pages of their books, are employed as motives in all the entrance pavilion corridors of this floor. There are fifty-six in all, the earliest being that of Fust and Schöffer, 1457. The marks in this corridor are of American and British publishers; the supporting figures are griffins and swans. The trophy medallions are filled with symbols

Taste. Hearing. Smell. Touch. Sight.

THE SENSES.

of sciences and industries—Geometry, Meteorology, Forestry, Navigation, Mechanics, Transportation.

Sibyls.—The sculptures in the vault, above the west window, by R. H. Perry, represent the *Sibyls,* or ancient prophetesses, who interpreted omens, delivered oracles, and foretold the future. The Sibyls here portrayed are the Greek and the Eastern or Persian. In a corresponding position in the south corridor are the Roman and Scandinavian. In the border of the arch above this window is in obverse and reverse the *Great Seal* of the United States. Over the east window is the *Western Hemisphere.*

Entrance Pavilion—East Corridor.

Literature.—In the ceiling George R. Barse, Jr., has painted a series of female figures personifying the departments of Literature. *Lyrica* (Lyric Poetry) with lyre, *Tragedy* with tragic mask, *Comedy* with laughing mask and tambourine, *History* with palm branch, scroll, and scroll-box, *Romance* with pen, scroll and wreath, *Fancy* musing as in a day dream, *Tradition* with a Niké or Winged Victory, *Erotica* (Love Poetry) with tablet and pen.

The Fates.—In ceiling panels W. A. Mackay has taken for his theme the Thread of Life as spun by the Three Fates fabled by the ancients to preside over the life of man and control his destiny—Clotho, who spins the thread, Lachesis, who twists it, and Atropos, who cuts it. *Clotho* is here with her distaff. The child is just ushered into life. There is a twig of a tree. The legend runs: "For a web begun, God sends thread." In the second panel is *Lachesis,* with her loom. The child has become a mature man, the tree is in full bearing, and from its boughs the man has plucked a measure of fruit. The legend reads: "The web of life is of a mingled yarn, good and ill together." Lastly is seen *Atropos,* with her shears; and before her the decrepit old man on crutches is sinking to the ground, his face turned to the setting sun. The tree is withered and bare. The inscription is from Milton's "Lycidas."

> And slits the thin-spun life.
> Comes the blind Fury with th' abhorred shears

The inscriptions below the three panels give this adaptation of Cardinal Wolsey's similitude of the life of man to that of the tree:

> This is the state of man. To day he puts forth
> The tender leaves of hopes; to-morrow blossoms,
> And bears his blushing honors thick upon him.
> The third day comes a frost and nips his root, and then he falls.

The Printers' Marks are Italian and Spanish. *The Commemorative Tablets,* at the end of the corridor, bear the names of American printers, type founders and press builders: Green, Daye, Franklin, Thomas, Bradford, Clymer, Adams, Gordon, Hoe, Bruce.

L'Allegro, Il Penseroso.—Paintings on the Wall, by W. B. Van Ingen, are idealizations of Milton's L'Allegro and Il Penseroso. *L'Allegro,* or Mirth, a fair-haired, blue-eyed woman, reclines amid the flowers and sunshine of a summer's day, attended by playful children. Milton's invocation is given:

> Come thou goddess fair and free,
> In Heaven ycleped Euphrosyne,
> And by men, heart-easing Mirth.
> Haste thee, nymph, and bring with thee
> Jest and youthful jollity,
>
> Quips, and cranks, and wanton wiles,
> Nods and becks, and wreathéd smiles,
> Such as hang on Hebe's cheek,
> And love to live in dimple sleek.

Il Penseroso, or Melancholy, is pictured as a dark-eyed, dark-haired woman, in pensive reverie, in an autumnal wood; and the poem is quoted:

> Hail, thou goddess, sage and holy,
> Hail divinest Melancholy,
> Come, but keep thy wonted state,
> With even step and musing gait,
>
> And looks commercing with the skies,
> Thy rapt soul sitting in thine eyes:
> There, held in holy passion still,
> Forget thyself to marble.

The marble arches and domes are elaborately carved, and have a wealth of symbolic decorations. Trophy medallions in the six domes represent: The

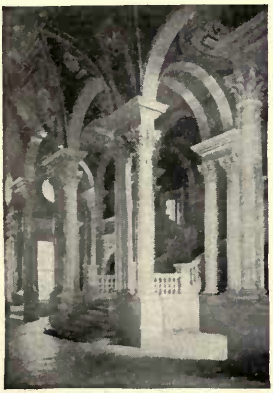
Il Penseroso.

L'Allegro.

Drama (masks), Music (lyre), Sculpture (carved figure), Literature (lamp and book), Architecture (a column capital), Painting (palette and brush). Architecture is represented by the names in gold. Roman and the Colosseum, Agra (India) and the Taj Mahal, Athens and the Parthenon, Gizeh and the Pyramids. For Sculpture are named the Farnese Bull, Laocoön, Niobe, Parthenon Pediment; Venus, Apollo, Zeus, Hercules.

Stairway to Reading Room Rotunda.

Minerva.—By Elihu Vedder. From the east corridor a stairway ascends to the balcony of the reading room; on the wall of the landing is Elihu Vedder's mosaic of *Minerva,* the Goddess of Wisdom. She displays a scroll upon which is inscribed a list of the Sciences, Arts and Letters. She carries her spear; upon her breast is the ægis, with its Gorgon's head, plates of steel, and border of twisted serpents; and at her feet lie helmet and shield. On her right is the owl; on her left a statuette of Niké, the Winged Victory of the Greeks, standing upon a globe, and extending the wreath of victory and the palm branch of peace. The background shows a fair stretching landscape, and the sun of prosperity sheds its effulgence over all. The enrollment on the scroll reads: Agricultural, Education, Mechanics, Commerce, Government, History, Astronomy, Geography, Statistics, Economics, Sculpture, Architecture, Music, Poetry, Biography, Geology, Botany, Medicine, Philosophy, Law, Politics, Arbitration, Treaties, Army, Navy, Finance, Art of War.



Stairway to Rotunda.

Entrance Pavilion—South Corridor.

The Virtues.—By Geo. W. Maynard. *Patriotism* supports on her arm the American eagle, which she is feeding from a golden bowl. *Courage,* wearing a casque, is equipped with sword and buckler. *Temperance* pours water from a pitcher. *Prudence* has for symbols the mirror and the serpent.

The Seasons. By F. W. Benson.

The Seasons.—By F. W. Benson. The Seasons are personified by female figures, with varying landscape and development of vegetation. *Spring* with a bud, *Summer* with a lapful of full blown blossoms, *Autumn* with flying draperies, and the falling leaf; *Winter* in a landscape cold and bleak.

The Graces.—F. W. Benson in ceiling panels celebrates The Graces, the ancient goddesses of whatever is lovely in nature, human life and art. *Aglaia*, patroness of pastoral life and husbandry, with shepherdess crook, sits on a bank of flowers, and blossoms are in her hair. *Thalia*, patroness of the arts, is seated upon a marble bench, by her side is a lyre for Music, in the background a Greek temple for Architecture. *Euphrosyne*, patroness of human loveliness of person and mind, contemplates in a mirror her own fair face.

The Printers' Marks are French; their supporting figures are wood nymphs, fauns, tritons and mermaids, with Pan's pipes, conch shells and dolphins. *The Trophy Medallions* of the ceiling contain symbols of trades and industries: Printer, Potter, Glass Maker, Carpenter, Blacksmith, Mason. Two panels illustrate the modern Baseball and Football.

Sibyls.—Above the west window are sculptures by Perry, of the *Roman Sibyl*, pictured as an aged crone, who from beneath her veil delivers the oracle to a warrior clad in mail; and the *Northern Sibyl* clad in fur robes, a Norse warrior attends her utterance. Above the windows are the *Caduceus* and the *Mace*, ensigns of authority, and a medallion map of the *Eastern Hemisphere*.

Entrance Pavilion—West Corridor.

The Sciences.—Walter Shirlaw's ceiling paintings comprise a series of female figures ideal of the Sciences. *Zoology* clad in skins of wild beasts caresses a lion. *Physics* holds the torch of investigation. *Mathematics* has a scroll on which geometrical lines are drawn, and her foot rests upon a block of geo-

Aglaia. Euphrosyne. Thalia.

THE GRACES.

The Sciences.

metrical solids. *Geology,* with a globe, mineral, fossil shell; the earth and the moon are shown. *Archæology,* with Minerva's helmet, a marble scroll and Zuñi vase, is seeking to decipher the record contained in an ancient book. *Botany,* standing upon the pad of a water lily, analyzes its blossom. *Astronomy,* with feet planted upon the earth, holds a telescopic lens and the sphere of Saturn with its rings. The moon is shown in its crescent phase. *Chemistry's* symbols are glass retort, hour glass and serpent.

Southwest Gallery.

The Sciences—The Arts.—By Kenyon Cox. In the Sciences Astronomy in the center measures a celestial sphere; the other figures are Botany, in dress of green and gold; Zoology, toying with a peacock; Mathematics, with a numeral frame on which the heads count the year 1896. In the Arts Poetry, laurel-crowned, sings to the lyre; the other figures are Sculpture and Painting, Architecture and Music.

Above the doors and windows are inscribed names eminent in science and art, running in this order from the north entrance: Homer, Michael Angelo, Raphael, Rubens, Milton, Leibnitz, Dalton, Kepler, Herschel, Galileo, Aristotle, Ptolemy, Hipparchus, Lamarck, Helmholtz, Phidias, Vitruvius, Bramante, Mozart, Wagner.

The ceiling medallions by W. B. Van Ingen are female figures typifying *Painting* (at work at the easel), *Architecture* (drawing a plan of a building), and *Sculpture* (chiseling a bust of Washington). *The Printers' Marks* are of German craftsmen. Tablets record names distinguished in the sciences: Cuvier for Zoology, Rumford for Physics, LaGrange for Mathematics, Lyell for Geology, Schliemann for Archæology, Linnæus for Botany, Copernicus for Astronomy, Lavoisier for Chemistry.

The Arts.

Southwest Pavilion.

The Discovery and Settlement of America are the themes of Geo. W. Maynard's decorations. The four wall paintings are allegories of Adventure, Discovery, Conquest and Civilization.

Adventure, clad in armor of gold and purple robes, holds a drawn sword and the Caduceus, or Mercury's magic wand. On her right is the genius of the England of Drake's time; on her left that of the Spain of the sixteenth century. *Discovery* wears the sailor's buff jerkin of the sixteenth century. She supports with one hand a rudder, and with the other, upon her lap, a globe charted with the map ascribed to Leonardo da Vinci (about 1500), the first one known to show America. The genius on her right has a chart and a paddle; the one on her left a sword and a back-staff, which, like the astrolabe shown in the supporting shields, was a primitive quadrant. *Conquest* firmly grasps her sword, while her genii display emblems of victory; one has the palm, typical of Spanish achievement in the South; the other the oak, suggesting England's acquisitions in the North. *Civilization's* emblems are the torch and the open book; those of one genius, a scythe and a sheaf of wheat; of the other, a distaff and spindle. In the ceiling Mr. Maynard has pictured Courage, Valor, Fortitude and Achievement, idealized in woman's form. *Courage,* clad in scale-armor and a lion's pelt, is equipped with shield and studded war club. *Valor,* wearing mail, holds a drawn sword. *Fortitude,* with flowing robes, carries the ornamental column which is the emblem of sustaining strength. *Achievement,* in Roman armor, points to the eagle of ancient Rome as the symbol of victory.

The Seasons.—In sculpture reliefs, by Bela L. Pratt, the Seasons are symbolized as female figures: *Spring,* as a young woman sowing grain;

The Seasons. Sculptures by Bela L. Pratt.

Summer, seated amid flowers; *Autumn,* a mother nursing her babe, while a boy stands near her with bunches of grapes; *Winter,* an aged woman gathering fagots; an owl is perched on the withered tree. The series is repeated in the other pavilions.

Southeast Pavilion—Second Floor.

The Four Elements are symbolized in the wall and ceiling paintings by R. L. Dodge and E. E. Garnsey. In each panel a central figure as the personification of the Element supports emblematic garlands, the other ends of which are held by genii in the corners. Reclining figures are accompanied with symbols; and other symbols are seen on the standards and in the borders.

The Sun, as the chariot of Phœbus-Apollo, is the central decoration of the ceiling; and surrounding it, in order corresponding with the wall panels, are further symbolizations of the Elements.

Northwest Gallery.

War and Peace.—By Gari Melchers. *War* represents the return from battle. The dogs of war strain at the leash; then, foot soldiers with spear and buckler; the King on his white horse, riding over the prostrate bodies of the slain; the color-bearer and herald proclaiming victory, and the wounded car-

War.

ried on litters or attended by nurses in the rear. In *Peace,* the scene is a procession of worshippers who have come to make their votive offering at the shrine of the deity. The effigy of the goddess is borne in state; an ox is led as the chief offering. In the company come a mother to pray in behalf

Peace.

of her child, the sick to ask health, a poet to offer his laurel wreath, and a sailor lad with a ship's model in token of gratitude for succor at sea.

The Names on the walls are: Wellington, Washington, Charles Martel, Cyrus, Alexander, Hannibal, Cæsar, Charlemagne, Napoleon, Jackson, Sheridan, Grant, Sherman, William the Conqueror, Frederick the Great, Eugene, Marlborough, Nelson, Scott, Farragut.

Northwest Pavilion.

Art, Literature, Music and Science.—By W. L. Dodge. In *Art* a student is drawing from a model, while a sculptor is seen chiseling a sphinx, and a woman decorating a vase. *Literature* has for its leading personage the Genius of Wisdom holding an open book, with Tragedy and Comedy, a poet about to be crowned by Fame, and a mother instructing her children. In *Music,* Apollo is accompanied by other musicians. In *Science* Electricity, with phono-

graph and telephone, kneels to receive from winged Fame the laurel wreath of renown; Franklin's kite is seen on the ground. Steam Navigation is represented by an inventor holding a model of a propeller; Agriculture by a farmer binding grain; Medical Science by anatomists examining a skull; Chemistry by a retort, and the application of Steam Power by a tea-kettle with the steam escaping from the spout. In the ceiling is an allegory of *Ambition* by the same artist. Various aspirants having attained the utmost verge of human endeavor, with eager gaze and arms outstretched, reach toward Glory, floating far above them, bearing a wreath, and attended by her winged horse Pegasus and trumpeting Fame.

Northeast Pavilion.

The Seals of the United States and the Executive Departments are the motives of the decorations by W. B. Van Ingen and E. E. Garnsey Wreathed panels contain patriotic sentiments; female figures idealize the Departments whose seals they support emblazoned on shields.

Treasury and State.—For one is shown the familiar Treasury building; for the other the Capitol Dome and the Washington Monument.

'Tis our true policy to steer clear of permanent alliance with any portion of the foreign world.—WASHINGTON. Let our object be our country, our whole country, and nothing but our country.—Thank God! I also am an American—WEBSTER.

War and Navy.—The genii supporting the seals are equipped with Army and Navy swords; for the Army are the Roman standard (modified to show the initials U. S. A.) and the Bunker Hill Monument; for the Navy the masts of the battleship Indiana and Decatur's rostral column at Annapolis.

The aggregate happiness of society is, our ought to be, the end of all government.—To be prepared for war is one of the most effectual means of preserving peace.—WASHINGTON.

Agriculture and Interior.—For Agriculture the background is of a farming country, in that of the Interior is represented the Indian's tree sepulture.

The agricultural interest of the country is connected with every other, and superior in importance to them all.—JACKSON. Let us have peace.—GRANT.

Justice and the Post Office.—The symbols are the Scales of Justice, and a bronze statue of Mercury the messenger of the gods.

Equal and exact justice to all men, of whatever state or persuasion, religious or political; peace, commerce, and honest friendship with all nations—entangling alliances with none.—JEFFERSON.

The Great Seal of the United States in the ceiling is surrounded by a decoration comprising the forty-eight stars of the flag; the cardinal winds, North, East, South and West, represented by blowing faces, and symbolical of the geographical divisions of the Union; fruits and grains as typical products of each section of the country; and the cornucopia of Agriculture, dolphin of Commerce, lyre of Art, and torch of Education. Encircling the whole is the conclusion of Lincoln's Gettysburg Address (see the Arlington chapter):

That this nation, under God, shall have a new birth of freedom; and that government of the people, by the people, for the people, shall not perish from the earth.

The Reading Room.

The Reading Room.—Ascending the stairway from the East Corridor we enter the Visitors' Gallery, where an excellent view is afforded of the Rotunda or central Reading Room. The vast apartment is imposing in size and effective in architectural design and color scheme of marble walls and pillars and tiers of arches and balustrades, and the uplifted dome with its elaborate stucco ornamentation. The room is 100-ft. in diameter and 125-ft. in height; the pillars are 40-ft. high, the windows 32-ft. wide. The richness of the color effect lies in the marbles, of which the dark are from Tennessee, the red from Numidia, and the shades of yellow from Siena. The stucco ornaments of the dome are in old ivory, and comprise a great variety of designs—among them Martiny's female figures supporting cartouches; Weinert's winged half-figures; winged boys with wreaths and garlands, torches, lamps, swans, eagles, dolphins and arabesques.

The Symbolical Statues.—Upon the eight piers are female figures of colossal stature. Above each is a quotation chosen by President Eliot, of Harvard:

Religion, by Baur, holding a flower.

What doth the Lord require of thee, but to do justly, to love mercy, and to walk humbly with thy God?—*Micah* vi: 8.

Commerce, by Flanagan, holding miniature locomotive and ship:

We taste the spices of Arabia, yet never feel the scorching sun which brings them forth. —*Considerations on East India Trade.*

History, by French, with book and reflecting mirror:

One God, one law, one element,
And one far-off divine event,
To which the whole creation moves.—*Tennyson.*

Art, by St. Gaudens and Dozzi, laurel-crowned, with a model of the Parthenon for architecture, a brush and palette for painting, and a mallet for sculpture:

As one lamp lights another, nor grows less,
So nobleness enkindleth nobleness.—*Lowell.*

Philosophy, by Pratt, with book:

The inquiry, knowledge, and belief of truth is the sovereign good of human nature. —*Bacon.*

Poetry, by Ward, with scroll:

Hither, as to their fountain, other stars
Repairing, in their golden urns draw light.—*Milton.*

Law, by Bartlett, with the stone table of the laws and a scroll:

Of law there can be no less acknowledged than that her voice is the harmony of the world.—*Hooker.*

Science, by Donoghue, with a globe and triangle and mirror:

The heavens declare the glory of God; and the firmament showeth his handiwork, *Psalms* xix: 1.

Bronze Statues.—Looking down from the railing of the gallery under the dome, stand sixteen bronze statues of characters distinguished in the several fields of learning and achievement represented by the symbolical statues:

RELIGION—*Moses* (by Niehaus) and *St. Paul* (by Donoghue). Moses is represented as the great law-giver, with the Tables of the Law delivered on Sinai. St. Paul has sword and scroll.

COMMERCE—*Columbus* (by Bartlett) and *Fulton* (by Potter). Fulton holds a model of his first steamboat, the "Clermont."

HISTORY—*Herodotus,* the "Father of History" (by French), and *Gibbon,* historian of the "Decline and Fall of the Roman Empire" (by Niehaus).

ART—*Michael Angelo* (by Bartlett) and *Beethoven* (by Bauer).

PHILOSOPHY—*Plato* and *Bacon* (both by Boyle).

POETRY—*Homer* (by St. Gaudens) and *Shakespeare* (by Macmonnies).

LAW—*Solon* (by Ruckstuhl) and *Kent* (by Bissell). Solon, the Athenian law-giver, holds out the scroll of "The Laws" (*Oi Nomoi*), and supports a reversed sword twined with olive. James Kent is represented as holding the manuscript of his celebrated "Commentaries on American Law."

SCIENCE—*Newton* (by Dallin) and *Henry* (by Adams). Prof. Joseph Henry holds an electro-magnet, suggesting his work in electro-magnetism.

The Progress of Civilization, by E. H. Blashfield, in the Collar of the Dome, which is 150 feet in circumference, is a symbolism of the twelve nations and epochs which have contributed to the world's advance. Each is represented as a seated figure, winged, and bearing emblems suggestive of its peculiar attribute:

EGYPT (*Written Records*) holds a tablet of hieroglyphics, and the Egyptian taucross emblem of immortality. On the throne is the cartouche of Mena, the first king of Egypt. At the feet of the figure is a case of papyrus scrolls.

JUDEA (*Religion*) wears the vestments of the Jewish High Priest. The emblems are scroll and censer. The stone tablet bears the Hebrew text, Leviticus xix: 18: "Thou shalt love thy neighbor as thyself."

GREECE (*Philosophy*) is a classic figure wearing a diadem; the symbols are scroll and bronze lamp.

ROME (*Administration*) is pictured as a Roman centurion in armor; the emblems are the sword, the fasces and baton of authority, and the marble column.

ISLAM (*Physics*) costumed as an Arabian, has as emblems glass retort and book of mathematics.

MIDDLE AGES (*Modern Languages*) is accompanied by the emblematic accessories of casque and sword typifying the Age of Chivalry, Gothic cathedral for architectural development, and papal tiara and keys of St. Peter for the part of the Church. The face is a characterization from Mary Anderson's.

ITALY (*Fine Arts*) has brush and palette for painting, satuette of Michael Angelo's David for sculpture, violin for music, capital for architecture.

GERMANY (*Art of Printing*) is represented as an early printer, in fifteenth century garb, reading a proofsheet from the primitive hand press. The face is a characterization from that of Gen. Thomas Lincoln Casey.

SPAIN (*Discovery*) appears as a navigator, in sailor's leather jerkin, hand on tiller and sword in lap; by his side a globe, at his feet model of a caravel.

ENGLAND (*Literature*), laurel-crowned and in Elizabethan costume, holds Shakespeare's plays, showing facsimile of the title page of "A Midsummer Night's Dream," 1600. The face is a characterization of Ellen Terry's.

FRANCE (*Emancipation*) is the animated figure of a woman wearing liberty cap and tri-color jacket, and equipped with sword, drum and trumpet. She

is seated upon a cannon, and holds out the "Declaration des Droits de l'Homme" of 1798. The features are of the artist's wife.

AMERICA (*Science*).—The scientific genius of our own country is typified by an electrical engineer, with book and dynamo. The face is a characterization from that of Abraham Lincoln.

The Human Understanding.—In the Crown of the Lantern, Mr. Blashfield has painted The Human Understanding, in the allegorical figure of a woman floating among clouds, and attended by two children genii. With uplifted gaze she is looking from finite human achievement, as indicated in the fresco of Civilization below, to the infinite, which is beyond. One of the genii holds a closed book, the other beckons those below.

The Windows.—The stained-glass decoration of the great arched windows, by H. T. Schladermundt, is a composition of the arms of the Union and of the States, alternating with torches and wreathed fasces. With each State is given the date of its ratification of the Constitution, admission into the Union, or Territorial organization; the series begins with Delaware.

The Clock over the entrance, by John Flanagan, is of marble and bronze; the details are Signs of the Zodiac, flight of Time, Seasons, Day and Night.

The Library was founded in 1800, Congress appropriating for it $5,000. It has twice suffered by fire—in 1814, when the Capitol was burned, and in 1851. Special collections acquired have been Thomas Jefferson's Library, the Force Historical Collection in 1865, Smithsonian Library in 1867, Toner Collection of Washingtoniana in 1882. A prolific source of accessions has been the copyright system, which requires the deposit here of two copies of every copyrighted work. The library contains more than 1,000,000 books.

Any one may use the Library, but books may be drawn out only by members of Congress, the President, Supreme Court, and Government officials.

The Book Stacks devised by Mr. Bernard R. Green consist of a series of cast-iron frameworks supporting tiers of shelves, and rising in nine stories to the roof. Each of the two large stacks has a capacity of 800,000 volumes; the smaller stack 100,000 books. The book shelving now in the building amounts to 231,680 running feet, or about forty-four miles, which will accommodate 2,085,120 volumes of books, reckoning nine to the foot. The capacity of the additional shelving, which may be placed, is about 2,500,000 volumes, and the ultimate capacity of the building for books is therefore upward of 4,500,000 volumes, or somewhat less than one hundred miles of shelving. An ingenious mechanism delivers books from the stacks to the Reading Room. From the Reading Room an endless cable runs down to the basement and up through the stack to the top, and back again. To it are attached book carriers. When a book is called for at the desk, the slip is sent by pneumatic tube to the clerk in the book stack; he puts the book into a receptacle, from which it is taken automatically by the book carrier and carried to the Reading Room, the whole process consuming but a few minutes. In like manner the books are returned. For the convenience of Congress, books are sent directly from the Reading Room to the Capitol through a tunnel.

The Library Quotations

The Poets, who on earth have made us heirs
Of truth and pure delight by heavenly lays.—WORDSWORTH.

Art is long and Time is fleeting.—LONGFELLOW.

The history of the world is the biography of great men.—CARLYLE.

Order is Heaven's first law.—POPE.

Memory is the treasurer and guardian of all things.—CICERO.

Beauty is the creator of the universe.—EMERSON.

This is the state of man: To-day he puts forth
The tender leaves of hopes; to-morrow blossoms,
And bears his blushing honors thick upon him.
The third day comes a frost and nips his root, and then he falls.
—KING HENRY VIII. (*Adapted*).

Beholding the bright countenance of Truth in the quiet and still air of delightful studies.—MILTON.

The true University of these days is a Collection of Books.—CARLYLE.

Nature is the art of God.—Sir THOMAS BROWNE.

There is no work of genius which has not been the delight of mankind.—LOWELL.

It is the mind that makes the man, and our vigor is in our immortal soul.—OVID.

They are never alone that are accompanied with noble thoughts.—Sir PHILIP SIDNEY.

Man is one world, and hath another to attend him.—HERBERT.

Tongues in trees, books in the running brooks,
Sermons in stones, and good in everything.—AS YOU LIKE IT.

Books will speak plain when counsellors blanch.—BACON.

Glory is acquired by virtue but preserved by letters.—PETRARCH.

The foundation of every state is the education of its youth.—DIONYSIUS.

The light shineth in darkness, and the darkness comprehendeth it not.
—ST. JOHN i: 5.

In the Librarian's Room.

Litera scripta manet—The written letter remains (Literature endures). *In tenebris lux*—Light in darkness. *Liber delectatio animæ*—A book is the delight of the mind. *Efficiunt clarum studio*—They make clear by study. *Dulce ante omnia Musæ*—The sweetness of the Muse before all else.

The Greek Heroes.

One equal temper of heroic hearts,
Made weak by time and fate, but strong in will
To strive, to seek, to find, and not to yield.—TENNYSON, *Ulysses.*

A glorious company, the flower of men
To serve as model for the mighty world,
And be the fair beginning of a time.—TENNYSON, *Guinevere.*

To the souls of fire, I, Pallas Athena, give more fire; and to those who are manful, a might more than man's.—KINGSLEY.

Ancient of days! august Athena!
Where are thy men of might? thy grand in soul?
Gone—glimmering through the dream of things that were.
—BYRON, *Childe Harold.*

The Library Quotations

The chief glory of every people arises from its authors.—Dr. Johnson.

Knowledge comes, but wisdom lingers.—Tennyson.

Wisdom is the principal thing; therefore get wisdom; and with all thy getting get understanding.—Proverbs iv: 7.

Ignorance is the curse of God,
Knowledge the wing wherewith we fly to Heaven.—2 Henry VI.

How charming is divine Philosophy.—Milton.

Books must follow sciences and not sciences books.—Bacon.

In books lies the soul of the whole past time.—Carlyle.

Words are also actions and actions are a kind of words.—Emerson.

Dwells within the soul of every Artist
More than all his effort can express.

No great Thinker ever lived and taught you
All the wonder that his soul received.

No true Painter ever set on canvas
All the glorious vision he conceived.

No Musician,
But be sure he heard, and strove to render,
Feeble echoes of celestial strains.

No real Poet ever wove in numbers
All his dream.

Love and Art united
Are twin mysteries, different, yet the same.

Love may strive, but vain is the endeavor
All its boundless riches to unfold.

Art and Love speak; but their words must be
Like sighings of illimitable forests.

—Adelaide Proctor, *Unexpressed.*

There is but one temple in the universe, and that is the body of man.—Novalis.

The first creature of God was the light of sense; the last was the light of reason.
—Bacon.

The true Shekinah is man.—Chrysostom.

Only the actions of the just
Smell sweet and blossom in the dust.—James Shirley.

Science is organized knowledge.—Herbert Spencer.

Beauty is truth, truth beauty.—Keats.

Too low they build who build beneath the stars.—Young.

Man raises but time weighs.—Greek Proverb.

Beneath the rule of men entirely great
The pen is mightier than the sword.—Bulwer Lytton.

The noblest motive is the public good.—Virgil.

A little learning is a dangerous thing;
Drink deep, or taste not the Pierian spring.—Pope.

Learning is but an adjunct to ourself.—Love's Labour's Lost.

Studies perfect nature, and are perfected by experience.—Bacon.

Dreams, books, are each a world; and books, we know,
Are a substantial world, both pure and good.—Wordsworth.

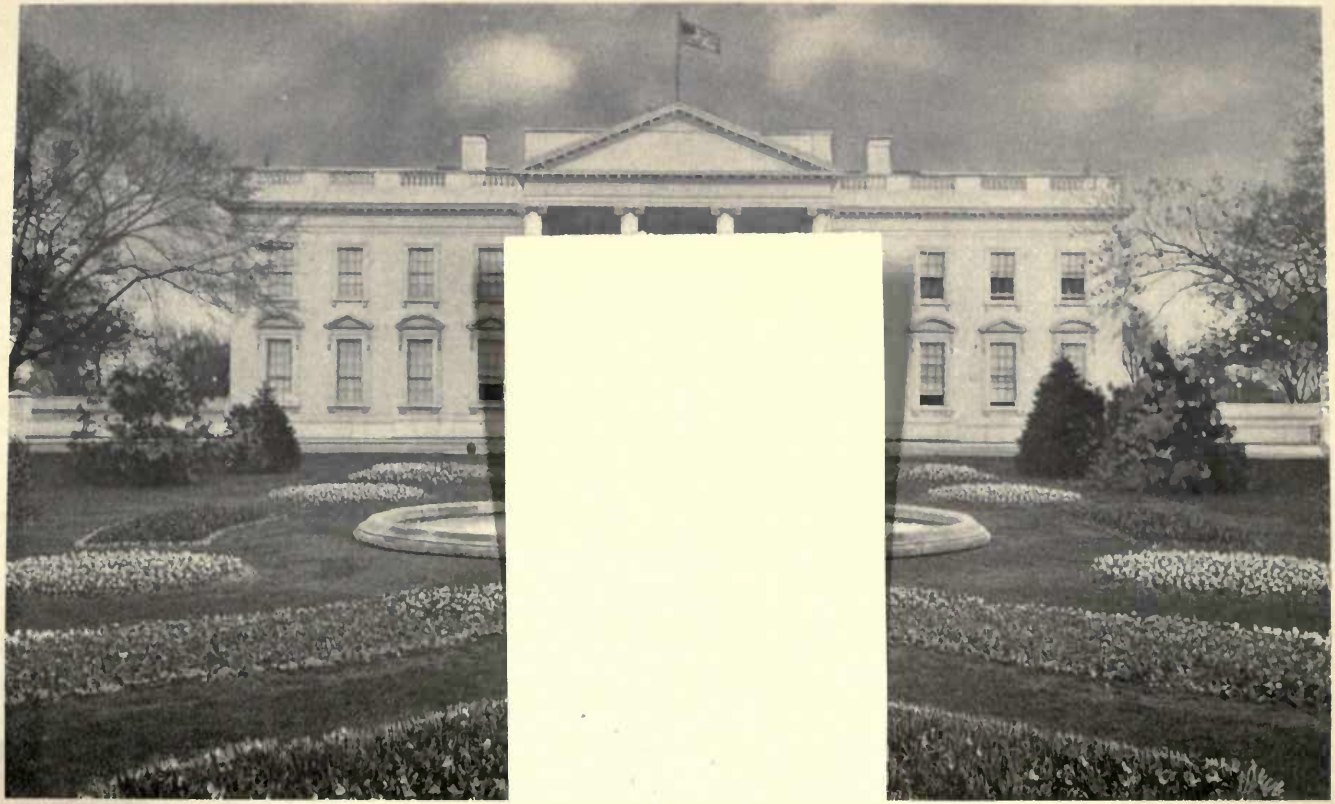
With the Muses.

Descend, ye Nine, descend and sing;
Wake into voice each silent string.

Oh, Heaven-born sisters, source of art,
Who charm the sense or mend the heart.

Say, will you bless the bleak Atlantic shore,
And in the West bid Athens rise once more!

—Pope (*Adapted*).



THE WHITE HOUSE.

THE WHITE HOUSE is on Pennsylvania avenue at 16th street, and is reached by Pennsylvania avenue cars. For hours to visit see the Time Table

THE prevailing characteristic of the White House is a stately simplicity. Whether from Pennsylvania avenue one sees the columns of the portico but partially revealed through the foliage of noble trees, or from the lawns in the rear catches a glimpse of the southern balcony with colonnade and winding stairways embowered in vines, the air is one of dignity and repose. In situation, in character and in surroundings, one reflects, the White House is becoming as the home of the President.

History

The White House is constructed of Virginia freestone; it is 170-ft. in length, 86-ft. in depth, and consists of a rustic basement, two stories and an attic, the whole surmounted by an ornamental balustrade. The north front has a portico of lofty Ionic columns, forming a porte-cochere, and the south a colonnaded balcony.

It was the first public building erected at the new seat of government. The architect was James Hoban, who drew his plans closely after those of the seat of the Dukes of Leinster, near Dublin. Washington himself selected the site, laid the corner stone (Oct. 13, 1792), and lived to see the building completed; it is told that in company with his wife he walked through the rooms but a few days before his death, in 1799. John Adams was the first occupant, in 1800. In 1814, in John Quincy Adams' term, the house was fired by the marauding British troops, and only the walls were left standing. With the restoration, the stone was painted white to obliterate the marks of the fire, and outside of official usage it is as the White House that the Executive Mansion is universally known.

Alterations and additions to the building were made in 1902-3. The conservatory, so long a familiar feature of the west side, has given place to an esplanade leading to the new Executive Office; and the public entrance is now through a colonnade on the east. This leads to the basement corridor, on the walls of which are hung portraits of the mistresses of the White House, including those of Angelica Singleton Van Buren, who was mistress of the White House during President Van Buren's term; Mrs. Tyler, Mrs. Polk (presented by the ladies of Tennessee in President Arthur's administration); Mrs. Hayes (by Huntington), presented by the Woman's National Temperance Union, in recognition of the cold water regime of the White House during President Hayes' term, and Mrs. Harrison (by Huntington), presented by the Daughters of the American Revolution, and Mrs. Roosevelt by Chartran. Broad stairways lead up to the main corridor, from which access is had to the East Room, and the Blue, Green and Red Rooms, which take name from the predominating color of the decorations and furnishings.

THE EAST ROOM, or State parlor, used for receptions, is a magnificent apartment 40-ft. wide, 82-ft. in length, and with a ceiling 22-ft. high, from

THE EXECUTIVE OFFICES.

East Room which depend three massive crystal chandeliers. The four carved mantels are surmounted by mirrors. The decorations of walls and ceiling are in white and gold, with moldings and tablet ornamentation in relief, and window draperies of old gold. The two royal blue Sevres vases were presented to President McKinley by the President of the French Republic in commemoration of the laying of the French-American cable. The crystal chandeliers formerly here, with others from the White House, are now hung in the Capitol.

Blue Room The Blue Room, oval in shape, is the President's reception room. The walls are covered with rich blue corded silk, and the window hangings are blue with golden stars in the upper folds. On the mantel is the clock of gold presented by Napoleon I. to Lafayette and by him to Washington;

THE STATE DINING ROOM.

on either side stand the bronze vases presented to Washington at the same time; and there are here also the two triple gold plate candelabra which were given to President Jackson by General Patterson, of Philadelphia.

Green Room

THE GREEN ROOM has on the wall green velvet with white enamel wainscoting. In front of the white marble mantel is a screen of old Gobelin tapestry in a frame of gold, surmounted by a spread eagle. The screen was presented to Mrs. Grant by the Emperor of Austria. The gilt clock and the two gilt vases were purchased by Mrs. Grant in Paris and were by her given to the White House. The two Japanese vases were purchased by President Arthur. The lacquer cabinet was presented by Japan in 1858, when American ships first entered Japanese ports. The portraits are of Presidents John Adams, John Quincy Adams, Jackson, Tyler, W. H. Harrison, Van Buren, Pierce, Buchanan, Lincoln, Hayes.

Red Room

THE RED ROOM walls and window draperies are of red velvet. The two vases were presented to President Pierce by the French Government. A cabinet of mahogany and gold contains seven exquisitely dressed Japanese dolls presented to Mrs. Roosevelt by the Japanese Minister. There are here portraits of Washington, Martha Washington (by Andrews), Presidents Jefferson, Polk and Benjamin Harrison. The portrait of Washington is the one which is sometimes called the "Lansdowne Stuart." The original, of which this is a copy, was painted for the Marquis of Lansdowne. In 1814, when the British were coming to pillage and burn the White House,

THE RED ROOM.

Mrs. Dolly Madison had the portrait taken from its frame and carried it away into safety across the Potomac. The EAST ROOM contains a richly decorated piano which was made at a cost of $15,000 and presented by a New York firm of piano makers.

State Dining Room THE STATE DINING ROOM is paneled in dark English oak, and decorated with heads of American big game. The white marble mantel is surmounted by an old Flemish tapestry depicting a country scene and having in a panel a verse from Virgil in praise of hunting. The massive mahogany table will seat one hundred guests.

President's Room THE PRESIDENT'S ROOM and the CABINET ROOM are in the Executive Office, west of the White House.

THE PRESIDENT IN HIS OFFICE.

Photo copyright, 1903, by Waldon Fawcett.

Surroundings

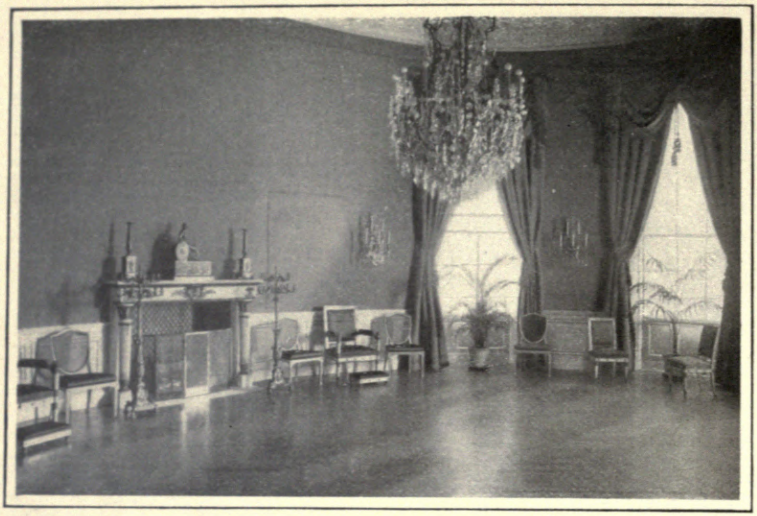
The surroundings of the White House are worthy of note. In front is historic Lafayette Square. On one side is the Treasury; on the other, the State, War and Navy Building. The house is set amid the President's Grounds, with trees and flower beds and fountains and sloping lawns. The grounds merge into the Mall, and stretch away to the Monument and the Potomac. To the slopes south of the house Washington children repair for their Easter egg rolling on Easter Monday, where scores of brilliantly colored eggs are sent rolling and tumbling down the banks. The custom is of European origin, and comes from an earlier one known to the children of the Pharaohs. Concerts, open to the public, are given in the east grounds by the Marine Band on Saturday afternoons, from June to September inclusive.

Lafayette Square

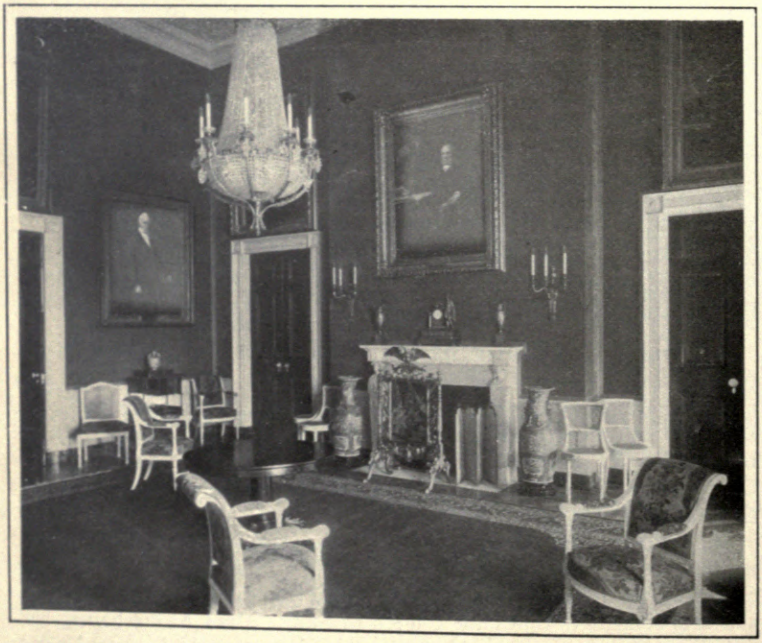
Lafayette Square is beautiful with trees and flowers, and rich in historical associations. At the southeast entrance is the bronze and marble memorial erected by Congress to commemorate the distinguished services of Lafayette and other French officers in the cause of the Colonies. On the northeast is the Rochambeau monument. In the center of the square is Clark Mills's equestrian statue of Gen. Jackson, as the hero of the Battle of New Orleans.

St. John's Church

St. John's Church, on the north of the square, was built in 1816, and next to Christ Church (1795), near the Navy Yard, is the oldest in the city. One of its pews is set apart for the President of the United States, and it is sometimes called the Church of State. Many of the houses surrounding the square possess interesting associations as the homes of public men.



THE BLUE ROOM.



THE GREEN ROOM.

THE CORCORAN GALLERY.

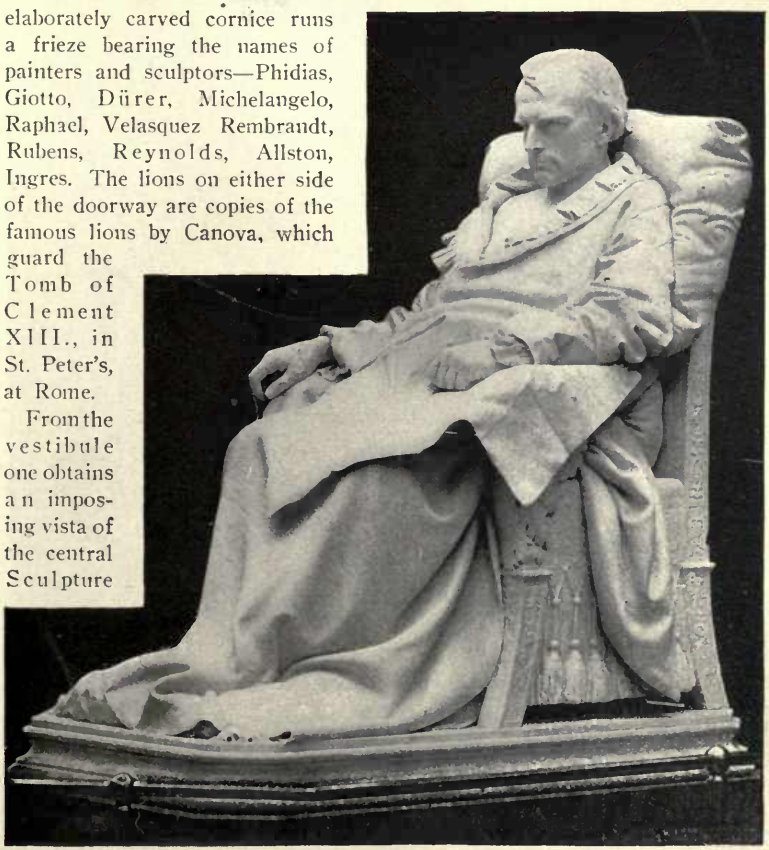
In some years the Gallery is closed during July, August and September.

THE Corcoran Gallery of Art is on Seventeenth street, extending from New York avenue to E street, just southwest of the White House and State Department. On Tuesdays, Thursdays, Saturdays, Sundays and holidays admission is free. On other days a fee of 25 cents is charged. For hours see time table.

The Gallery was founded and endowed by the late William W. Corcoran in 1869, as a gift to the public, "for the perpetual establishment and encouragement of the Fine Arts"; and its collections have grown in extent and value until now the Corcoran is one of the chief places of interest in Washington. It occupies a noble building, of Georgia white marble, above whose entrance is the inscription, chosen by Mr. Corcoran: "Dedicated to Art." Below the elaborately carved cornice runs a frieze bearing the names of painters and sculptors—Phidias, Giotto, Dürer, Michelangelo, Raphael, Velasquez Rembrandt, Rubens, Reynolds, Allston, Ingres. The lions on either side of the doorway are copies of the famous lions by Canova, which guard the Tomb of Clement XIII., in St. Peter's, at Rome.

The Building

From the vestibule one obtains an imposing vista of the central Sculpture



VELA'S NAPOLEON.

Hall and the grand staircase beyond. This central hall, or atrium, is 170x50-ft., with forty fluted columns supporting the ceiling, through which two wells admit the light from the roof skylight high above. The hall is devoted to casts from antique and Renaissance sculpture. Other rooms on this floor contain original marbles, casts, bronzes, and other collections. The grand staircase leads to the second-story atrium, an apartment of magnificent proportions. Thirty fluted columns of white marble support the immense skylight of the roof; the walls are hung with paintings; and the light-wells give an overlook of the Hall of Sculpture below. On the first floor is a semi-circular room for lectures; and the Corcoran School of Art is generously provided with studios and class rooms on the two floors. Information concerning the School may be obtained of the Curator.

Atrium

It would manifestly be impossible to note here even briefly the objects which claim attention. Visitors should provide themselves with the Catalogue (to be had at the door, price 25 cents), in which will be found most valuable and helpful notes. Chief among the casts from ancient sculpture is a series of the marbles of

Ancient Sculpture

VENUS OF MELOS.

Fighting Hero. Discobolos. Poseidippos. The Wrestlers. Menander. Boxer Resting. Meleager.
Galatian and his Wife. Apoxyomenos. HALL OF SCULPTURE. Dying Galation.

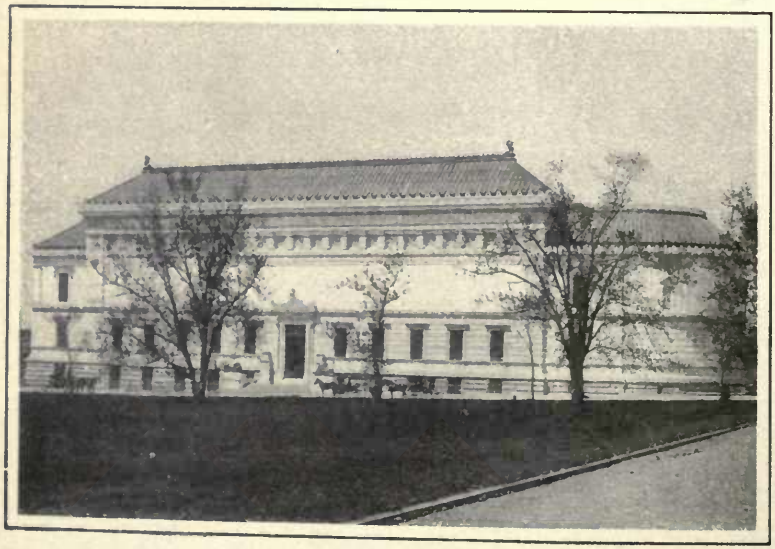
Ancient Sculpture

the Frieze and Pediments of the Parthenon; and first among the single statues is the Venus of Melos. The original was discovered in 1820 by a peasant of the island of Milo (the ancient Melos) while digging near some sepulchral grottoes. "It now stands in the Louvre, the pride of Paris, and the admiration of the world. Its sculptor is unknown, but by the grandeur of its style it is justly assigned to the era between Phidias and Praxiteles [432-392 B. C.], and is considered the greatest statue of woman's form the world now holds." Among other subjects are the Discobolos or Quoit-thrower, Venus de Medici, Minerva, Laocoön, Dying Galatian (commonly called the Dying Gladiator), Apollo Belvidere, Torso of Hercules, Boy Extracting a Thorn from his Foot, Hermes with Infant Dionysos, Galatian and his Wife, Nike from Samothrake, Boxer Resting, Thalassa and Gaia, Ariadne Deserted, Jason. On the walls of the corridors is a fine collection of portrait busts.

Renaissance Sculpture

Among the Renaissance subjects is a cast from the west bronze door of the Baptistery at Florence by Ghiberti, the ten panels containing designs from the Old Testament. Michelangelo said of the Ghiberti Doors that they were worthy of standing as the gates to Paradise. Donatello is represented by his David with the Head of Goliath; Michelangelo by the bust of the colossal statue of David, the mask of the Moses, reduced copies of Day, Night, Dawn and Twilight from the Tomb of the Medici family, the Slaves for the Julius monument, and other examples; Luca della Robbia by the Singing Boys.

Among the marbles, Guarnerio's Forced Prayer never fails to attract



THE CORCORAN GALLERY.

ROSSITER—REBECCA AT THE WELL.

REBOUET—NIGHT.

MULLER—CHARLOTTE CORDAY.

SCHREYER—THE WATERING PLACE.

LE ROUX—THE VESTAL TUCCIA.

PRIOU—A FAMILY OF SATYRS.

TRUESDELL—GOING TO PASTURE.

COROT—WOOD GATHERERS.

KNAUS—THE FORESTER'S HOME.

BRETON—BRETON WIDOW.

VELY—THE TALKING WELL.

VON THOREN—LOST DOGS.

BROOKE—A PASTORAL VISIT.

BIERSTADT—MOUNT CORCORAN.

RENOUF—THE HELPING HAND.

TROYON—GOING TO DRINK.

BECKER—POPE JULIUS II. AND HIS FRIENDS.

CHIERICI—THE MASK, OR FUN AND FRIGHT.

THE GREEK SLAVE.

attention. The most celebrated of the marbles are Vincenzo Velas' Last Days of Napoleon I., and the Greek Slave, by Hiram Powers, of Vermont. An interesting and suggestive note of the development of art in this country is found in the record that when the Greek Slave was first exhibited, in Cincinnati, "a delegation of clergymen was sent to judge whether it were fit to be seen by Christian people. Its purity of sentiment and harmonious form established its right to exist." **Marbles**

The Barye Room contains a series of more than one hundred Barye bronzes, the Corcoran Gallery possessing the largest collection in the world. **Barye**

There are exhibits of Cloisonné, porcelains and glass, and reproductions of antiques.

Of the well-known canvases may be named Rousseau's Farm in the Wood, Detaille's Passing Regiment, Richards' Coast of New Jersey, Church's Niagara Falls. THE STANDARD GUIDE gives miniature key pictures of eighteen of the Corcoran canvases, and it does this both to suggest what the visitor to the gallery should see, and afterward to prompt the recollection of the pictures one has seen. Albert Bierstadt's Mount Corcoran is a peak of the southern Sierra Nevadas, named in compliment to Mr. Corcoran. A portrait of Mr. Corcoran (born 1798, died 1888), by Elliott, is one of an extensive series of portraits of Americans, and representing the works of early American artists. **Paintings** **Standard Guide Key Pictures**

THE WASHINGTON MONUMENT.

"Lay the corner stone of a monument which shall adequately bespeak the gratitude of the whole American people to the illustrious Father of his Country. Build it to the skies; you cannot outreach the loftiness of his principles! Found it upon the massive and eternal rock; you cannot make it more enduring than his fame! Construct it of the peerless Parian marble, you cannot make it purer than his life! Exhaust upon it the rules and principles of ancient and modern art; you cannot make it more proportionate than his character!"—*Winthrop's Oration at the laying of the Corner Stone.*

Situation

The Monument is situated in Washington Park, a part of the Mall near 14th street, 1 1-3 miles from the Capitol. It is reached by Pennsylvania avenue cars, with transfer (2 cents extra fare) at 14th street. A stairway of 900 steps leads to the top. An elevator carrying visitors without charge ascends half-hourly. For hours, see Time Table.

THE WASHINGTON NATIONAL MONUMENT is an imposing shaft of white marble rising from an elevation on the Mall near the Potomac. It is seen towering against the sky long before one reaches Washington; and in the city its tremendous height confronts one at every turn and has place in a thousand vistas. From the avenues and parks, from the Capitol, the White House, the hills of the Soldiers' Home, the heights of Arlington, and from far down the Potomac on the way to Mt. Vernon, go where you will, an ever prominent feature of the landscape is the Monument. Seen at different times of the day it has a new character for each new hour; its appearance changes with the varying lights, and with alternations of clear sky and cloud. In stormy weather it suggests a mountain peak standing immovable with the mists driving by.

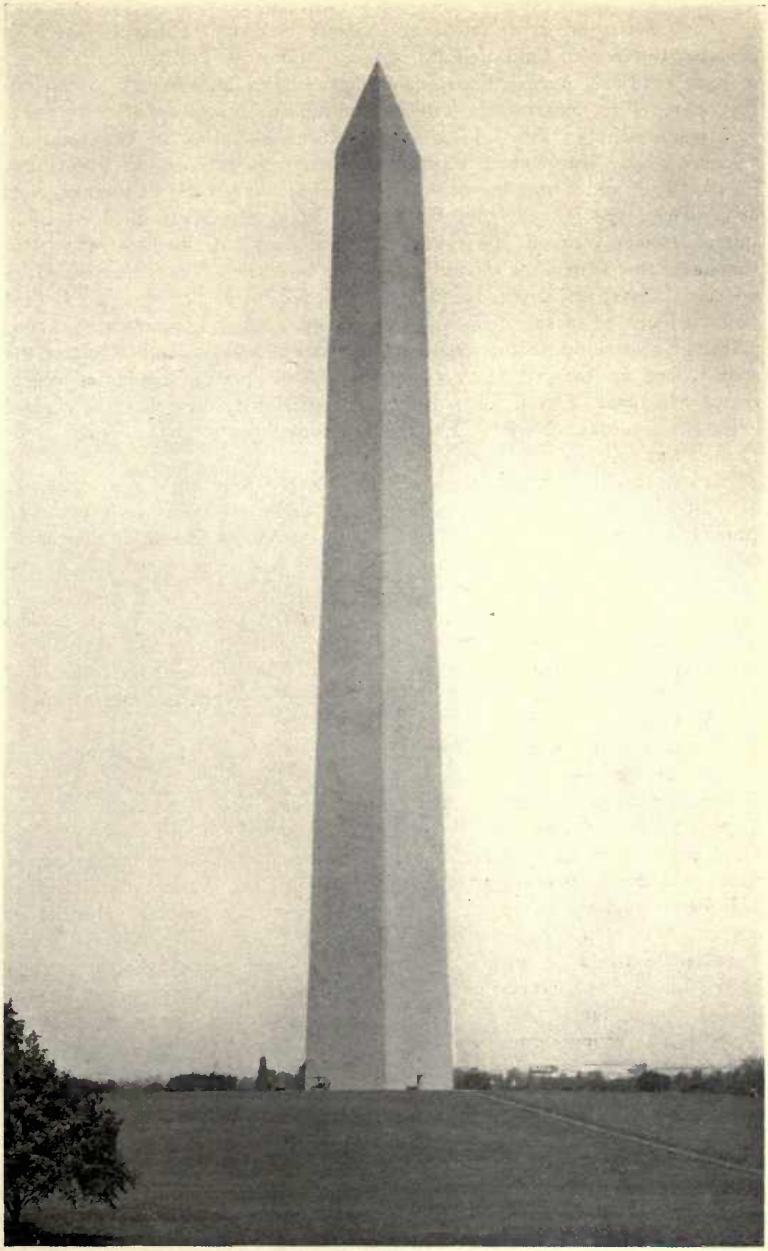
Dimensions

The Monument is an obelisk. Its height from floor of entrance to tip is 555-ft. 5⅛-in. The shaft is 500-ft. 5⅛-in. in height, 55-ft. square at base. 34-ft. at top. The pyramidon (or pyramid-shaped section above) is 55-ft. in height, and terminates in a pyramid of pure aluminum. The walls are 15-ft. in thickness at the entrance, and taper to 18-in. at the top of the shaft. The facing is of pure white marble from Maryland, the interior backing is of gneiss and New England granite. The foundation, of rock and cement, is 36-ft. deep, 126-ft. square.

The Monument is the highest work of masonry in the world, and is exceeded in height only by the Eiffel Tower, of iron, 984-ft. The highest other structures of the world are: Philadelphia Municipal Building, 537-ft.; Cologne Cathedral, 524-ft.; Pyramid of Cheops, 520-ft.; St. Peter's, 518-ft.

Memorial Stones

The interior is lighted by electricity, which affords opportunity of seeing the memorial stones which are set in the inner face of the Monument. Glimpses of some of these may be had from the elevator, but the inscriptions may be read only from the platforms. The series begins at the 30-ft. landing and extends to a height of 280-ft. The 179 stones were contributed from various sources as tributes to Washington, and many of them are notable for their beauty, elaborate carving or origin.



THE WASHINGTON MONUMENT.

Forty States are represented, and sixteen cities; fifteen lodges of Free Masons, thirteen of Odd Fellows, seven of Sons of Temperance, and numerous political organizations, debating societies and others long since forgotten. Fire departments with the antiquated machines of forty years ago, public schools, the "Oldest Inhabitants' Association of Washington," "Sons of New England in Canada," "Americans residing in Foo-Chow, China, 1857," and a long list of others have left the records of their patriotism. There are stones from Braddock's Field, the Battle-field of Long Island, Otter's Summit (Virginia's loftiest peak), the ruins of ancient Carthage, the Temple of Æsculapius—Isle of Paros, Vesuvius, the Alexandrian Library in Egypt, the Tomb of Napoleon at St. Helena. Greece sends a block of marble from the Parthenon, Turkey a beautifully carved marble, Switzerland a stone from the Chapel of William Tell, "built at the spot where he escaped from Gessler." Other foreign countries represented are Japan, China, Siam, Brazil, and, curiously enough to be classed here, the Cherokee Nation. On the aluminum tip at the summit is inscribed *Laus Deo.*

View

At the height of 504-ft. the walls are pierced with eight port-openings or windows, two in each face, which afford extensive views on every side. Immediately below, and stretching away to the White House on the north and the Capitol on the east, is the beautiful landscape gardening of the Mall and the parks, the city beyond, and then the hills rolling away to the horizon. On an eminence in the northeast is the Soldiers' Home; on the Virginia hills to the west is Arlington; on the northwest the Naval Observatory. The Potomac's winding course may be followed for miles, and on a clear day one may discern in the western distance the mountains of the Blue Ridge in Virginia.

History

The plan of providing a fitting memorial of Washington's military and political services had its inception during his lifetime. As early as 1783 Congress resolved to erect a marble monument, and Washington is said himself to have selected the site afterward adopted. The project was revived upon Washington's death, but no practical steps were taken toward accomplishing the purpose until the formation of the Washington National Monument Society, in 1833. Funds were raised by popular subscription and the Society adopted the plans of Robert Mills, which provided for a Pantheon 100-ft. high with a colonnade, a colossal statue over the portico of Washington in a chariot with six horses driven by Victory, and a central obelisk 600-ft. high. All of this but the obelisk was subsequently abandoned. The corner stone was laid in 1848. By 1855 the shaft had attained a height of 152-ft.; then the funds having been exhausted the construction was suspended, not to be resumed until 1878, when Congress having appropriated money for its completion the work was put under the direction of Col. Thomas L. Casey, of the Corps of Engineers; and the finished Monument was dedicated on Feb. 21, 1885. The orator on that occasion was the venerable Robert C. Winthrop, who thirty-seven years before had delivered the oration at the laying of the corner stone. The total cost of the Monument has been $1,300,000.

THE TREASURY.

THE TREASURY is on Pennsylvania avenue at 15th street. Open from 9 to 2 daily; but the tour of the building may be made only between 11 and 12 and 1 and 2. The Pennsylvania avenue car should be left at the regular stopping point on 15th street, near the north basement Treasury entrance on that street.

THE BUREAU OF ENGRAVING AND PRINTING is on 14th street, south of the Monument grounds. Reached by Pennsylvania avenue car, which transfer at 14th street to 11th street car (2 cents extra fare). Open to visitors from 9 to 11:45 and 12:30 to 3:00. No pass required.

SECOND only to the Capitol itself in architectural importance is the Treasury Building, an imposing structure of sandstone and granite, having a total length of 450-ft. and a width of 250-ft. The east front on Fifteenth street is adorned with a colonnade of thirty-eight stately Ionic columns, after those of the Temple of Minerva at Athens; and on the north, the west and the south fronts are porticoes of similar columns. There is reason to regret that the architect, Robert Mills, did not have his way in the design of setting the building amid grounds commensurate with it in dignity and beauty, instead of obtruding it unceremoniously upon the thoroughfare; but the story goes that President Jackson became impatient at the long delayed choosing of a site, and finally stuck his cane down into the ground one morning and ordered, "Build it here." And here it is to-day.

The impression the structure gives is of enduring solidity and security, and it is fitting that this should be so; for, while the 200 rooms on each floor of the building are devoted to a surprisingly varied range of activities, the Treasury is first of all a financial institution, and it is as the Bank of the Nation that it has most interest. To study its various operations, one should visit the Bureau of Engraving and Printing (in another building); the Division of Issue, the Redemption Division, the Bond and Silver and Gold Vaults, and Cash Room. The Cash Room may be seen at any time from 9 to 2; no pass is required. To be shown the other rooms, one should time a visit between 11 and 12, or 1 and 2.

The Cash Room is near the Pennsylvania avenue entrance, on the first floor; but may be seen to better advantage from the gallery, to which doors give access from the corridor of the second floor. The walls are of choice American and Italian marbles, and the room is one of the costliest in the world. As the name denotes, the Cash Room is a cashier's office. Here the Treasury cashes the various warrants drawn upon it and presented here for payment. The daily transactions run into the millions; a warrant once handed in and cashed without a moment's delay came over

from the Pension Bureau, and the figures upon it called for $1,000,000. The visitor himself may have a part in the business of the Cash Room by presenting at one of the steel screened windows a warrant on the Government, in the shape of a national currency bill, and, receiving coin for its face value, may thus complete the round of circulation of that particular piece of paper as money. Having gone out originally from this very building as new currency, having passed through innumerable hands in exchange for a thousand and one different things, and having now found its way back again, old and worn, it will here be redeemed, and then as money no longer, but just plain paper, it will be destroyed.

The system of making new money, exchanging new for old, and destroying the old, is what one sees at the Treasury; and it is all so interesting that we are likely to count the half-hour spent here as among the best to be remembered of the National Capitol.

Treasury Tour

From 11 to 12 in the morning, and from 1 to 2 in the afternoon, visitors who present themselves at the office of the United States Treasurer, Room 96, on the first floor, are escorted through the money departments of the institution. If you give your attention to the very courteous and well-informed messenger who conducts the party, you will hear him relate of the several phases of the work what is told in the following pages. We shall depart, however, from the order in which for convenience the several rooms are shown, that we may follow the course of a piece of paper money through all the successive stages of manufacture, issue, redemption and destruction. To do this we must begin at the Bureau of Engraving and Printing.

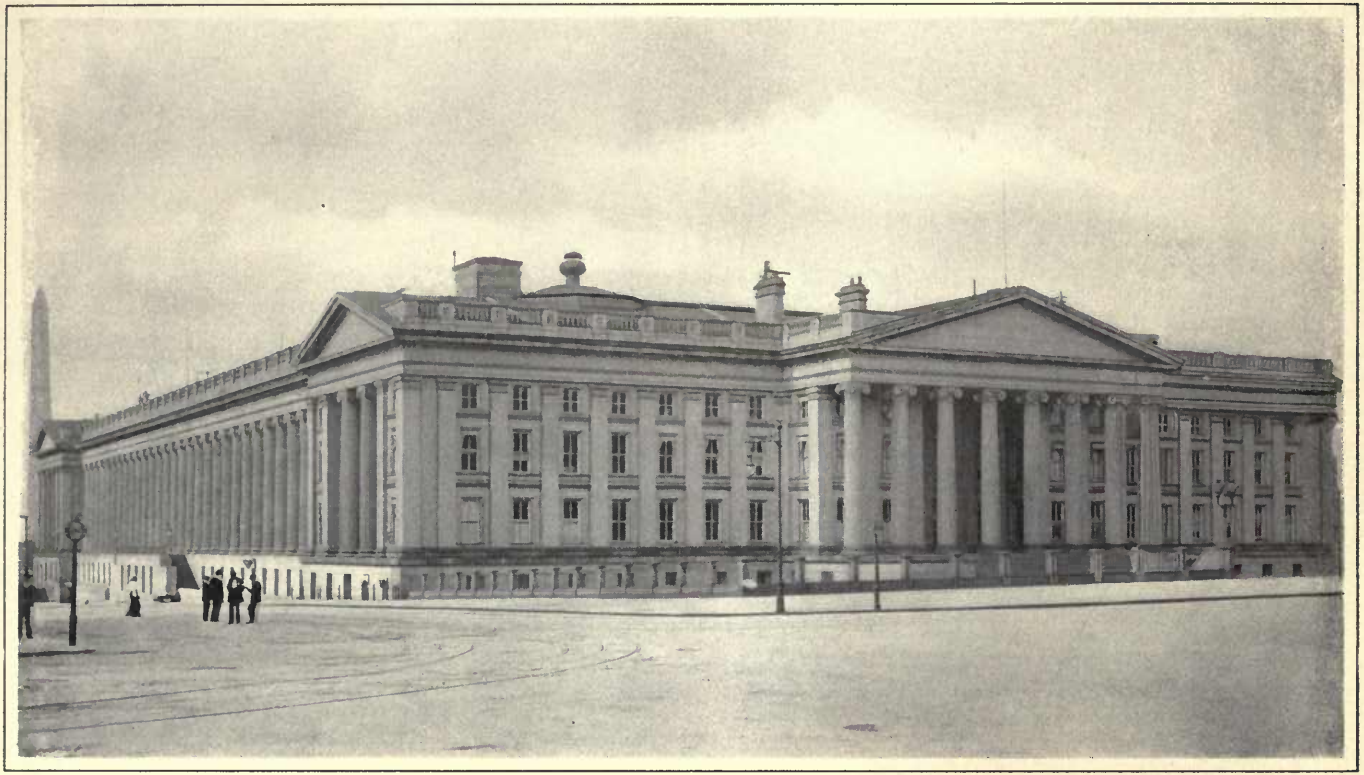
Bureau of Engraving and Printing

The Bureau of Engraving and Printing is a branch of the Treasury. Here are printed the Government bonds and the national currency, together with postage and revenue stamps, military, naval and diplomatic commissions, passports, etc. Specimens of the work of the Bureau are exhibited in the waiting room and in the halls, and series of currency are displayed in various stages of completion. There is a series of old-time fractional currency—shinplasters; and a $10,000 silver certificate, the largest note issued.

The actual work of engraving the plates is not shown. This is surrounded with the utmost precaution to guard against abstraction of the plates; they are closely watched by day, and are locked in the vaults by night. The original plate itself is never printed from, but a replica is made of it for actual use. This is the Bureau's device to guard against the possibility of being itself a counterfeiter of the currency. For, if an accident should happen to a plate, it would have to be replaced by a new

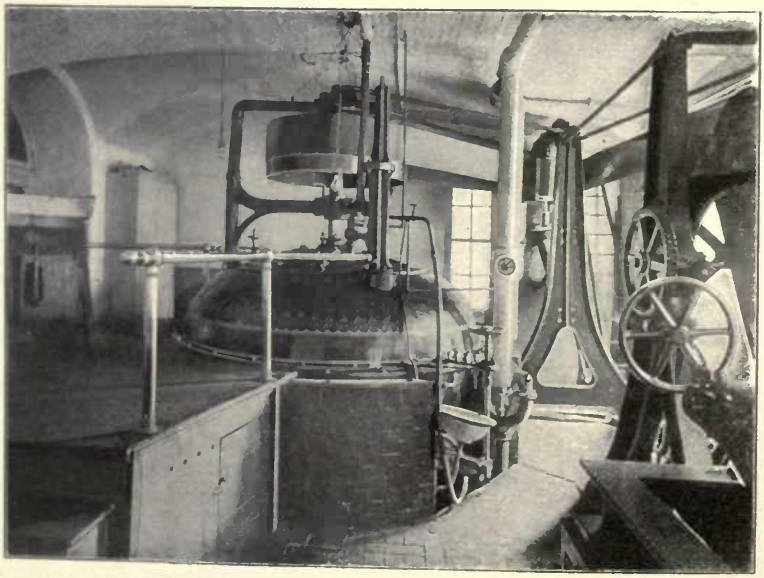
Plates

one; and no matter how nearly like the original the new one might be engraved, it would not be that original, but a copy of it, and a note printed from the new plate would not be an original, but a copy of that original, i. e., a counterfeit. Whereas, if the replica should be injured, a new replica would be a new original printing plate. A specimen plate is shown of the portrait of Burnside, which, however, does not belong on a Treasury note; and with it is exhibited the roller used to transfer the engraving from the plate to the replica which is to be printed from.



THE TREASURY OF THE UNITED STATES.

BUREAU OF ENGRAVING AND PRINTING.



THE MACERATER.

Printing the Notes

The first process that one witnesses is the printing of the notes. In this 500 employes are engaged. The paper used is the peculiar silk-fibered paper made at the Crane Mills in Dalton, Mass. Its manufacture is a closely guarded trade secret, and the law forbids possession by others of any such paper or its imitation. It is received in packages of 1,000 sheets. This 1,000 count, beginning at the paper mill in Massachusetts, is maintained throughout every department of the Bureau, and is continued after the notes reach the Treasury. To each pressman 1,000 sheets are given at a time. The printing is done on hand-presses. Each pressman has a young woman assistant. Each sheet makes four notes. A pressman prints 500 sheets a day, on one side only. From this floor the printed sheets go to the one below, where the count is verified. Then they pass to the numbering machines, which impress upon them in blue ink the distinctive series letter and the number of each note. The machines are purely automatic as to the progression of the numbers. The numbered notes are counted for the last time, and wrapped in packages of 1,000 sheets each, to be taken to the Treasury.

There are fourteen departments and 1,400 employes; each piece of work passes through the hands of thirty different people. An elaborate system of receipting prevails, and at the closing hour everything is delivered into the hands of the custodians, and every count is verified before the force is dismissed. The rule prevails not only here, but in the Issue and Redemption Divisions in the Treasury Building.

From the Bureau the currency is brought over at 9 o'clock every morning, a million dollars a day, in a wagon built of steel, and attended by a force of guards, to the Treasury, and delivered to the Division of Issue. Here three experts verify the contents of 1,000 sheets to the package, each sheet being composed of four notes of uniform denomination. Then the sheets are sent to the Sealing Room, where the "Red Seal" of the Register of the Treasury is stamped upon them. The seal bears the legend *Thesaur. Amer. Sept. Sigil.*, an abbreviation for *Thesauri Americæ Septentrionalis Sigillum*—Seal of the Treasury of North America. The cutting machine cuts each sheet into its four component notes, and in new packages of 4,000 bills the currency now passes to its final counting. Each package goes through the hands of five successive counters.

Red Seal

Expert Counters

The counters here are the most expert in the service, and probably in the world. Their marvelous skill, rapidity and accuracy afford a revelation of what the trained hand and eye and mind can do; their work is as the work of a perfect machine. In counting a package the expert is seen to lift each note by the upper right-hand corner; this she does successively one after another with the 4,000 notes in the package, and not only does she count the notes, but scans also the seal and detects any imperfection.

The average daily volume of new money passing through the hands of the counters is a million dollars, made up of 320,000 separate notes. Every package is receipted for by each person into whose hands it comes.

Having received the final count, the money is intrusted to the sealing clerk, who wraps up the packages (containing from $4,000 to $4,000,000

To the Reserve Vault

each) in plebeian brown paper, and seals each package with the Treasury Seal. The amount of money received by him at the close of the day must tally to a dollar with the amount brought in from the Bureau of Engraving and Printing. The new money is deposited in the currency reserve vault (not shown to visitors), where it remains for two months or more. As one new lot is added each day to the vault, another lot is taken out for issue, to be put into circulation, a goodly proportion of it destined eventually to find its way back to this building as worn and mutilated currency, to be redeemed in the Redemption Division.

Redemption Division

In the Redemption Division old currency is received to be exchanged for new. It comes in from banks throughout the country and from the Sub-Treasuries.*

Dollar for Dollar

At every stage the system of currency redemption is attended with precautions to provide against error and loss. For every old dollar received, a new dollar must be paid out; and for every new dollar paid out, an old one must have been received. To verify the count a force of expert counters is employed, whose skill is such as to excite wonder and challenge admiration. Here, as in the other departments, the counters are women.

Expert Counters and Their Work

The money, brought by the express companies in sealed packages, is delivered to the receiving clerk, by whom in turn the packages, still sealed, are distributed to the counters. Each counter receipts for the package given her, specifying the amount it is said to contain. Having verified the count, she puts up the money in new packages of 100 bills each, and on the manilla wrapper of each, at top and bottom, writes her initials and the amount. Then she takes the package to the canceling machine, which punctures four holes through it, two in the upper half and two in the lower. She then delivers the package of canceled notes to a clerk, who credits her with the account received. At the close of the day this clerk's record of bills, counted and canceled, must tally with the account of the clerk who gave out the packages to be counted and canceled; and such are the expertness and accuracy here prevailing that any discrepancy is extremely rare. The expert's duty is not limited to the counting; she must also detect counterfeits and "raised" bills, as a $2 to a $20. Practice makes perfect; the trained eye detects bad money at a glance, the bill is stamped "Counterfeit" in letters which cut right through the paper, and is returned to the sender, that it may be traced if possible, and is then sent back again to the Treasury for investigation by the Secret Service Division.

Counterfeits

On each day the canceled packages of the day before are taken, each package by the one who counted it, to the cutting knife. This is a huge blade, which cuts the package in two lengthwise, each half still having the initials of the counter and the amount the package contains. The upper half goes to the Register's office, the lower one to the office of the Secretary of the Treasury. In each office the half-sheets are counted, and if this final enumeration corresponds with that of the first expert, the money

*There are Sub-Treasuries at Boston, New York, Philadelphia, Baltimore, Chicago, St. Louis, Cincinnati, New Orleans and San Francisco. The Mints are at Philadelphia, New Orleans, Denver, Carson City and San Francisco.

is sent to the macerater for destruction. If errors are discovered either as to amount or as to a bad bill undetected, the first counter is held responsible for the amount involved, and it is deducted from her salary.

Redemption Division Reports

There is received in the Redemption Division an average of one million dollars a day, or more than three hundred millions a year. The women experts who handle these vast sums are reputed to be the most skilled counters of worn money in the world. Their task is more difficult than that of the counters of new money in the Issue Division, for there is no order of enumeration to guide the count, and much of the currency is worn and difficult to handle. There are certain of those engaged here who are of tried proficiency, and to them the mutilated currency is intrusted.

Saving the Shreds and Patches

In a secluded corner, not accessible by visitors, works an expert in burned money, and in shreds and patches of currency, which would defy the skill of one less acute and patient. Her task is to unravel mysteries, to solve problems which are exceedingly difficult of solution. It is a work filled with compensations; for each new case makes its own appeal to her ever ready sympathy, and with every new success comes the consciousness that some unfortunate person has been helped. To the editor of The Standard Guide was exhibited on a recent occasion the particular work then in hand. There were pulpy bits of money which had been chewed by swine, in which traces had been made out of a $10 note and another of $5; fragments of two $500 notes, supposed to have been torn up and thrown away by a Chicago man before committing suicide; the ashes of one $10 and two $5 notes, which a woman had hidden in a grate and afterward set fire to. There are restrictions upon the redemption of such fragments of money, the amount allowed being proportioned to the pieces identified in such a way as to make overpayment impossible. If three-fifths of a note are received, the bill is redeemable at its full face value; if less than three-fifths and more than two-fifths, at one-half the value; any part less than two-fifths is not redeemed unless proof is presented that the rest was destroyed.

The Macerater

In the macerater the canceled notes pass through the final process of destruction. The macerater is a huge spherical receptacle of steel, which contains water and is fitted in the interior with closely set knives, which, as they revolve, grind the contents exceedingly fine. The massive lid is secured by three Yale locks, each with its own individual key. The key of one lock is held by the Treasurer, of another by the Secretary, and of the third by the Comptroller of the Currency. Every day at one o'clock these three officials or their deputies, with a fourth one, designated by the Secretary to represent the banks and the people, assemble at the macerater to deposit in it the money which is to be destroyed. Each key-holder unlocks his respective lock, the lid is lifted, the packages of halved bank notes are brought, and the macerater—a veritable hungry and insatiate monster—receives its million dollar tribute. The lid is shut-to, the keys are turned in the locks, the machinery is put in motion, the macerater begins its revolutions, and the 156 steel knives within are put to their work.

The Macerator and its Daily Tribute

Each batch of material is ground finely and more finely, until at the end of four or five days its maceration is complete. The committee of four then unlock a valve and the liquid pulp flows out, is screened into a pit below, and is thence transferred to the Bureau of Engraving and Printing, to be rolled out into sheets of bookbinders' board and sold for $40 a ton. Samples of the million dollar money pulp are fashioned into various forms for souvenirs, and for a fraction of a dollar one may acquire enough of it to make himself rich beyond the dreams of avarice.

The capacity of the macerator is one ton of pulp. The average amount destroyed daily is a million dollars. The largest sum ever deposited in the macerator by the committee in one day was $151,000,000, destroyed on June 27, 1894; it consisted of national bank notes and United States bonds.

The Bond Vault

Among the vaults to which the attention of the visitor is directed are the Bond Vault, which contains the United States bonds deposited by the National Banks as security for their own notes in circulation; Vault No. 1, in the basement, containing silver dollars; and Vault No. 2, containing silver dollars, fractional silver currency and gold coin. The gold held here is to supply the demand of the District of Columbia. The Gold Reserve is held in the Sub-Treasuries, where the local demand for gold coin is to be met. The law requires the Treasury to hold a reserve of at least $100,000,000 in gold to sustain the credit of the United States. At every change of Administration, on the appointment of the new Treasurer, all the money in the several vaults is counted by a committee of thirty-five, who represent the incoming and the outgoing officials, and it is not until the three months' task has been finished that the new Treasurer is prepared to receipt to his predecessor for the precise sum delivered into his care and keeping.

There is a carefully devised system of guarding the Treasury. The force of sixty-eight watchmen—all of them honorably discharged from the Army or Navy—is divided into three reliefs. They patrol the building night and day, and during the day a special force is on hand at the main door always prepared for an emergency. Electric bells are turned in every half hour, day and night, to the Captain's office. This office is in communication with that of the Chief of Police, and with Fort Myer and the Arsenal, whence police, cavalry and artillery could be summoned and would promptly be on hand. Arms are stored in many of the rooms where large sums of money are handled; with these the Captain of the Watch could on the instant arm a thousand men. The offices of the Treasurer, the Assistant Treasurer and the Cashier are connected by wire with that of the Captain, and in less than thirty seconds the Captain could respond with an armed force.

Outside, watchmen are stationed in the watch-houses, which are so disposed as to command the entire building. The Treasury day closes at 4 o'clock, at which hour work ceases. At 5 o'clock all doors are closed, except the main one, and the keys are delivered to the Captain of the Watch. By 6 o'clock every one except the watchmen must have left the building. After that hour no one is ever admitted except the Secretary, the Treasurer and the Treasurer's Chief Clerk.

Other branches of the Treasury Department have to do with a variety of interests; among them are the Supervising Architect of Government buildings throughout the United States, Bureau of Navigation, Lighthouse Board, Life-Saving Service, Steamboat Inspection, and the Customs and Internal Revenue.

PERFORATING STAMPS.

PENNSYLVANIA AVENUE FROM THE TREASURY.

THE STATE, WAR AND NAVY DEPARTMENTS.

STATE, WAR AND NAVY.

THE STATE, WAR AND NAVY BUILDING, on Pennsylvania avenue west of the White House, is open to visitors from 9 to 2. Take the elevator in the corridor on the right (Pennsylvania avenue entrance) to second floor. The doorkeepers will give admission to the ante-rooms.

WITH a frontage of 342-ft. on Pennsylvania avenue, and a depth of 565-ft., the four-storied granite structure of the State, War and Navy Department ranks as the largest and most magnificent office building in the world. It has 500 rooms and two miles of marble halls. The stairways are of granite with balusters of bronze, and the entire construction is fireproof; for the records and archives deposited within its walls are priceless and beyond restoration.

The War Department occupies the west wing, the Navy Department the east wing, and the State Department the south. The main entrance to all of these is on the Pennsylvania avenue front. The offices of the Secretaries, on the second floor, are accessible only for business; but the richly furnished ante-rooms may be inspected.

War

The walls of the corridor of the Secretary of War's offices and the ante-room show a series of portraits of Secretaries, beginning with Henry Knox (1789, Washington's first administration) and including many men whose names are household words in American homes. Of chief and peculiar interest are Huntington's portraits of Grant, Sherman and Sheridan, the three frames grouped with a drapery of the Stars and Stripes and a silken standard of the Arms of the United States. The Washington portrait is a copy of an original by Gilbert Stuart.

Washington's Life Guard

On the opposite side of the hall are the Headquarters of the Army and the office of the Commander-in-Chief. In the hall above are shown models of the uniform of the Army at various periods of the service. Among the groups is one which represents the dress of Washington's Life Guard. The service, formed in 1776, consisted of 180 men, who were carefully selected for their soldierly qualities and trustworthiness. Each of the Thirteen States are represented. The duty of the members was to serve as a special body guard of the General, his baggage, papers, etc. The motto of the Guard was, "Conquer or die."

Navy

In the ante-room of the office of the Secretary of the Navy may be seen portraits of former Secretaries; the series is incomplete. In the corridor are models of war vessels. The Naval Library is on the fourth floor.

In the ante-room of the Secretary of State's office are portraits of former Secretaries, with others in the Diplomatic Reception Room, the salon in which the Secretary receives foreign ministers.

The portraits here are of Thomas Jefferson, 1789, Washington s first term; Daniel Webster, 1841 and 1850; William H. Seward, 1861 and 1865; Elihu B. Washburne 1869; Hamilton Fish, 1869; Wm. M. Evarts, 1877; James G. Blaine, 1881 and 1889; and F. T. Frelinghuysen, 1881. A portrait of Lord Ashburton recalls the "Ashburton Treaty" of 1842, which defined the boundaries between the United States and the British Possessions in North America, and provided for the suppression of the slave trade.

State Library The State Library on the third floor, south corridor, is the most interesting room in the building, not alone for its 50,000 volumes, rare and valuable as many of them are, but for the national heirlooms treasured here. Foremost among these is a facsimile of the Declaration of Independence. Near the facsimile hangs the original of Thomas Jefferson's **The Declaration** first draft of the instrument. It is in his hand, with interlineations by Franklin and John Adams. The original of the Constitution and of Washington's commission as Commander-in-Chief are preserved in the safe. Other objects of interest displayed are:

Washington's Sword The Sword of Washington. It is encased in a sheath of black leather, with silver mountings. The handle is of ivory, pale green, wound with silver wire. The belt, of white leather, has silver mountings. The sword was among the four bequeathed by Washington to his four nephews. This one was chosen by Samuel Washington, who willed it to his son, Samuel T. Washington, by whom it was presented to Congress in 1843. There are also shown some volumes of Washington's Diaries.

Franklin's Staff The Staff of Franklin. Franklin bequeathed it to Washington, his will providing: "My fine crab-tree walking stick, with a gold head curiously wrought in the form of the cap of liberty, I give to my friend, and the friend of mankind, General Washington. If it were a scepter, he has merited it, and would become it. It was a present to me from that excellent woman, Madame De Forbach, the dowager duchess of Deux-Ponts." Washington left it to his brother, Charles Washington, by whose grandson, Samuel T. Washington, it was presented to Congress, with Washington's sword, in 1843. There are also buttons from Franklin's dress coat.

Thomas Jefferson's desk, on which he wrote the Declaration of Independence.

Seal of the United States The Great Seal of the United States is shown in wax replica. The seal was adopted by Congress in 1782. The arms consist of an American eagle supporting an escutcheon on his breast, and holding in his talons an olive branch and a bundle of thirteen arrows, and in his beak a scroll inscribed with the motto *E Pluribus Unum*. Above is a glory with a constellation of thirteen stars. The eagle as the national emblem is found at every turn in Washington.

Hull Relics A silver set, presented by citizens of Philadelphia, 1812, to Capt. Isaac Hull, commander of the American frigate Constitution, in commemoration of his victory of Aug. 19, 1812, when he destroyed the British man-of-war Guerriere. Also a brace of pistols and a sword, presented to him by Connecticut for a similar memorial. The American frigate Constitution (Old Ironsides) was built at Boston in 1797. At the beginning of the War of 1812. she was commanded by Capt. Isaac Hull. On Aug. 10, 1812, she

CHINESE LEGATION.

RUSSIAN EMBASSY.

JAPANESE LEGATION.

took the British ship Guerriere in a close fight; and for his gallantry Hull was voted a gold medal by Congress. The Constitution is now a receiving ship

Washington's eye-glasses, given by him to Lafayette and presented to the United States by Lafayette's great-grandson, Count Octave Assailly. Medals awarded by acts of Congress to officers of the Army and Navy for distinguished services. A whale's tooth sent to the United States as a treaty by the King of the Fiji Islands. Obus (explosive shell) from the Paris Commune of 1871. Presented by Minister Washburne.

Medals

The State Department is the depository for all the engrossed copies of the laws of the United States, all proclamations by the Executive, all treaties, pardons, and a thousand and one other records and archives. The Department of Justice, a branch of the State Department, is opposite on Pennsylvania avenue.

State Department

CITY POST OFFICE AND POST OFFICE DEPARTMENT.

SMITHSONIAN INSTITUTION
AND NATIONAL MUSEUM.

Revised by courtesy of Mr. S. P. Langley, Secretary of the Smithsonian Institution.

The two buildings are situated in the south part of what is commonly known as the Smithsonian Grounds—a part of the Mall, near B street, between 7th and 12th streets. They are most easily reached by the cars of the Capital Traction Company, through its 7th street division, although a branch of the Metropolitan Railroad Company, called the Le Droit Park Line, is also within a convenient distance. Both buildings are open to the public daily, except Sunday, from 9 a. m. to 4:30 p. m. There is a public café at the east end of the Museum building.

THE SMITHSONIAN INSTITUTION, which occupies a prominent place among the learned establishments of the world, was founded by Congress in 1846 through the generosity of James Smithson, an Englishman, who in 1829 bequeathed his entire property "to the United States of America to found at Washington, under the name of the Smithsonian Institution, an establishment for the increase and diffusion of knowledge among men." The original fund of about $515,000, which with certain additions has by provision of law been drawing annually six per cent. from the United States Treasury, has now increased by accumulations of interest and by the public-spirited generosity of individual donors to over $900,000.

The Smithsonian Institution stimulates, encourages and rewards scientific investigation and study in various departments of knowledge. It has a library of 250,000 volumes, mostly deposited with the Library of Congress, and is the custodian of the National Collections. It issues three classes of publications, called the "Contributions to Knowledge," the "Smithsonian Miscellaneous Collections" and the "Annual Reports." The first two contain the record of original scientific research, and the third, popular papers relating to most of the domains of knowledge. Through its Bureau of International Exchanges it furnishes a medium of interchange between learned societies and men not only in this country alone, but throughout the entire world, having over twenty thousand correspondents outside the United States in every quarter of the globe where civilized man is found.

The Smithsonian Building is constructed of red sandstone; it is 447 x 160 ft., and the highest of its nine towers is 150 ft. The building is a combination of Gothic and Romanesque architecture, but the style is one poorly adapted to its purpose. The collections in the Smithsonian Building comprise tens of thousands of birds, fishes, reptiles and invertebrates. Sponges and corals are numerous. The extensive archæological collections are particularly rich in American antiquities. Mexico and Porto Rico are represented by special collections. There are models of a Zuñi pueblo, homes of the cliff dwellers of North America, and Swiss lake village, with prehistoric implements from the cave dwellers of France.

THE NATIONAL MUSEUM, which is under the direction of the Institution, is supported by an annual appropriation of Congress. The building, completed in 1881, is about 330 ft. square, and covers two and one-third acres.

THE SMITHSONIAN INSTITUTION.

The collections have increased from about 190,000 specimens in 1882 to nearly 5,000,000 in 1901. It is the recognized depository for all objects of scientific and artistic interest which come into the possession of the Government, and its special function is to preserve these treasures perpetually and so to administer them as to make them serve the most useful ends for those who desire to examine them. Thus, while the objects of more popular interest are exhibited in the halls, the larger portions of the collections are stored away in the laboratories where they can be consulted by properly accredited students and investigators.

Among the agencies which have contributed most largely to building up the national collections may be mentioned the various enterprises of the Government which in early years included explorations and surveys

THE NATIONAL MUSEUM.

Historical Collections

The Historical Collections of the Museum contain personal relics, mementoes and memorials of most of the Presidents of the United States, and of scores of statesmen, soldiers and others who have had part in the history of the country and the advancement of civilization. Among those of greatest popular interest are the Washington and Grant relics.

The Washington relics include the uniform General Washington wore as Commander-in-Chief, on the occasion of resigning his commission at Annapolis; the camp chest with its pewter dishes, knives, forks, cooking utensils, etc., used by him during the Revolutionary War. The Grant relics were presented to the United States in 1885 by Mrs. Julia Dent Grant and William H. Vanderbilt. They consist of his swords, memorials of his victories, from the United States, States and cities, and tributes to his fame and achievements from governments all over the world.

The Senate and the House adopted a joint resolution, declaring "That the United States accept, with graceful acknowledgment, the said property, to be held by the United States, and preserved and protected in the City of Washington for the use and inspection of the people of the United States."

There are also valuable gifts to Presidents of the United States as well as to statesmen, soldiers and other representative Americans.

Very interesting collections have been received commemorating military and naval events in the Philippine Islands, Cuba and Porto Rico.

Ethnology

The ethnological exhibits include valuable series of objects representing the customs, arts and industries of the North American Indians, the Eskimo, natives of Africa, various countries of Asia, Korea, Japan, British Columbia and other regions.

Religions

There are also special exhibits illustrating the chief religions of the world. These are divided into the following sections: Biblico-Judaic; Christian; Mohammedan; Assyro-Babylonian; Hittite; Græco-Roman; Brahman and Buddhist.

Natural History

The natural history collections are intended to represent primarily the fauna of the United States, and secondarily, some of the principal forms found in foreign countries.

Geology

The Department of Geology contains the extensive collections of the U. S. Geological Survey, a special exhibit illustrating limestone caverns, and including a large series of stalagmitic and stalactitic minerals, together with a collection of representative forms of the animals inhabiting caves. In the economic section are full and systematic collections illustrating the mineral resources of the United States, arranged geographically, and also a systematic series in which minerals of the same nature and from different sources are arranged by kinds. The mineral exhibits include such well-known collections as the Isaac Lea collection, the Leidy collection, with many others obtained by officers of the U. S. Geological Survey, the Stroud collection, the Hawes collection, etc.

Fossils

The geological collections, under the present classification, also embrace the collections of fossils, the most important of which, valued at $50,000 was presented by the late Mr. R. D. Lacoe, of Pittston, Pa.

THE NATIONAL ZOOLOGICAL PARK, which is also administered under the Smithsonian Institution, covers 167 acres of ground beyond the northwestern limits of the city, and contains interesting and valuable collections of living animals. It is easily accessible by street cars running from Pennsylvania Avenue and 7th street; and from 9th to F streets, without change, and from other points.

The purpose of this Park, as defined in the legislative authority for its establishment in 1889, is "the advancement of science and the instruction and recreation of the people." In carrying out this purpose, it undertakes primarily to collect and preserve our national fauna, and secondarily to provide entertainment for the public, while it incidentally preserves to the people of the District a singularly beautiful tract of land. In making the improvement of the Park his personal care, Mr. Langley, the Secretary of the Institution, through whose exertions it was founded, has made it a special effort to leave as much to nature as possible.

The Smithsonian has charge also of the Bureau of American Ethnology and the Astrophysical Observatory.

The Standard Guide Key to National Museum Collections.

NORTH HALL—American History, from Leif Ericson to the Philippine War. Musical instruments in wall cases. Limoges panel. Terra-cotta pulpit and font. Model of Statue of Prof. Henry in the Library.

ROTUNDA—Model of Crawford's Statue of Armed Liberty, on the Capitol Dome.

SOUTH HALL AND GALLERY—Mammals.

EAST HALL—Department of Technology and Transportation. Development of Harpoon, Fish-hook, Torch, Candle, Lamp. Cutting implements from the stone knife to the modern cleaver. The Sword, Flying-Machine. Cable, Telegraph. GALLERY—Materia Medica. Herbarium. Botany.

WEST HALL—Groups of Races of Man. Egyptian Mummies. Hieroglyphics. Idols. GALLERY—Religious ceremonials. Feather cape from Hawaiian Islands.

WEST NORTH RANGE—Indian Groups. Catlin Indian Portraits.

NORTHWEST RANGE—Alaskan relics. Eskimo Tribes. Totem posts.

NORTHWEST COURT—Indian Groups. Indian pottery. GALLERY—Arts and industries of Aborigines of North, South and Central America.

WEST SOUTH RANGE—Systematic Geology. Materials of the Earth's crust. Structure of the Earth's crust.

SOUTHWEST RANGE—Mineralogy. Systematic and comparative series of minerals. Gems and precious stones. Metallic collection.

SOUTHWEST COURT—Applied Geology. Ores used in the arts and industries.

EAST NORTH RANGE—Lecture Hall.

NORTHEAST RANGE—Naval Architecture. Models of craft, from dugout canoe to latest steamship.

NORTHEAST COURT—Section of Graphic Arts. Technical illustrations of the reproductions of multiplying arts. The various methods of painting and drawing. GALLERY—Ceramics. Ivory and bronze.

SECOND FLOOR—Department of Anthropology. Indian antiquities. Cliff dwellings. Egyptian, Peruvian and Alaskan mummies. Pottery and stone implements.

PENSION BUILDING.

THE Pension Building is in Judiciary Square, at F and 4th Streets. Open from 9 A. M. to 4 P. M.

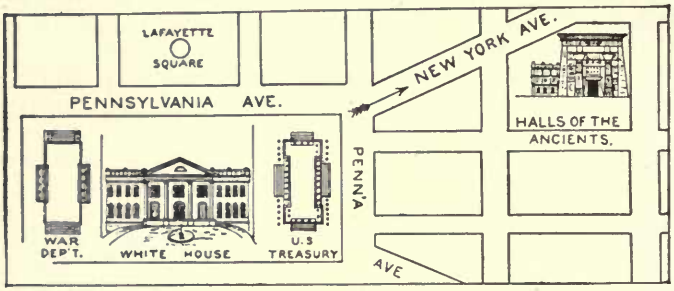
MORE eloquent than the storied frieze of the Parthenon to an American is the sculpture of the Pension Building, with the marching hosts of the Boys in Blue. Infantry, cavalry and artillery—now keeping buoyant step to the drumbeat and now lagging with weariness, the strong supporting the weak—here they are pictured marching on, as the world saw them march, in the years when men bore arms for their country. Many a veteran has felt his pulse quicken at the sight of the old familiar scenes, and to many a younger man the story of the '60s has been made more real by these speaking groups.

Within the immense building—for it covers an area of 200x400-ft.—one finds a vast court, with lofty roof of iron and glass. It is a veritable bit of outdoor between four walls. Gallery rises above gallery, surrounding the court, and tier upon tier of offices. The roof, of iron and glass, is supported by great columns which appear to be marble, but are brick—55,700 bricks to a column. They rest on foundations 18-ft. below the floor, and from the floor to the roof they are 75-ft. in height. The building was completed in 1885. Some notion of its magnitude may be had from the fact that at the inauguration balls, which are held here, 18,000 people have been gathered within it. The floor space is filled with rows upon rows of cabinets, in which are filed the hundreds of thousands of documents relating to pensions. So perfect is the system that within five minutes after inquiry the entire record of a pension case may be put before one. Among the 2,000 clerks here may be noted many an old soldier wearing the bronze button; and there may be seen, too, many an armless sleeve.

THE PENSION BUILDING.

HALLS OF THE ANCIENTS.

THE HALLS OF THE ANCIENTS on New York avenue are constructed for illustrations of the art, architecture, religion and life of the ancient nationalities: Egyptian, Assyrian, Roman and Saracenic people. There are two Egyptian Halls, an Assyrian Throne Room, a Roman House, larger and more splendid than that at Saratoga; Moorish Hall, a Lecture Hall with a painting 50 ft. x 9 ft. of Rome in the time of Constantine, and a Hall of the Model of proposed National Galleries of History and Art as



designed by Mr. Franklin W. Smith, and for the promotion of which the Halls of the Ancients have been constructed. This novel architectural enterprise originated with Mr. Smith, an archæologist who has become known to thousands for his previous accomplishments as exhibited in the Santa Monica (now Cordova) in St. Augustine, and the famous Pompeiian House of Pansa at Saratoga. See advertising page 30.

THE HALL OF THE MODEL is named from the models and drawings of the proposed National Galleries. At the front is a very beautiful model of the temple of Denderah. At the right is the façade of the proposed Assyrian court. Beyond these rise those of the Greek and Roman; Byzantine and Moorish; the East Indian and Mediæval courts. Each court is surrounded by ranges of galleries to receive paintings of the History of Egypt, Assyria.

Rome, Greece, etc.; with side corridors for plastic illustrations. Terraced upward to the Acropolis is a model of the Parthenon for a memorial temple of Presidents of the United States.

The Egyptian Halls of Gods and Kings.
THE HALL OF THE ANCIENTS.

THE SOLDIERS' HOME.

THE SOLDIERS' HOME.

SITUATED 3 miles nor. of the Capitol. Reached (best route) by the 7th street cars (transfer from Pennsylvania avenue cars) to boundary, thence Brightwood line. Or by Eckington and Soldiers' Home line, with walk of ¾-mile up-hill. Open daily, from 9 to sunset.

TWO landmarks are conspicuous upon the hills which encircle Washington—the colonnaded portico of Arlington House on the heights of Virginia in the west and the white tower of the United States Soldiers' Home on the rim of the hills on the north. It may be said that they mark in the west and in the north the geographical range of interest for the visitor in the Federal City. Neither of them should be omitted from one's itinerary.

Site

The Home is beautiful for situation; its Norman tower is a distinctly pleasing element of the landscape, and in turn the grounds give a much admired prospect of Washington, with the Capitol, the new Library, the Monument and the windings of the Potomac. A lovelier site would have been sought long in vain.

Purpose

The Soldiers' Home is for the benefit of men who have been honorably discharged from the regular army after twenty years' service, or who have been disabled by wounds or disease. Inmates are received for life, or for a shorter term. Accommodations are afforded for 800.

Of the five dormitory buildings, the principal one is the Scott Building, named in grateful memory of the founder of the Home, Gen. Winfield Scott. It is of white marble, with Norman battlements and a clock tower.

The Sherman Building is named in honor of Gen. W. T. Sherman, and the Sheridan Building after Gen. Philip H. Sheridan. The Anderson Building, named for Gen. Robert Anderson, in recognition of his early efforts in behalf of the Home, is popularly known as the President's Cottage. Several of the Presidents have spent the summer months here. The King Building is named after Surgeon B. King, who was long stationed here. Officers' Quarters, a Library with 7,000 volumes, the Chapel and the Hospital complete the group. Near the Chapel is a monument erected by the enlisted men of the army in memory of "Henry Wilson, the Soldiers' Friend." Just north of the grounds, in the National Cemetery, with its headstones in orderly array of nearly 7,000 soldiers, is the monument erected by the soldiers of the Home to the memory of Gen. John C. Kelton, Governor in 1892-93. The grounds comprise 512 acres of diversified lawn, slope and ravine. One view which is much admired is that from the knoll on which stands Launt Thompson's bronze statue of Gen. Scott. Another is an artificial vista cut through the trees with the distant Capitol in the center.

National Cemetery

THE CURTIS-LEE MANSION AT ARLINGTON.

ARLINGTON.

THE ARLINGTON NATIONAL CEMETERY, on the Virginia hills beyond the Potomac, is open daily, Sunday included, from sunrise to sunset.

The Washington, Arlington & Falls Church Railway (trolley), connecting with Pennsylvania avenue green cars and transfer coaches across the Aqueduct Bridge, run half-hourly to the Fort Myer Gate at the top of the hill. Roud trip on cars, 15 cents. For schedule see advertising page.

Trains of the Washington, Alexandria & Mt. Vernon Railway (trolley), leaving the station at 13½ street and Pennsylvania avenue hourly, take one to the Sheridan Gate of the cemetery, at the foot of the hill. Round trip, 20 cents. For schedule see advertising page.

Wagonettes of the Arlington Transfer Co. meet all trains or cars as above at the Cemetery gates to convey visitors through the Cemetery and Fort Myer. See fuller notice in advertising pages.

AT ARLINGTON sleep 16,000 soldiers who died in the War for the Union. It is consecrated ground, to which come thousands every year from the North and the South, the East and the West, to honor those "who gave their lives that the country might live." It is a worthy pilgrimage. Just as one may not comprehend in its fullness the outward and material beauty of Washington who has not looked upon the city as a part of the noble prospect from Arlington House, so he has not caught the finer essence of what Washington stands for as the Capital of the Nation who has not within the sacred precincts of Arlington Cemetery been brought closer to the four years of sacrifice and felt his patriotism quicken at the contact.

General Gates

One route is through Georgetown, across the Aqueduct Bridge, and passing through the reservation of Fort Myer to the Fort Myer gate. The other route takes us across the historic Long Bridge to the memorable gates, one of them named for Ord and Weitzel; another for Sheridan, its columns inscribed also with the names of Scott, Lincoln, Stanton and Grant; and a third for McClellan. By whatever gate we enter the grounds we shall come to Arlington House, whose portico columns we have seen from Washington.

The house is now occupied by the superintendent of the grounds. In the room on the left of the hall, formerly the main drawing room, a register is kept, in which visitors are requested to record their names. On the walls are hung sketch-plans of the cemetery, and framed copies of addresses and orations becoming the place; chief among these is President Lincoln's Gettysburg Address, spoken at the dedication of the Gettysburg National Cemetery, on Nov. 19, 1863:

The Gettysburg Address

Fourscore and seven years ago our fathers brought forth on this continent a new nation, conceived in liberty, and dedicated to the proposition that all men are created equal. Now we are engaged in a great civil war, testing whether that nation, or any nation so conceived and so dedicated, can long endure. We are met on a great battlefield of that war. We have come to dedicate a portion of that field as a final resting place for those who here gave their lives that the nation might live. It is altogether fitting and proper that we should do this. But, in a larger sense, we cannot dedicate—we cannot consecrate—we cannot hallow this ground. The brave men, living and dead, who struggled here have consecrated it far above our poor power to add or detract.

The Gettysburg Address

The world will little note nor long remember what we say here, but it can never forget what they did here. It is for us, the living, rather, to be dedicated here to the unfinished work which they who fought here have thus far so nobly advanced. It is rather for us to be here dedicated to the great task remaining before us—that from these honored dead we take increased devotion to that cause to which they gave the last full measure of devotion—that we here highly resolve that these dead shall not have died in vain; that this nation, under God, shall have a new birth of freedom; and that government of the people, by the people, for the people, shall not perish from the earth.

The Arlington View

The mansion stands on the brow of the hill, whose slope stretches away a half mile to the Potomac, 200 feet below. The view here opening before one has been famed for a century. When Lafayette was a guest at Arlington House he pronounced the prospect from its porch one of the most beautiful he had ever looked upon. The traveler of to-day, although coming like Lafayette from distant lands, may still pronounce the scene one of the rarest he has beheld.

Below flows the placid Potomac, from whose further shore rise Georgetown and Washington; and beyond the encircling hills roll away to the horizon's rim. In the far north stands out the white tower of the Soldiers' Home; in the south are the spires of Alexandria. The view is wide and far-reaching, and it has many attractions upon which the eye lingers long; but Washington is ever its central and commanding feature. So Federal City and National Cemetery stand here close together and look each upon the other. And this is well. For if it must needs have been that the men who rest at Arlington should die for their country, what more fitting than that in the bivouac of the long night they should sleep on the heights overlooking the Capitol itself, close to the heart of the Nation they gave their blood to maintain?

The Grounds

The grounds of Arlington are noble in contour and adornment. The art of the landscape gardener has beautified the surroundings; there are flower beds and lawns, and a profusion of ornamental trees and shrubs. But above what the skill of man has done, and beyond it all, one recognizes the majestic beauty of the site itself, with its slopes and ravines and the hillsides crowned with oaks. It is as if through long centuries nature herself had lovingly moulded the spot, making it ready for its final great purpose, the resting place of the Nation's heroic dead.

Temple of Fame

The means employed to give a military and national character to Arlington are simple and dignified. All the day through the Stars and Stripes float from the staff before the house, until the sunset gun of Fort Myer sends its echoes answering from shore to shore. In the garden plot to the south rises the Temple of Fame, an open circular colonnade, with low-domed roof; the cornice bears the names of Washington, Lincoln, Grant and Farragut; and on the columns are those of Thomas, Meade, McPherson, Sedgwick, Reynolds, Humphreys, Garfield and Mansfield. The beds of the flower gardens are arranged in patterns to form the names of the great commanders and symbols and badges of army corps. Disposed here and there about the grounds are bronze tablets inscribed with the solemn measures of Col. Theodore O'Hara's elegiac, "The Bivouac of

THE FIELD OF THE DEAD.

THE MANSION FROM THE SLOPE.

The Bivouac of the Dead

the Dead." The poem was read at the dedication of a monument at Frankfort to the memory of the Kentucky soldiers killed in the Mexican War, whose remains had been gathered for burial in their own land.

THE BIVOUAC OF THE DEAD.

The muffled drum's sad roll has beat
The soldier's last tattoo;
No more on Life's parade shall meet
That brave and fallen few.

On Fame's eternal camping-ground
Their silent tents are spread,
And Glory guards, with solemn round,
The bivouac of the dead.

No rumor of the foe's advance
Now swells upon the wind;
No troubled thought at midnight haunts
Of loved ones left behind.

No vision of the morrow's strife
The warrior's dream alarms,
No braying horn nor screaming fife
At dawn shall call to arms.

The neighing troop, the flashing blade,
The bugle's stirring blast,
The charge, the dreadful cannonade,
The din and shout are past.

Rest on, embalmed and sainted dead!
Dear as the blood ye gave!
No impious footsteps here shall tread
The herbage of your grave.

Nor shall your glory be forgot
While Fame her record keeps,
Or Honor points the hallowed spot
Where Valor proudly sleeps.

Nor wreck, nor change, nor Winter's blight,
Nor Time's remorseless doom,
Shall dim one ray of holy light
That gilds your glorious tomb.

Decoration Day

There is a sylvan temple where the services of Decoration Day are held; it is an amphitheater formed by an embankment of earth, green with turf and shaded with trellises of vines. The reading desk of the rostrum is of marble in classic design, and ornamental stone columns support the latticed roof of green. In the southeast part of the plateau a grove of maples has been planted after the plan of a Gothic cathedral, with overarching aisles, which will grow in stateliness and grandeur as time goes on.

Field of the Dead

The most impressive sight at Arlington is that of the field of the dead, on the level plateau, where the headstones stretch away in lines endless to the vision. The stones are set in rows, uniform in distance one from the other, arrayed in order and marshaled as battalions for review, a silent army of 16,000 strong. The headstones are of the simple pattern adopted in the year 1872 for all of the National Cemeteries—here, at Gettysburg, Chattanooga and elsewhere. On each marble or granite slab is inscribed the name of the soldier whose grave it marks, with his State and the number by which he has been enrolled in the Roll of Honor—the roster kept by the War Department of those who died in the service of the country; it consists of thirty-one volumes and contains the records of 250,000 deceased Union soldiers.

Most of the graves at Arlington are on the plateau toward the Fort Myer reservation; down below, under the hill by the Ord and Wietzel gate, is another field, which contains 5,000 graves.

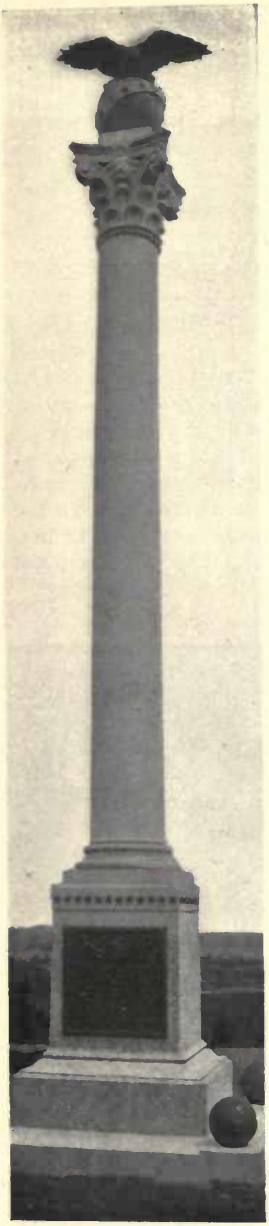
Near the Temple of Fame, whose columns proclaim the distinguished names thus chosen for peculiar honor, stands another memorial, the monu-

ment of the Unknown Dead. Two thousand one hundred and eleven nameless soldiers are gathered here in one common grave, deprived of the individual measure of fame which each one by his daring and dying merited, and denied the poor desert of recognition, even of identification. Their names, their homes, their friends, all were unknown. The simple story is told in the letters chiseled on the monument's granite face: **The Unknown Dead**

BENEATH THIS STONE
REPOSE THE BONES OF TWO THOUSAND ONE HUNDRED AND ELEVEN UNKNOWN SOLDIERS
GATHERED AFTER THE WAR
FROM THE FIELDS OF BULL RUN AND THE ROUTE TO THE RAPPAHANNOCK.
THEIR REMAINS COULD NOT BE IDENTIFIED BUT THEIR NAMES AND DEATHS ARE
RECORDED IN THE ARCHIVES OF THEIR COUNTRY, AND ITS GRATEFUL CITIZENS
HONOR THEM AS OF THEIR NOBLE ARMY OF MARTYRS. MAY THEY REST IN PEACE.
SEPTEMBER, A. D. 1866.

The slope east of Arlington House has been set apart for the graves of officers. In front of the house near the flagstaff are the graves of General Philip H. Sheridan (1831-1888) and Admiral David D. Porter (1814-1891). Sheridan's resting place is marked by a dignified monument of granite and bronze, adorned with a medallion portrait with flag and wreath. The simple stone at Porter's grave is to be replaced by a monument. To the south, in line with these, are the graves of Purveyor-General J. H. Baxter, Colonel Hiram Berdan of the First United States Sharpshooters, and **Sheridan and Porter**

THE SHERIDAN MONUMENT AND TEMPLE OF FAME.



SPANISH WAR MONUMENT.

General George Crook (1828-1890). The bronze panel of the Crook monument depicts the scene of the Surrender of Apaches under Geronimo to General Crook in the Sierra Madre Mountains, Mexico, 1883.

Another section of the grounds reserved for officers is west of the house, beyond the amphitheater, toward the Fort Myer gate. Here are memorials of those who fought in the Civil War and earlier conflicts. Conspicuous is the sarcophagus of Quartermaster-General M. C. Meigs, upon whose suggestion to President Lincoln in 1864 the estate was converted into a military cemetery. Among other monuments are those of Belknap, Burns, Harney, Hazen, Kirk, Lyford, Paul, Plummer, Ricketts—hero of twenty-seven battles, in five of which he was borne wounded from the field—Shelby, Stedman and Van Dachenhausen. Stones worn with age mark the graves of eleven Revolutionary officers. In accordance with a privilege given to the wives and daughters of soldiers buried at Arlington, many a woman's grave is here beside that of the husband or the father.

Gen. Lawton's grave is southeast of the Temple of Fame. Many of the men who perished in the Spanish and Philippine wars are buried at Arlington; our illustration shows the noble shaft erected to their memory.

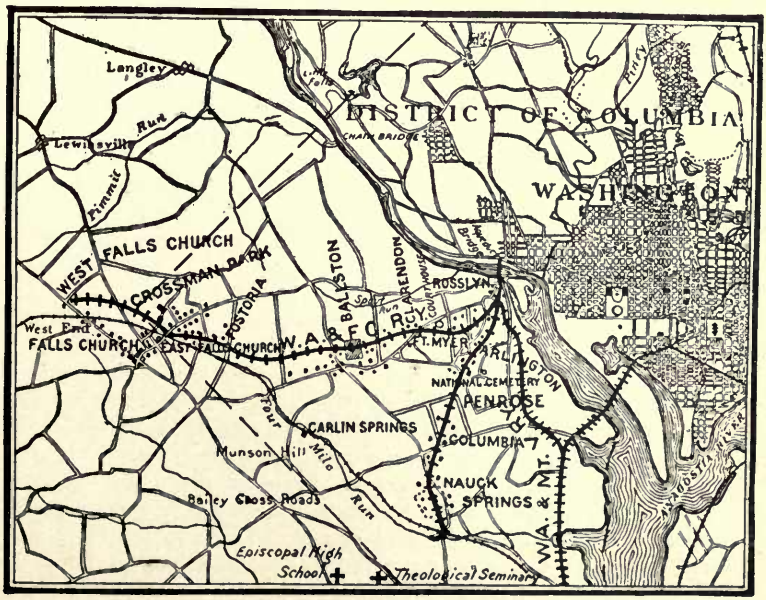
Arlington House was built in 1802. The portico with its great Doric columns was modeled after that of the Temple of Theseus at Athens. In the rear are the original servants' quarters; the water tower is new. The builder of Arlington was George Washington Parke Custis, son of John Parke Custis, whose widowed mother became Mrs. Martha Washington. When Col. John Parke Custis died at the siege of Yorktown, Washington adopted as his own the two children, George Washington Parke Custis, and Eleanor Parke Custis. Thenceforward Custis was a member of the Mount Vernon household, until after the death of Mrs. Washington in 1802, when he removed to his Arlington estate. Enjoying honored distinction as the adopted son of Washington, and entertaining with lavish hospitality, he drew to Arlington annual hosts of visitors and friends. Lafayette was among the distinguished guests here; and there came many another of the friends of Washington, to rehearse their recollections

of the men and the events of Revolutionary days. The rooms of the mansion were stored with a rich collection of Washington mementos and memorials—most of them brought from Mount Vernon—portraits, pictures, silver table service, and household furniture and ornaments. Some of these are now in the National Museum, and others are in their original places at Mount Vernon. Custis died in 1857. The marble shafts which mark his grave and that of his wife, Mary Lee Custis, are in a retired spot, near the limit of the southwestern plateau, in line with the two rows of headstones which begin at the avenue with Nos. 6568 and 6569. **Arlington House**

Upon the death of Custis Arlington passed to the children of his only daughter, Mary Custis Lee, wife of Col. Robert E. Lee, of the United States Army, to whom she had been married in 1831 in the drawing room of Arlington House, where to-day visitors register their names. When the Civil War came, Col. Lee resigned from the Federal service; on April 22, 1861, he left Arlington, and with his family went to Richmond, there to take command of the Virginia troops, and afterward to become the Commander-in-Chief of the Confederate Army.

Hardly had the Lees gone out when the Federal troops took possession, and converted the mansion into a headquarters and the grounds into a camp. Then, as the war went on and battles were fought, a hospital was established here; and when other available cemetery grounds no longer sufficed for the burial of the dead, the level plateaus and grassy slopes of Arlington were by order of Quartermaster-General Meigs devoted to the purpose of a military cemetery. The first grave prepared was for a Confederate prisoner who had died in hospital. The total number of dead buried at Arlington during the war and since is about 17,000.

In the year 1864 the property was sold for delinquent taxes, and the Government bought it, paying $26,100. In 1877 George Washington Custis Lee, heir under the Custis will, established his legal title to the property, and the claim was adjusted to his satisfaction by the payment to him by the United States of the sum of $150,000.



MAP OF ARLINGTON AND VICINITY.

MOUNT VERNON.

MOUNT VERNON is on the Virginia shore of the Potomac, 16 miles south of Washington. It is open to visitors daily except Sunday from 11 to 5 in the term from May 1st to November 1st, and from 11 to 4 from November 1st to May 1st. An admission fee of 25 cents is charged.

The trip by the steamboat Chas. Macalester gives a delightful sail down the Potomac. The boat leaves wharf at 7th and M streets; reached by all car lines. For schedule see advertising page.

The all-rail route is by the Washington, Alexandria & Mt. Vernon Railway (trolley) from station, 13½ street and Pensylvania avenue. For schedule see advertising page.

THE Mansion House of Mount Vernon occupies a beautiful sit overlooking the river. It is of wood, cut and painted to resemble stone. The building, 96x30-ft., has two stories and an attic with dormer windows; the roof is surmounted by a cupola, with an antique weather-vane. In front extends a piazza 15-ft. deep and 25-ft. high, with square pillars, and a floor tiled with flags from the Isle of Wight. Two kitchens are connected with the central building by colonnades. In front of the house are shaded lawns, and a deer park below; in the rear are lawns, gardens and orchards; and disposed about the grounds are the outbuildings of a Virginia farm. The main hall of the house extends through from front to back; the six rooms on the first floor are the Banquet Room, Music Room, West Parlor, Family Dining Room, Mrs. Washington's Sitting Room and the Library. But before noting the rooms and their objects of interest, we shall do well to review briefly the story of Washington's home and its preservation by the Mount Vernon Ladies' Association of the Union.

History

The house was built in 1743 by Lawrence, half-brother of George Washington. The name of Hunting Creek Estate was changed to Mount Vernon in honor of Admiral Vernon, under whom Lawrence had served against Spain. On the death of Lawrence and of his only daughter, Washington inherited the estate, and came to live here soon after his marriage in 1759. Here he conducted his farm until called to the field; to Mount Vernon he returned after Yorktown, and again after his terms as President; and here he lived in dignified retirement as a private citizen until his death in 1799. The associations of Washington with the place during his lifetime and the presence of his tomb here made Mount Vernon a shrine of patriotism. When in 1855 John Augustine Washington, being without means to maintain the estate, offered it for sale, a patriotic daughter of South Carolina, Ann Pamela Cunningham, resolved to save the Washington home as a permanent shrine of patriotism. With a high courage, which in its very daring augured success, she devoted herself to the tremendous task of raising the sum of $200,000 required for the purpose. In 1858 the Mount Vernon Ladies' Association of the Union was organized, with Miss Cunningham as Regent and Vice-Regents representing twelve States. Contributions were solicited and popular support was enlisted. Edward Everett gave the proceeds of his lecture on Washington and of certain writings, and thus put into the Association treasury

Mount Vernon Ladies' Association

the handsome sum of $69,000 as his personal contribution. Washington Irving contributed $500; thousands upon thousands of school children gave five cents each. The full sum was in hand before the end of 1859, and in 1860 Mount Vernon became the property of the Association, and so of the Nation. A further fund was provided for permanent care and maintenance. Portions of the original estate which had been sold have been acquired again; buildings which had fallen into ruin have been restored; the deer park under the hill has been restocked; the mansion has been repaired; many articles of furniture and adornment have been restored to the several rooms; and numbers of valuable relics and mementos of George and Martha Washington and of their times have been deposited here. The restoration, equipment and keeping of the respective rooms have been intrusted to the pious care of the women of the different States represented in the Board of Vice-Regents. The privilege of visiting Mount Vernon, and the satisfaction of knowing that it is a possession to be cherished for all time, we owe to this Ladies' Association, and beyond it to Ann Pamela Cunningham. The Home and the Tomb of Washington will have for us added interest if thus we shall see in them a monument of the patriotic impulse, courage and achievement of the women of America.

Portions of the original estate which had been sold have been acquired again; buildings which had fallen into ruin have been restored; the deer park under the hill has been restocked; the mansion has been repaired; many articles of furniture and adornment have been restored to the several rooms; and numbers of valuable relics and mementos of George and Martha Washington and of their times have been deposited here. The restoration, equipment and keeping of the respective rooms have been intrusted to the pious care of the women of the different States represented in the Board of Vice-Regents. The privilege of visiting Mount Vernon, and the satisfaction of knowing that it is a possession to be cherished for all time, we owe to this Ladies' Association, and beyond it to Ann Pamela Cunningham. The Home and the Tomb of Washington will have for us added interest if thus we shall see in them a monument of the patriotic impulse, courage and achievement of the women of America.

"No gilded dome swells from the lowly roof to catch the morning or evening beam; but the love and gratitude of united America settle upon it in one eternal sunshine. From beneath that humble roof went forth the intrepid, unselfish warrior, the magistrate who knew no glory but his country's good; to that he returned, happiest when his work was done. There he lived in noble simplicity, there he died in glory and peace. While it stands, the latest generations of the grateful children of America will make this pilgrimage to it as to a shrine; and when it shall fall, if fall it must, the memory and the name of Washington shall shed an eternal glory on the spot."—EDWARD EVERETT.

The several rooms have been assigned to the particular care of various Vice-Regents, and by others restorations have been made as follows: Alabama—The main hall. California—Restoration of wharf. Connecticut—Spare chamber. Delaware—One of the guest chambers. District of Columbia—Guest chamber. Georgia—Mrs. Washington's sitting room. Illinois—West parlor. Kansas—Restoration of servants' quarters. Louisiana—Restoration of summer house and of piazza tiles. Maine—Guest chamber. Maryland—Miss Custis's room. Massachusetts—Library. Michigan—The old tomb. Minnesota—One of the upper chambers. Missouri—Restoration of garden wall. New Jersey—Lafayette's room. New York—Banquet hall. North Carolina—Northwest upper chamber. Ohio—East parlor or music room. Pennsylvania—River room. Rhode Island—Restoration of sundial; also a room in the east quarters. South Carolina—Family dining room. Tennessee—One of the upper rooms of the old servants' quarters. Virginia—Room in which Washington died. West Virginia—Green room. Wisconsin—Room in which Mrs. Washington died. The arms of the States are displayed in the respective rooms. We note briefly some of the most interesting relics and memorials in the mansion. An asterisk (*) signifies that the article belonged to Washington.

Main Hall IN THE MAIN HALL.—Key of the Bastille; sent by Lafayette to Washington after the capture of the prison; wrought iron, 7-in. in length. With it came the model of the Bastille which is in the Banquet Hall. Originally a fortress of Paris, the Bastille was converted into a state prison, and was hated by the people as an institution of despotism. One of the first events of the French Revolution was the storming of the Bastille by the Paris mob, July 14, 1789. Lafayette wrote with the gift: "Give me leave, my dear general, to present you with a picture of the Bastille, just as it looked a few days after I ordered its demolition, with the main key of the fortress of despotism. It is a gift which I owe as a son to my adopted father, as an aid-de-camp to my general, as a missionary of liberty to its patriarch."

Facsimile of Lafayette's Agreement to Serve in the American Army, with rank of Major-General; the contract was made with Silas Deane in Paris, 1776.

Three of Washington's swords. A clause of Washington's will read:

"To each of my nephews, William Augustine Washington, George Lewis, George Steptoe Washington, Bushrod Washington and Samuel Washington, I give one of the swords, or *cutteaux*, of which I may die possessed, and they are to chuse in the order they are named. The swords are accompanied with an injunction not to unsheath them for the purpose of shedding blood, except it be in self defense or in defense of their Country and its rights, and in the latter case to keep them unsheathed and prefer falling with them in their hands to the relinquishment thereof."

Three of the swords are preserved here: (1) The one chosen by B. Washington—a dress sword, its blade inscribed (in Latin): "Do what is right;" and "Fear no man." Presented by W. F. Havemeyer, of New York. (2) The one chosen by Lewis—a dress sword, worn at the Annapolis resignation, at the New York inauguration and on state occasions. (3) The one chosen by G. S. Washington. This was presented to Washington by Theophilus Alt, a celebrated sword maker of Solingen, Prussia. The scabbard bears a German inscription, which translated reads: "Destroyer of Despotism, Protector of Freedom, Glorious Man! Accept from my son's hand this sword, I pray thee. THEOPHILUS ALT." The sword was presented to the Association by Miss Alice L. Riggs, of Washington.

Discharge papers of a soldier of the Revolution, signed by Washington, copy of a print owned by Washington. The Sortie of the Garrison of Gibraltar. Engravings of Trumbull's paintings—Bunker Hill and Death of Montgomery. The clock on the stairs was presented by New Jersey. The table belonged to W. A. Washington.

East Parlor IN THE EAST PARLOR, OR MUSIC ROOM.—Harpsichord, imported from London (cost $1,000) as bridal present from Washington to Nellie Custis. Presented to the Association in 1860 by Mrs. Robert E. Lee. Many of the ivories are missing. Flute,* rosewood, silver mounted. Panel of coach.* Card table* on which Washington and Lafayette played whist. The guitar and music book belonged to Washington's cousin, Mrs. Fauntleroy. The Venetian mirror is similar to one which hung here, and the up-

EAST PARLOR OR MUSIC ROOM.

holstering, in musical and floral designs, is a reproduction of the original. **East Parlor**
Photo copy of pastel of Nellie Custis when a girl.

In the cabinet: Plan* of piazza tiles, spectacles,* Pallissy china figure,* champagne glasses,* preserve dish,* steel camp fork,* cans,* silver heel of slipper worn by Martha Washington; blue and gold dishes, part of the dessert set given by Lafayette. The china plate was Mrs. Fauntleroy's. Lock of Washington's hair. Photograph of Uzal Knapp, last survivor of Washington's Life Guard; born at Stamford, Conn., 1758; died at New Windsor, N. Y., 1856; his grave is at the foot of the flagstaff before Washington's Headquarters at Newburgh.

In the West Parlor the window cornices and curtain bands are **West Parlor**
relics of the days before George Washington came to live here, and the painting of Vernon's Fleet, which hangs over the mantel, is one the Admiral presented to Lawrence Washington; the family arms are displayed here. Several of the chairs belonged to Washington; the chair in brown and gold was in the dining room. The white enamel chair, with pink and cream brocaded satin, came from the Chateau de Chavagniac, the birthplace of Lafayette; it was presented to the Association by Senator Edmond de Lafayette, a grandson of the Marquis. Another reminder of the part of France in the Revolutionary War is found in the portrait of Louis XVI., which is from the same plate as, and supplies the place of, the portrait which Louis sent to Washington as a token of his esteem. The rug was made by order of Louis XVI. of France for Washington, but as the President was not permitted to receive presents from foreign powers, it

was sold, being bought by Judge Jasper Yates, of Lancaster, Pa., by whose great granddaughter, Mrs. Sarah Yates Whelen, it was presented to the Regents in 1897. It is of a dark green ground; in the centre is the American eagle surrounded with stars.

Library

IN THE LIBRARY one notes, not without curiosity, the titles of the books which made up the reading of the master of Mount Vernon, as soldier, statesman and farmer; for while the books are not those actually owned by Washington, they are for the most part duplicates of such works as were here in his day. Nearly the whole of the original Washington library is now in the Boston Athenæum. Within the bookcase is Washington's silver inkstand, with silver snuffers and tray.

Among the other relics of Washington are two chairs; a surveyor's tripod. The copies of Stuart's unfinished portraits of George and Martha Washington are justly admired; the originals, owned by the Boston Athenæum, are in the Museum of Fine Arts in Boston; they were painted from life in 1795. This Stuart is known as "the standard head" of Washington, and the portraits are the ones which have been chosen for reproduction in this volume. The bronze bust is from the original by Houdon. There are medallions of Washington and Lafayette. A plaster-of-paris globe,* and a photo of Gilbert Stuart; portrait of John Adams. A frame contains portraits of sixty generals of the Revolution.

Family Dining Room

THE FAMILY DINING ROOM is adorned with a Chippendale sideboard which belonged to Washington, and was presented to the Association by Mrs. Robert E. Lee. The china in the corner cupboard is a reproduction of the set presented to Mrs. Washington by the officers of the French fleet in 1792; each piece is inscribed with the monogram M. W. in a wreath of olive and laurel, and with a chain whose links contain the

WASHINGTON'S LIBRARY.

BANQUET HALL.

names of the fifteen States of the period. The liquor case was presented to Washington by Lord Fairfax. Among contemporary furnishings are two cutlery cases, a cut glass decanter, andirons and fender from the Rutledge home. The fireplace backing is from Belvoir, the country home of Lord Fairfax. There is a bust of Washington with the jewel of a Grand Master. Generals Moultrie, Pickens, Marion and Sumter and Baron De Kalb are represented by portraits in oil; and there is a portrait of Miss Cunningham, with whom originated the purpose of preserving Mount Vernon. The stucco ceiling is the original; it has been repaired and painted.

Mrs. Washington's Sitting Room

In Mrs. Washington's Sitting Room is a mirror on a card table and a mirror used in the Philadelphia house occupied by the Washingtons; a framed copy of the Wahington pedigree; candelabrum and silver candlestick owned by the Washington family; an engraving of Savage's Washington; four prints which hung here in Washington's day—The Siege, two of The Defense, and the Relief of Gibraltar. There is also a portrait of Miss Cunningham.

Banquet Hall

In the Banquet Hall.—The central ornament is the mantelpiece, of Carrara and Siena marble, carved in Italy and presented to Washington by Samuel Vaughan, of London. The story goes that on its way to America the mantel was taken by French pirates, who sent it to its destination uninjured when they learned that it belonged to Washington. The panels, attributed to Canova, are carved to represent pastoral scenes. The stucco designs of the ceiling and walls, symbolic of agriculture, are

Banquet Hall suggestive that the host who presided here was himself a farmer. On a mahogany claw-foot dining table, after the style of the one here originally, is seen the plateau of mirrored glass and silver used by Washington on occasions of state dinners.

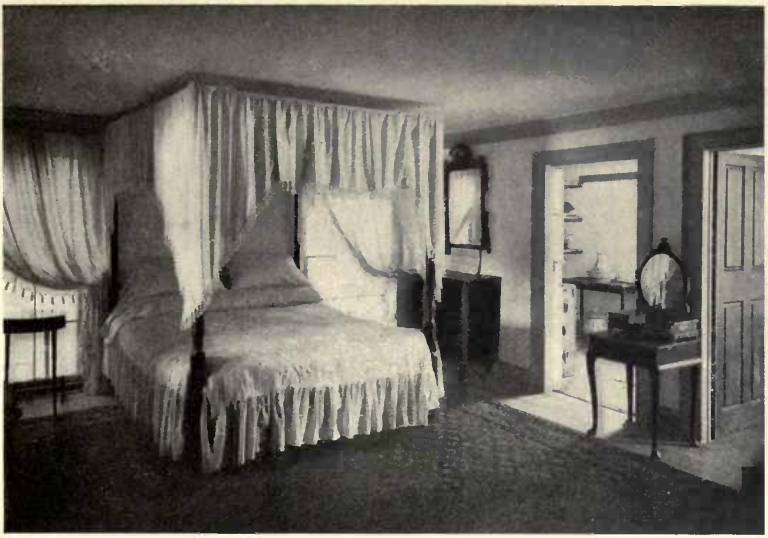
The most notable portrait is Rembrandt Peale's Washington before Yorktown; the canvas contains also portraits of Hamilton, Knox, Lincoln, Lafayette and Rochambeau. The walnut frame was made from a tree on the estate of Robert Morris. Other portraits are: Copy, by Clark Mills, of Houdon's bust; copies of originals by Stuart, Trumbull, Elizabeth Sharpless; a miniature by Bone after the Lansdowne Stuart; and a silk copy woven in black and white of the Stuart head, done in France. There is a copy of Richardson's "Character of Washington." The silken banner with the arms of Great Britain was presented by General Grant. The two oil paintings* (by Beck) of the Great Falls of the Potomac, and the Potomac above the Great Falls hang in the dining room; they were painted from points chosen by Washington. There is a water color of Sulgrave Manor, the English home of the Washingtons; Washington College, Little Brington and Great Brington Church (containing tombs of the Washingtons), England.

Other objects in this room which belonged to Washington are: Model of the Bastille, French clock, two porcelain vases and two silver bracket lamps, mirror with coat-of-arms, two mahogany flower-stands, foot-bench formerly in his pew in old Trinity Church in New York, portrait of David Rittenhouse.

In the cabinet is shown Washington's punchbowl, presented by Mrs. J. V. R. Townsend, of New York, Regent. A strand of Washington's hair; and one of Martha Washington's. Copy in silk embroidery by a daughter of Sharpless of that artist's portrait of Washington. Satin belt worn by one of the 3,000 schoolgirls who in 1824 welcomed Lafayette. Cup belonging to Col. Jno. Washington; plate belonging to Chas. Washington; mustard cup used by Washington. Champagne glass* and jelly glasses.*

In the sideboard, which was given by the grandsons of Eleanor Parke Custis, are spoon,* topaz shoe-buckle,* button from military uniform,* Japanese dressing case,* silver toilet articles.* Some of the Mt. Vernon china. Mrs. Washington's needle book. Old point lace worn by Mrs. Washington; chair cushion worked by her; three letters written by her to Nellie Custis; two letters written by C. P. Custis to his mother. Bit of Washington's coffin. The sideboard also contains Martha Washington's ivory fan, exquisitely carved and painted, and remnants and pieces of dress goods worn by her. A brick from Fraunce's Tavern, New York City, in which occurred Washington's "immortal farewell" to his officers.

Upper Rooms THE UPPER ROOMS.—In the Upper Hall the cabinet contains several relics of Washington, including a suit of clothes, a velvet waistcoat, silk stockings, compass, reading glass and fire buckets. A quilt and a piece of knitting were made by Washington's niece, Frances W. Ball. Quilt made by Mrs. Washington of pieces of her gowns for her nephew, Judge Halyburton; bedspread given by her to Ann Jacobus. Powder horn used by



THE ROOM IN WHICH WASHINGTON DIED.

minute man at Concord; one of the Charleville muskets brought to America by Lafayette.

Washington's Room

THE ROOM IN WHICH WASHINGTON DIED is the south bedroom; off from it open a dressing room and a linen closet. The furniture is that which was used by Washington; the bedstead is the one upon which he died, and on the chair, at the moment of his death, lay the open Bible from which Mrs. Washington had been reading to him. The mahogany table was here. The haircloth coach chest bears the intials G. W. and the date 1775; the chair cushions were embroidered by Mrs. Washington for her granddaughter, Eliza P. Custis; and the dimity chair cover, with its design of a vase of flowers, is a specimen of the needlework of Washington's niece, Frances Washington Ball. The large chair belonged to Washington's mother. Secretary* loaned by Gen. G. W. Custis Lee. The toilet case was Mrs. Washington's. In the hall are framed twenty-three portraits of Washington, presented by Hampton L. Carson.

Mrs. Washington's Room

MRS. WASHINGTON'S ROOM is in the attic. After the death of General Washington the south bedroom was closed, in accordance with a custom of the time, to be left vacant for the space of three years; and Mrs. Washington occupied the room directly above, choosing it because the dormer window overlooked the grave of her husband. It was here that she died. The furniture and hangings are reproductions of the originals.

Miss Custis's Room

MISS CUSTIS'S ROOM was the one occupied by Eleanor Parke Custis. It is quaintly furnished with high bed reached by carpeted steps, antique mirror, and chest of drawers with brass handles fashioned in the design of a recumbent lion. The table cover and the lion device of the stool were

MRS. WASHINGTON'S ROOM.

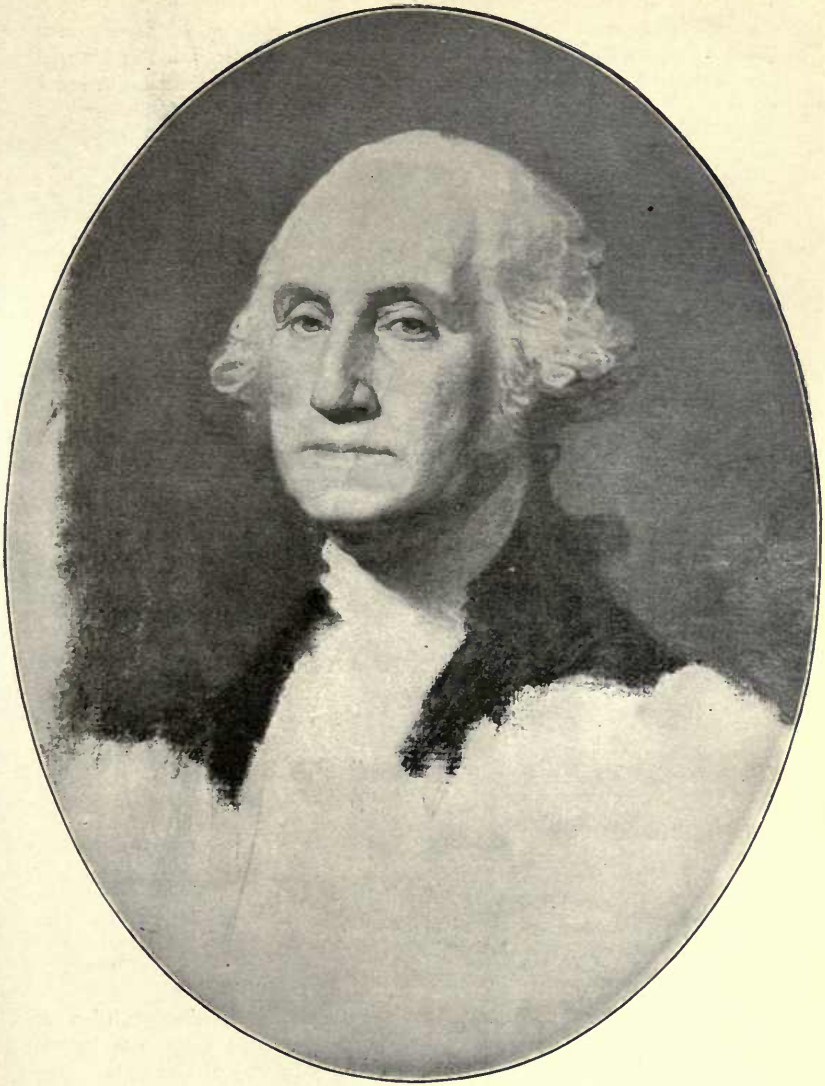
embroidered by her. The folding washstand and one of the chairs came from the home of Charles Carroll of Carrollton; and one reflects that these might have belonged to Nellie Custis herself, had she favored the suit of the son of Carroll, who came to Mount Vernon to seek her hand. On the mantel is a framed autograph letter of Lawrence Lewis.

Lafayette's Room

LAFAYETTE'S ROOM was the one which the Marquis occupied when a guest here. There is an engraved copy of the Lafayette portrait by Ary Scheffer (in the Capitol), and other pictures are engraved portraits of Washington (the Lansdowne Stuart), of Martha Washington, painted by Wallaston as the Bride of Mount Vernon; William Pitt and Baron Steuben. The walnut stand was made from wood from the estate of Robert Morris. The embroidered fruit piece is a specimen of the needlework of the days of the Revolution.

River Room

THE RIVER ROOM contains a chair which came to America with the Mayflower, or soon after. The bedstead was used by Washington in Pennsylvania in 1777. In the GREEN ROOM the bedstead is associated with the history of the Mount Vernon household; it belonged to Mrs. Washington's brother-in-law, Colonel Bassett, and was the one upon which John Custis died, at Eltham, during the siege of Yorktown. In one of the window panes, more than a hundred years ago, Eliza P. Custis, one of Mrs. Washington's grandchildren, cut with a diamond her name and the date Aug. 2, 1792; and it is here to-day. The mirror over the mantel and the corner chair belonged to W. A. Washington. In the cabinet: Pincushion made from Mrs. Washington's wedding dress; needle case made from dress worn



GEORGE WASHINGTON.

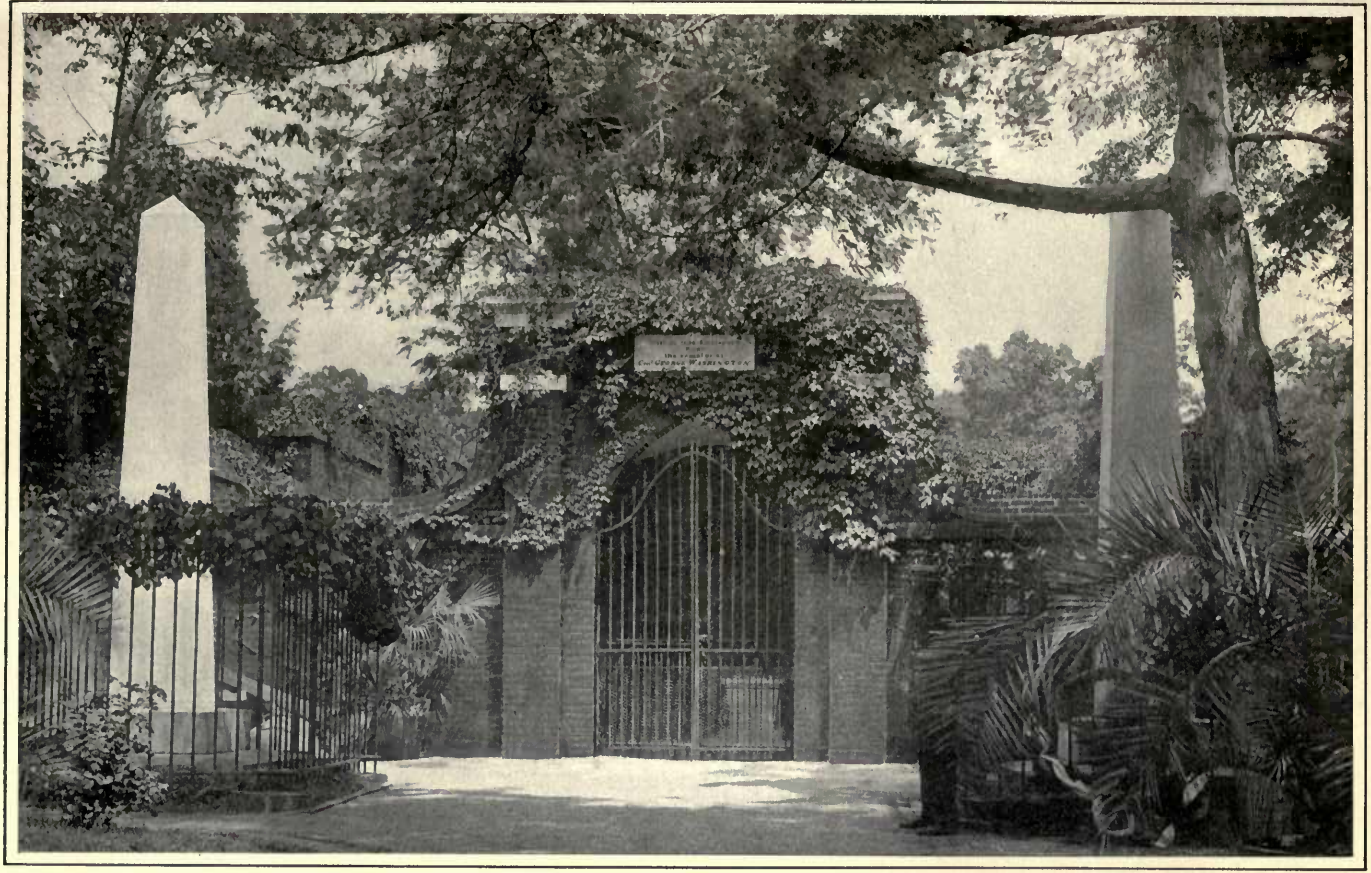
The Stuart Portrait in the Boston Museum of Fine Arts.

by her at last President's levee in Philadelphia; pen with which contract for purchase of Mt. Vernon was signed.

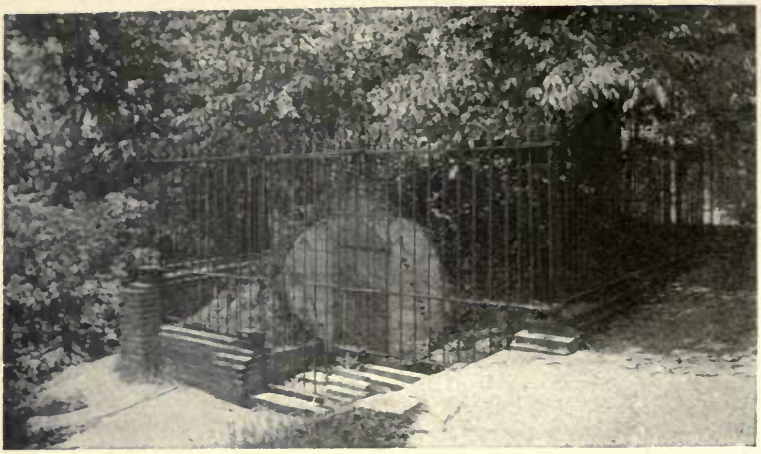
In the CONNECTICUT ROOM may be seen an old-fashioned fire screen, with adjustable frame, by which the embroidered shield may be raised or lowered at pleasure. Two cutlery cases attract attention in the NORTH CAROLINA ROOM, and the counterpane is valued for its age of a hundred years and more. The hornets' nest is from Mecklenburg county. Col. Tarleton

THE STUART PORTRAIT OF MARTHA WASHINGTON.
Painted from life in 1795.

called Mecklenburg the Hornets' Nest because of the fighting qualities of the Revolutionary soldiers who came from there. The English bedstead in the FLORIDA ROOM was brought to this country by way of Bermuda. The mahogany chairs in the DISTRICT OF COLUMBIA ROOM belonged originally to Mount Vernon. The upper north chamber contains a very curious old print, the Shade of Washington. It pictures the Old Tomb, with overhanging trees, whose trunks and branches are so disposed as to outline the shadowy form of Washington.



THE TOMB OF WASHINGTON.



THE OLD TOMB.

Upper Rooms THE RHODE ISLAND ROOM, one of the upper rooms in the restored east quarters, contains among other relics a table upon which was spread out for discussion the plans of the battles of Bunker Hill, Lexington and Concord. TENNESSEE'S ROOM here is furnished in Colonial style, with furniture made of Tennessee wild cherry.

Kitchen The culinary art is no longer practiced in the kitchen, although the crane still hangs in the great fireplace and the brick oven is well preserved; here one may buy milk, photographs, books and a copy of Washington's will. The old hominy mortar is in the superintendent's office. The outbuildings comprise the customary appendages of a Virginia home—butler's house, meat-house, wash-house, ice-house, spinning-house, greenhouse.

Sun Dial The sun dial on the west lawn was erected by citizens of Rhode Island in 1888, to replace the one which stood in this exact spot in the time of Washington. *Horas non numero nisi serenas,* runs the motto—I record none but sunny hours.

Tomb THE TOMB OF WASHINGTON is a severely plain structure of brick, with an arched gateway in front, above which a marble slab is inscribed, "Within this inclosure rest the remains of General George Washington." Above the door of the tomb are the words: "I am the Resurrection and the Life. He that believeth in Me, though he were dead, yet shall he live." In the ante-chamber are seen the two marble sarcophagi. The one on the right bears on its face the name of WASHINGTON, with chiseled coat-of-arms of the United States and a draped flag. One of the talons of the eagle in the coat-of-arms is missing; it was broken off by a vandal in war time. The other sarcophagus is inscribed, "MARTHA, Consort of Washington. Died May 21, 1801, aged 71 years." Curiously enough the date is an error; it should have read 1802. This tomb is known as the

New Tomb, in distinction from the original one, on the right of the path leading to the house. It was to the Old Tomb that Lafayette paid his memorable visit in 1824. In 1831 the tomb was broken into and rifled of a skull, which the dastard robber believed to be that of Washington, but was proved not to be. The new and more secure vault was then made ready, and the remains were transferred to it. In 1837, John Struthers, of Philadelphia, having hewn the two sarcophagi, each from a single block of marble, and presented them for the purpose, the remains of Washington and Martha his wife were intrusted to their final keeping, and the key of the vault was cast into the Potomac. Within the vault rest forty members of the Washington, Custis and related families. Near by are placed monuments to the memory of four of them: Judge Bushrod Washington, who inherited Mount Vernon; his nephew, John A. Washington, who succeeded him in the possession of the estate; Mrs. Eleanor Parke Lewis, who was Nellie Custis; and her daughter, Mrs. M. E. A. Conrad. **Tomb**

Interest attaches to several trees near the Tomb which have been planted as tributes to Washington. They may be identified by the numbers affixed to them: **Memorial Trees**

No. 1. Elm, planted in 1876 by Dom Pedro, Emperor of Brazil.
No. 2. Maple, planted Oct. 31, 1881, by the Temperance Ladies of America.
No. 3. British Oak, planted by request of H. R. H. Prince of Wales, to replace the memorial tree planted by him during his visit to Mount Vernon in 1860, which tree died.
No. 4. Planted Nov. 29, 1890, by the Sigma Phi Fraternity (a college society).

THE SUPERINTENDENT'S OFFICE, FORMERLY THE NORTH KITCHEN.

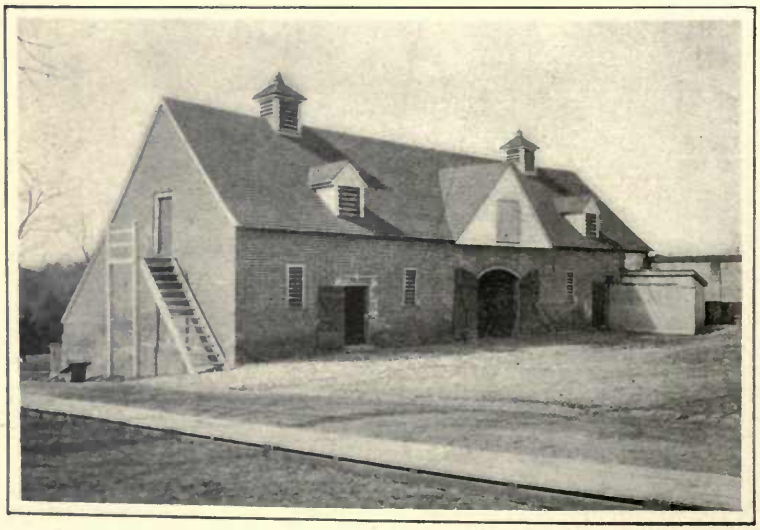
Memorial Trees

No. 5. Concord Elm, planted April, 1897, by the Children of the American Revolution
No. 6. White Oak, planted May 13, 1899, by the American Society of Civil Engineers
No. 7. German Linden, planted Feb. 27, 1902, by H. R. H. Prince Henry of Prussia.
No. 8. Elm, planted March 19, 1902, by the Phi Kappa Psi Fraternity (a college society).

Flower Garden

THE FLOWER GARDEN is quaint with boxwood hedges, which are reputed to have been set out more than a century and a half ago. In each plot on the side of the main walk the central space is occupied by a circular bed, around which are disposed four oval and four triangular beds, the whole forming a square. Some of the beds near the greenhouses are very intricate and curious in design. The Kentucky coffee tree was planted by Lafayette in 1824; and the four strawberry shrubs, or calycanthi, were sent to Washington by Jefferson from Monticello; John Augustine Washington named the shrubs after the four Presidents, Adams, Jefferson, Madison and Monroe. The hydrangea was planted here by Lafayette in 1824. A sago palm is the only greenhouse plant now living which was at Mount Vernon in Washington's day. At the foot of the garden is the famous Mary Washington rose, named by Washington for his mother. Slips of this rose, cuttings from the willow which came from Napoleon's grave at St. Helena, young palms from the sago, and a variety of shrubs and plants, are sold as souvenirs, the revenue thus obtained going to the support of Mount Vernon. For nearly thirty years the garden has been in charge of Mr. Franklin A. Whelan, to whose intelligent care its present admirable condition is largely due.

Washington devoted much attention to the selection and cultivation of trees for the adornment of Mount Vernon; and many which he set out



WASHINGTON'S BARN, MOUNT VERNON.

THE RIVER ROOM.

and cared for are still flourishing and command admiration. Near the butler's house is the magnolia which was brought by him from the James River in 1799, the last year of his life. **Trees**

The elm in one of the mounds near the entrance to the grounds was a slip from the Washington elm in Cambridge; it was sent to Mount Ver-

MOUNT VERNON FROM THE WEST.

UNT VERNON, VA.

non by Miss Alice Longfellow, Vice-Regent for Massachusetts, and planted by Mrs. Cleveland.

Barn THE BARN was built by Lawrence Washington in 1753 with bricks imported from England. In the coach house is Washington's carriage, known as the "lost coach," which was recovered and presented to the Association in 1895 by Mr. R. I. Brownfield, of Philadelphia. The summer-house in front of the mansion was restored with funds contributed by school children of Louisiana. The deer park under the hill, originally established by Washington in 1785, was restored in 1887 by the sons of the late Mrs. Robert Campbell, Vice-Regent for Missouri of the Mount Vernon Ladies' Association. It contains several Virginia deer.

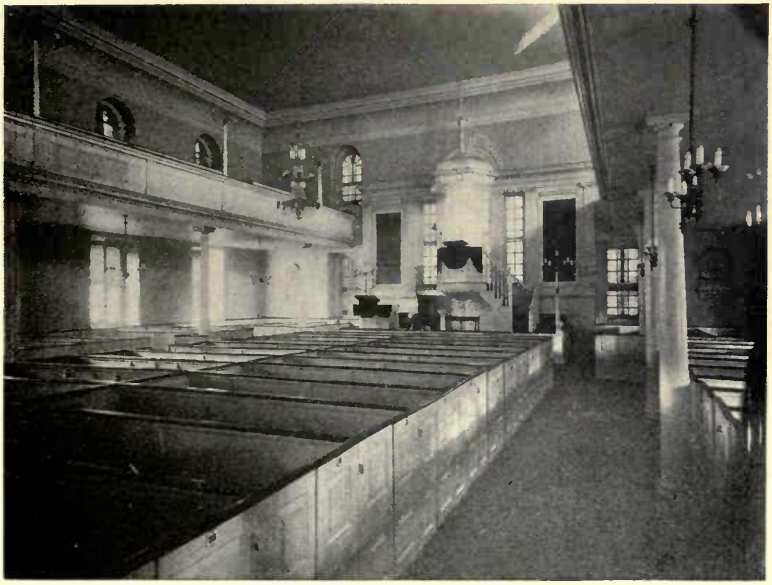
Deer Park

From Washington to Mount Vernon through Old Virginia.

The trip to Mount Vernon via the all-rail route of the electric trains along the beautiful Virginia shores of the Potomac River is a most enjoyable and interesting manner of making this patriotic pilgrimage. Competent guides accompany each train, who point out and explain the many points of historical and traditional interest in which the section traversed abounds. Leaving the conveniently located station at 13½ Street and Pennsylvania Avenue, these swift and comfortable electric trains pass the Washington Monument, Bureau of Engraving and Printing, and the Agricultural Department, and cross the Potomac into Virginia via the famous Long Bridge, across which the Federal armies marched in the Civil War. On the Virginia heights on the right is Arlington, the former home of Robert E. Lee and now the Arlington National Cemetery. It has already been described in an earlier chapter.

Steps of Old City Hotel where Washington made his last farewell address.

Fort Runyon, the base of the first picketing and skirmishing of the great civil strife; the old Chesapeake and Ohio Canal, first ground for which was broken by President John Quincy Adams, July 4th, 1828; Abington, the old colonial homestead where Nellie Custis, the adopted daughter of Gen. Washington, was born; the stream upon which Gen. Washington's mills were located; the old St. Asaph race track, and the heights upon which Gen. Braddock and his army camped before that disastrous campaign against the Indians in the Ohio Valley, are all pointed out and cleverly explained.



WASHINGTON'S PEW IN CHRIST CHURCH.

Alexandria

At Alexandria stop-over privilege is allowed in order that the many points of note may be visited. Christ Church, containing the unaltered pews of Gen. George Washington and Gen. Robert E. Lee, both of whom were vestrymen; the engine house of the old Friendship Fire Company, organized in 1774, and of which company Washington was a member; the Marshall House, where Col. Ellsworth met his tragic death for tearing down a Confederate flag at the outbreak of the Civil War; the old City Hotel, that historic hostelry, from the steps of which Washington gave his last military command in 1799, also his headquarters, and where the 22d of February was first celebrated at a "Birth-Night Ball" given in his honor; the Masonic Lodge room where Washington presided as worshipful master; the Carlyle House, built in 1752, Gen. Braddock's headquarters, and where Washington received his first commission, as well as numerous other places rich in the lore of colonial and Civil War time, annually attract thousands of tourists.

After leaving Alexandria, the Episcopal Theological Seminary, where Phillips Brooks and Bishop Potter graduated for the ministry; the Old Kings Highway, traveled by Washington on his way to and from Alexandria, and over which Sherman marched with his army from the sea; Mount Eagle, formerly the house of Byron Fairfax, son of William of Belvoir, and brother-in-law of Lawrence Washington, the founder of Mt. Vernon; the estate of Geo. Mason, author of Virginia's Constitution and Bill of Rights; the ancient settlement of Piscataway, where the first printing press was set up in the colonies, and which contains old Broad Creek

CHRIST CHURCH (WASHINGTON'S CHURCH).

Church, erected in 1694; Wellington, the home of Col. Tobias Lear, Gen. Washington's secretary; the old Yorktown road, down which came the armies of Washington, Lafayette and Wayne on their way to Yorktown in 1781, and the site of the Indian settlement of Assaomeck, where Capt. John Smith stopped and held parley with the Indians in 1607, all bring forcibly to mind the scenes and associations of this vastly interesting historical country. Fort Washington and Fort Hunt may be seen, shortly after which the terminus at Mount Vernon is reached. The round trip via this line may be made in three hours, allowing one hour and twenty minutes on the grounds.

ALEXANDRIA.

ALEXANDRIA is 8 miles from Washington. The route is via the Washington, Alexandria & Mt. Vernon Railway from station, 13½ street and Pennsylvania avenue.

PRESIDENT WASHINGTON'S pew in Christ Church, Alexandria, is still preserved as it appeared when occupied by the family. One may make the visit to Alexandria in connection with the Mount Vernon trip. The church is closed on week days, but the sexton is usually on the premises from 9 o'clock until 5, and will obligingly open the door on request. The church is on Washington street.

Christ Church

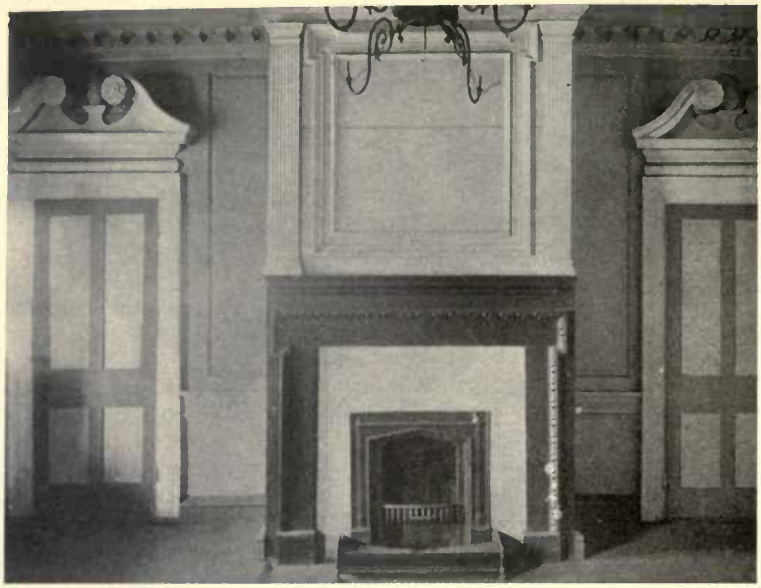
Fairfax Parish, to which Alexandria belongs, was created in 1765; and among the first vestrymen chosen was George Washington, then thirty-three years of age. Christ Church was completed on Feb. 27, 1773, and on the same day Colonel Washington subscribed the highest price paid for a pew, £36 10s., contracting further to pay for it an annual rental of £5 sterling.

The pews, which originally were square, were changed—all but Washington's—to the present style in 1860. Other alterations of the interior were made in later years; but a wiser afterthought has restored the church to the style of the Colonial days. The sounding-board and the wine-glass pulpit are facsimiles of the originals. The chancel rail and the mural tablets of the Lord's Prayer and the Apostles' Creed were here in Washington's time; the communion table, reading desk and chairs are those which were used then; and so likewise is the crystal chandelier of solid brass with its twelve candlesticks to typify the Twelve Apostles. In the old days candles were used to light the church; on the pillars may still be detected beneath the paint the marks of the sconces and tinder box. The baptismal font dates from 1818.

Washington's Pew

Washington's pew, Nos. 59 and 60, is on the left side, near the front, and is marked by a silver plate with facsimile of his autograph; it has two seats, one facing the other, and a third cross seat against the wall; the pew is now reserved for strangers. Across the aisle is the pew which was occupied by the Lees; its silver plate bears the name of Robert E. Lee in autograph. Twin mural tablets set in place in 1870 are inscribed in memory of George Washington and Robert Edward Lee.

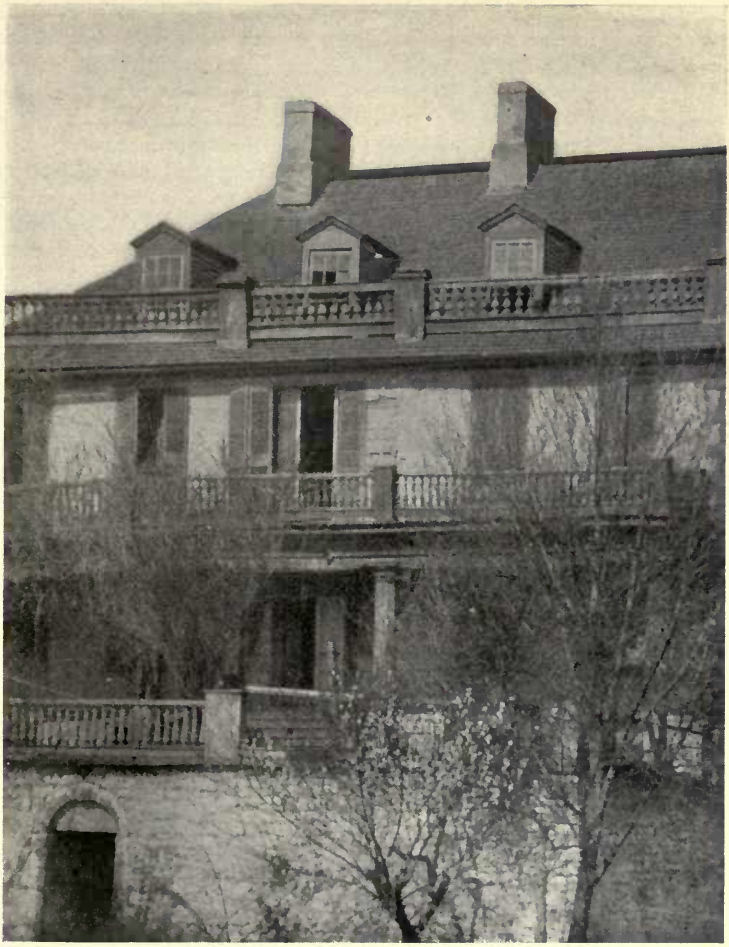
In the vestry room may be seen the record of Washington's purchase of his pew in 1773; and the first Bible and Church Service, the Bible bearing an Edinburgh imprint of 1767. The long-handled purses used in Washington's time for the offerings are perhaps the most curious of all the Alexandria relics of old days and old ways.



BLUE ROOM OF THE CARLYLE HOUSE.

Carlyle House

Second only to Christ Church in interest of historical associations is the Carlyle House, on the corner of Fairfax and Cameron streets. Built by John Carlyle in the year 1752, at a period when Alexandria was the metropolis of the British Empire in America, the house had full share with the town in events which were portentous of revolution. It was the time of the French and Indian Wars, and Gen. Braddock had come to America to assume command of the British forces. Here had repaired, to confer with him, the Governors of six of the colonies—Shirley of Massachusetts, DeLancey of New York, Morris of Pennsylvania, Sharpe of Maryland, Dinwiddie of Virginia and Dobbs of North Carolina. By invitation of Mr. Carlyle they met in the blue room of the mansion. The chief purpose was to devise means for raising revenue for the support of service in North America; and it was resolved that the Governors having found it impracticable to obtain in their respective governments the proportion expected by His Majesty, "they are unanimously of the opinion that it should be proposed to His Majesty's ministers to find out some method compelling them to do it." When the Alexandrians heard of this resolution of the congress they met in the court house opposite the Carlyle House, and, with George Washington in the chair, resolved: "That taxation and representation are in their nature inseparable." The action of the six Governors was received in like spirit by the Colonies; and thus the Congress of Alexandria, as the meeting in Mr. Carlyle's blue room was known, contributed largely to the growing discontent which



CARLYLE HOUSE—EAST FRONT.

twenty years later found expression in the Revolution. To the Carlyle House came George Washington, summoned from Mount Vernon by Braddock, who offered him a commission as Major in the British Army; and it was in the Carlyle House that, contrary to Washington's advice, Braddock's disastrous expedition to Fort Duquesne was resolved upon. From his early manhood until his death Washington was a frequent and welcome guest in the house. "Lodg'd at Col. Carlyle's" is an entry often repeated in his diary. **Carlyle House**

There has recently been formed the "Society for the Restoration of

Historic Alexandria," and the first effort of the society is to restore the Carlyle House, to tear down the buildings which shut it in, and to assure its care and keeping for the future. The house was solidly built and is to-day in good preservation. There are still some of the original chairs, hall seats and other pieces of furniture, with a grandfather's clock which for more than a century ticked the time in the Carlyle mansion. The building is open from 10 to 5 daily, except Sunday, and will well repay a visit. To pay expenses an admittance fee of ten cents is charged.

Carlyle House

Another Alexandria landmark is the Marshall House, on King street, where the Ellsworth tragedy occurred at the outbreak of the Civil War. In the spring of 1861 Alexandria was held by Confederates, and the Confederate flags were visible from Washington, one flag in particular, over the Marshall House, a tavern kept by James Jackson, was the subject of remark by President Lincoln. Among the Federal troops who took the town on the night of May 23 were the New York Fire Zouaves, under command of Col. E. E. Ellsworth. At dawn, the Marshall House flag, still flying from its staff, Ellsworth entered the house, went to the roof and tore down the obnoxious colors. As Ellsworth was coming down stairs, Jackson emerged from one of the rooms armed with a double-barreled shotgun, raised his gun and discharged it at the Colonel, who was killed instantly. Jackson then turned his gun on others of the Zouaves, but was killed by them before he could pull the trigger.

Marshall House

Ellsworth

Down the Historic Potomac.

From their wharf at the foot of 7th street the steamers of the Norfolk and Washington Line leave daily for Fortress Monroe and Norfolk. The sail on the historic Potomac River, Chesapeake Bay and Hampton Roads, with a charming view from the river of Washington and Norfolk, as they are approached by daylight, makes this one of the most delightful and interesting trips on our continent. The steamer passes in full view of many places rich in historic associations, such as Alexandria, Fort Foote, Fort Washington, Mount Vernon (the home and resting-place of Washington), Indian Head (now used by the Government as the proving ground for heavy ordnance), Evansport, Acquia Creek, Mathias Point (on the Virginia shore, where heavy batteries were erected by the Confederate army), Wakefield (the birthplace of Washington), and Point Lookout (on the Maryland shore, used during the war as a prison for Confederates). At Point Lookout the steamer enters Chesapeake Bay, one of the most beautiful bodies of water in the world. After an enjoyable sail of four hours Fortress Monroe is reached, and Old Point.

The steamer then proceeds through Hampton Roads, made memorable by the great naval conflict between the Monitor and the Merrimac. Sewall's Point and Craney Island, where heavy batteries were erected by the Confederate army, are soon sighted; and then Norfolk and Portsmouth, with the Government Navy Yard. At Norfolk connection is made with Old Dominion Line for New York.

CABIN JOHN BRIDGE—THE LARGEST STONE ARCH IN EXISTENCE.
See index "Cabin John."

169

The Land of the Sky.

For Health and Pleasure.

"The Land of the Sky" is that portion of Western North Carolina lying between the Blue Ridge Mountains and the Iron, Smoky and Unaka ranges of Eastern Tennessee. It is a superb elevated plateau, the lowest point of which is more than 2,000 feet above the level of the sea. It is protected in winter from chilling winds by the surrounding mountains. Geographically, it is situated in the most favored portion of the temperate zone. Topographically, it is mountainous, and is largely covered with forests in which the long leaf or turpentine pine predominates. It is traversed by splendid rivers, and dotted with beautiful lakes. Its scenery is unrivaled, even by the more famous localities of the far West, and its accessibility is such that it can be reached either from the North, the East, the South, or the Middle West in a few hours, whereas the scenic glories of the West requires several days in which to reach them.

To reach this favored section the traveler from the East should take one of the through trains of the Southern Railway, through Washington, Lynchburg, and Salisbury, N. C. Close connection is made at Salisbury with the main line trains to and from the East, and elegant Pullman drawing room sleeping cars afford superb service, so that passengers from New York can take the through Pullman sleeping car at that point in the evening, and the following day at noon reach Asheville or Hot Springs in perfect comfort and without change of cars.

From Florida and the South the through trains of the Southern Railway take the traveler through Columbia and Spartanburg, affording elegant Pullman car service.

From the North and West the most direct route is through Cincinnati, or through Chattanooga and Knoxville.

So it matters not from what direction you may be coming, passengers will find the Southern Railway prepared to afford the very best schedule and through car service.

"The Land of the Sky" is about equal to Switzerland in area, and greatly resembles it in its majestic natural beauty and sublimity. The greater profusion of vegetation here, however, gives a softness of effect to its marvelous landscapes that mark the principal difference between this country and that of the European Alps.

The charm of this land is real and apparent; its delights are an actuality. Perhaps the most notable and complete surrender to the fascination of its physical charms is its choice by George Vanderbilt, Esq., as a site for his estate "Biltmore," within two miles of the city of Asheville, and nearly the exact center of this scenic wonderland. Mr. Vanderbilt's residence—which is said to have cost more than $3,000,000—occupies the most commanding

site in this splendid domain, and is considered the masterpiece of its designer, the late Richard M. Hunt, America's most famous architect.

Asheville, that Mecca of health-seekers, the spot best known among the resorts of this splendid region, stands higher above the sea level (2,288 feet) than any other city in America east of the Rockies. The visitor will

THE LAND OF THE SKY IS FILLED WITH SCENIC SURPRISES.

find Asheville a progressive, modern city. Its streets are well paved and lighted, and trolley lines run to all the suburbs. The city has an opera house, clubs, an art gallery, a public library, a handsome new auditorium, and hotels which enjoy widespread and well deserved repute for their excellence. The largest hotels, the Battery Park and the Kenilworth Inn, are each beautifully located, the former in a handsome private park in the very center of the city. Kenilworth Inn is located about two miles from the city proper, at Biltmore, where is also situated Mr. George W. Vanderbilt's magnificent residential property, the finest estate in America.

The Albemarle Manor, built after the fashion of a quaint English inn, is also a very excellent hotel, as is also the Victoria Inn. There are quite a number of hotels of less importance which afford excellent accommodations at moderate prices.

Stretching from Asheville on the northwest for thirty-four miles is the lovely French Broad River, along which the Southern Railway winds. The foaming stream here darts out and in between rocky cliffs now gleaming in a broad patch of sunlight, now leaping along in the shadow of great boulders, ever fascinating in its wild and unrestrained beauty—a water sprite on a madcap chase.

High among these mountains, in a beautiful valley, are the Hot Springs of North Carolina, which yearly offer relief to hundreds in search of health and strength. But the crowning glory of the place is its hot waters, which are thrown up from the earth in a number of springs, the temperature of which ranges from 96 to 110 degrees.

The curative properties of the water of these springs is shown in the marked remedial effect in diseases of the liver and kidneys, in rheumatism, gout and sciatica. Persons suffering from dyspepsia, insomnia, or nervous troubles also find great relief.

The Mountain Park Hotel, superbly located here in a private park, is unexcelled, either in its appointments or its management, by any hotel in the South.

Another highly favored region is on the branch of the Southern Railway leading from Asheville to Spartanburg, S. C., including Tryon, Saluda, Hendersonville, Flat Rock, and the beautiful Sapphire country.

The Sapphire country is a region full of delightful surprises to the tourist, sportsman and health-seeker. No other section contains more clear, cold and wonderfully picturesque streams, so many grand waterfalls, such wide-sweeping mountain views, such beautiful lakes and verdure-clad valleys.

Lakes Fairfield, Sapphire, and Toxaway, in the heart of the North Carolina mountains, are duplicates of the most beautiful gems of the Adirondacks. Nowhere else in the South, at this altitude, are there such waters of wonderful beauty and greatly varied characters. There are towering cliffs rising abruptly for a thousand feet from their shores, and cascades of rare clearness falling directly into the lakes from the lofty tableland surrounding. Indeed, it is the general verdict of widely traveled people that, in respect to the remarkable combination and varied and attractive character of lake and mountain scenery, this section is unrivaled by any in the world. Excellently kept hotels are open the year around, affording ample accommodations to the tourists.

To those who have been spending a time under the bright and languid skies of Florida, and who do not wish to risk the sudden transition from summer to winter, which threatens all who return North, until spring has fairly set in, the beautiful mountain region of western North Carolina holds out alluring attractions, because of its superb and unsurpassed natural scenery, and its excellent climate, free from extremes of heat and cold.

A GREAT COUNTRY;

TRAVERSED BY THE SOUTHERN RAILWAY

Nearly 8,000 Miles of Railway, through Principal Southern States.

SEVEN TRAINS Daily between Washington, and principal Cities and Resorts South.

Three Trains between the East, Florida, and Southern Winter Resorts.

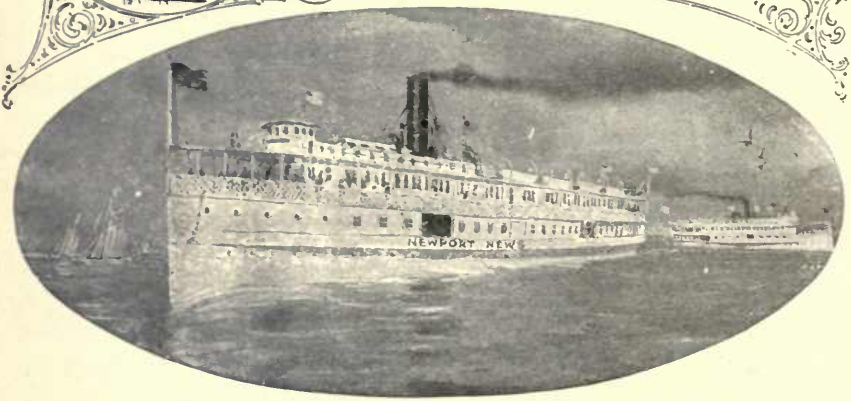
The Historic Potomac

Norfolk and Washington Steamboat Co.,



NEW AND POPULAR ROUTE BETWEEN

Washington, D. C., Old Point Comfort, Norfolk, Virginia Beach and the South.

The new and magnificent Steel Palace Steamers of this line, the steamers "Newport News," "Norfolk" and "Washington," most luxuriously fitted throughout, having Steam Heat in staterooms, Electric Lights and Call Bells in each room, leave Norfolk and Washington daily on the following schedule:

NORTHBOUND.		SOUTHBOUND.	
Leave	PORTSMOUTH.....5.00 P. M.	Leave	WASHINGTON.....6.30 P. M.
"	NORFOLK.....6.00 "	"	ALEXANDRIA.....7.00 "
"	FORTRESS MONROE...7.00 "	Arrive	FORTRESS MONROE....7.00 A. M.
Arrive	ALEXANDRIA.....6.30 A. M.	"	NORFOLK.....8.00 "
"	WASHINGTON.....7.00 "	"	PORTSMOUTH.....8.15 "

Close connection made with all rail lines at Norfolk, Fortress Monroe and Washington, D. C., for all points North, South, East and West.

Passengers going or returning to Wilmington, Raleigh, Charlotte, Charleston, Savannah, Atlanta, Jacksonville and principal Southern cities, are given an opportunity by this route to stop over at the National Capital, Fortress Monroe or Virginia Beach.

By taking this route the passenger is afforded a pleasant ride on the Potomac River and Chesapeake Bay, thus breaking the monotony of an all-rail ride.

The excellence of the meals furnished on these magnificent steamers has been a great factor in their popularity. The dining-room service is a la carte, meals being served at hours convenient to the passengers.

Ask for tickets via the new Norfolk and Washington line of steamers.

California

THE land of sunshine and flowers is most pleasantly reached via the ***Santa Fe.*** The journey is through the Southwest "Land of Enchantment" over the old Santa Fe Trail.

You see petrified forests, Pueblo Indians, picturesque old Mexican towns, the ***Grand Canyon of Arizona.***

In California are giant red woods, Spanish missions, lovely Yosemite Valley—fruit, flowers, fishing, hunting, mountain-climbing, golf, bathing—attractions innumerable.

Why go to Europe when our own country affords such a wealth of sights and scenes as this?

We heartily recommend California as an all-year-round resort. We just as heartily recommend the Santa Fe as the way to go.

Here are a few reasons for preferring this route:

First: One train, track and management from Chicago to Los Angeles and Frisco.

Second: Track rock-ballasted and laid with heavy steel rails. It is constantly patrolled.

Third: Only line to Grand Canyon of Arizona.

Fourth: Harvey dining-car and dining-room service—best in the world.

Fifth: The California Limited is a solid Pullman train and runs daily throughout the winter season. ***Less than three days*** on this train, Chicago to California.

For further information and illustrated descriptive literature, send 10 cents postage to

HAWAII
SAMOA
TAHITI
NEW ZEALAND
AUSTRALIA

OCEANIC STEAMSHIP Co.

AMERICAN AND AUSTRALIAN LINE

Travelers should experience the delights of the wonderful tropic Islands of Hawaii, Samoa, Tahiti and New Zealand. A trip to these lands can be easily accomplished by the fine steamers of the

OCEANIC STEAMSHIP COMPANY

Sailing from San Francisco Every Ten Days

Interesting tour from San Francisco to New Zealand and return, going via Hawaii and Samoa, and returning via Tahiti, or vice versa, for the moderate sum of $300.

SAN FRANCISCO TO HAWAII AND RETURN, $135.
TO TAHITI AND RETURN, $150.

HAWAII, or "The Island Paradise" has perpetual spring, with birds and sunshine all the year, and an active volcano, the largest in the world, so easy of access that the ladies can go to the very edge of the liquid lava lakes.

SAMOA, "The land where it is always afternoon."—And the people are like their country, hospitable, sunny, generous (taking no thought for the morrow, because they have few causes for care), kindly and affectionate, winning their place in the heart of every visitor to their beloved Samoa.

TAHITI, Island of Love.—"Isle d'Amat" the old buccaneers called these sun-kissed shores, and to those who have been there the name rings singularly true—Tahiti of the South Seas—The Island of Love!

NEW ZEALAND, "The Switzerland of the Southern Hemisphere."—Valleys that rival Yosemite, tremendous gorges, thousands of feet deep, great shafts of polished rock a mile and a quarter high, and magnificent waterfalls taking their mad plunge one thousand nine hundred feet above you! Or picture to yourself broad rivers of ice, two miles across, slowly creeping down the mountain sides, through beautiful evergreen forests, toward the sea. All these and more are the famous West Coast Sounds of New Zealand and the country immediately around them. The fiords of Norway, the Glaciers of Iceland, Yosemite's sheer-cut rock-faces and high waterfalls all seem combined here to delight the eye and excite our wonder and admiration.

AUSTRALIA.—With the dawn of the new century has been born a new nation—United Australia! Under the Southern Cross, seven thousand miles from our shores, the great commonwealths of Australia have joined in one mighty national existence! A new flag floats beside our own!

"Ask Mr. Foster"

GOVERNMENT ROAD, SANTIAGO, WITH BAMBOOS.

THE CUBA RAILROAD.

THIS new line, completing the railroad connection between Havana and Santiago, is of standard gauge and similar in its construction and equipment to the better class of northern lines. All of its important bridges are of steel and masonry and the line generally is rock-ballasted. The main line passes along the centre of the eastern and wider half of Cuba and opens up a matchless and most picturesque agricultural region and passes through the tropical forests of mahogany, cedar, lignum vitæ, ebony and many other trees, hung with vines and millions of orchids. Palm trees of magnificent aspect and great variety abound everywhere. The famed Parana and Guinea grasses, covering most of the open districts and standing from six to twelve feet high and green the year round, together with frequent running streams, make this an ideal cattle country. No food has to be put up and no shelter is required. The rich soils everywhere are adapted to sugar, tobacco, cotton, corn and an endless variety of products. The swamps which occur at places along the coasts of Cuba are absent from the interior, which is high, dry, and exceptionally healthy. The trade winds blow across Cuba every day, and bring to all parts fresh sea air; the extreme heat of northern summers is consequently unknown, and the humidity of other tropical countries is also unknown.

THE TRUNK LINE RAILWAY OF CUBA.

ABOUT TRAVEL

THOSE intending to travel will find it to their interest to communicate with Raymond & Whitcomb Co., whose patrons include the better class of the American traveling public.

This firm maintains, at large expense, a bureau for supplying the traveling public with information about resorts, their hotels and attractions, the best routes for reaching them, the cost of railway and steamship tickets to all parts of the world, and other needful information. Detailed itineraries of contemplated trips will be prepared on request; these will give the train service, the names of hotels, places where the time can be spent to the best advantage, etc.; in brief, such information as is needed by every traveler.

Special vestibuled trains to Mexico, California and the Pacific Coast, equipped with dining, library, observation and sleeping cars with private rooms, are provided exclusively by this firm, and are intended for the convenience and comfort of the most fastidious. The time schedules are arranged to include the interesting scenery by daylight.

Tours to Florida, Mexico, Cuba, Porto Rico, Europe, Japan, Around the World, etc. Railroad and Steamship Tickets. Private Cars, Foreign Money, Letters of Credit, Travelers' Cheques.

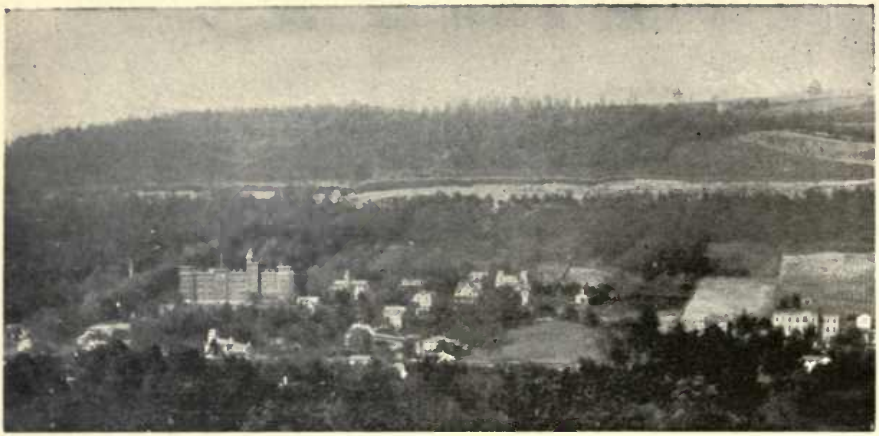
The Jackson Health Resort

DANSVILLE, NEW YORK



Has been known for twenty years as The Jackson Sanatorium. The word sanatorium, which is applicable to all institutions where therapeutic measures are employed for any form of illness, was used for the first time in the United States by Dr. Jackson to designate a health institution when he built, in 1883, the first fire-proof structure erected in this country for that purpose.

The general adoption at the present time of the name Sanatorium by proprietors of institutions for the insane or mentally unbalanced, and for cases of drug habit, has led to the error of confounding The Jackson Sanatorium with such establishments. Some persons who are not familiar with the character of this Health Institution have had an impression, because of its name—Sanatorium—that people afflicted with mental disorders were received and treated by its physicians.

As the Jackson Sanatorium is not a place where insane people are received or where cases of drug habit are made a specialty, its name has been changed in order to correct such misapprehension on the part of the public.

This renowned institution, holding to the distinctive character and methods which for forty-five years have made its work so successful and its manner of life so helpful and attractive to health and rest seekers, will be known hereafter as The Jackson Health Resort.

Staff of **Regularly Educated** and Experienced Physicians, elegant **Fire-proof** building—brick and iron; **all Modern Conveniences.**

Special attention to the scientific administration of Water, Electricity, Massage, Swedish Movement, Rest Cure and Dietaries to meet the needs of chronic invalids.

ASK MR. FOSTER

I OFFER MY SERVICES to aid you in planning your travel and outings. I know a great deal about summer and winter resorts and about the pleasantest and most convenient means of reaching them. At my office are hundreds of descriptive booklets of different hotels, small and large, also railroad and steamship schedules, maps, guide books, plans of hotels and all sorts of travelers' literature that will be helpful to you.

I will tell you which trains to take to make best connections, how to avoid night travel if desired, what is of interest along the way, which routes afford the greatest scenic advantages, how to combine most advantageously travel by water and rail.

I can tell you the cost of railroad and steamship tickets and the rates charged at the different hotels. I will engage your hotel accommodations in advance if you wish it, and will give you letters of introduction that will help to smooth your way.

I am well acquainted also with the hotels of Philadelphia, New York, Boston, Chicago and the other large cities, and can aid you in selecting the one best suited to your needs.

You are cordially invited to visit my office and to make free use of the services rendered here. **There are no charges of any sort. No fees are ever accepted. Therefore:**

The National Remembrance Shop

1333 Pennsylvania Avenue,

One-half block below Willard's Hotel,

WASHINGTON, D. C.

EVERYONE visiting Washington desires to take away something as a remembrance of the visit to the nation's Capital, or as a gift for the friends at home. It is the aim of the National Remembrance Shop to supply such things that shall have also some artistic merit. Here are sold wares of gold, silver, wood, china, leather. Pictures. Books of Views and all sorts of things suitable as souvenirs or gifts. The prices are reasonable; the goods are well made and serviceable, and withal pleasing to the eye, even the most inexpensive articles (and there are many such) being of a character to appeal to persons of cultivated taste.

The Remembrance Shop is unique in its furnishings and general character, and on its tables are shown many odd things not to be found elsewhere. You are cordially invited to inspect the articles shown here. All visitors are equally welcome, whether purchasers or not. No one is ever urged to buy.

A few things shown at the National Remembrance Shop

Sterling silver and enameled souvenir spoons, forks and other articles in large variety and exclusive designs.

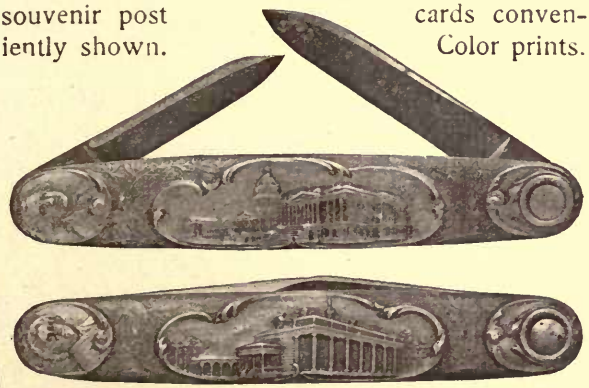
Remembrance china and earthenware in pitchers, cups and saucers, mugs, plates, beakers, etc., made for us by Minton, Wedgewood, Ridgway, Adams and other famous manufacturers, and in our own exclusive patterns, entirely different from the ordinary "view china." Very moderately priced.

Baskets made in New England homes by women who love their work.

Choice articles in wood and leather, done by artists who rarely duplicate.

Platinum and color photographs. Thousands of souvenir post cards conveniently shown. Color prints.

The Washington Remembrance Fruit Knife. Saw edge for oranges.



The Self-opening Washington Remembrance Pocket Knife. Sterling Silver. Press the button—it opens.

The Washington Remembrance Fruit Knife. Celluloid antique (indestructible) handle.

THE NATIONAL REMEMBRANCE SHOP
1333 Pennsylvania Avenue,
WASHINGTON, D. C.

Near Fourteenth St., directly across the avenue from the Mt. Vernon Railway Station, and one-half block below Willard's Hotel.

THE MURAL PAINTINGS OF THE LIBRARY OF CONGRESS IN THE COLORS OF THE ORIGINALS

There are ***thirty-eight*** plates, reproducing the Library paintings with absolute fidelity, clearness and delicacy, in the original colors, by the most perfect art process of the day. The paintings include:

Lyric Poetry	Library from Capitol	Grand Stairway
Poets' Boys	Mosaic Mantels	Mosaic Minerva
Melpomene and Calliope	Greek Heroes	The Seasons
Religion and Labor	Arts and Sciences	Hall of Columns

The 24 pages of descriptive text give the poems of the Poetry Series, the Greek Hero Myths and the Library Quotations. The volume is an example of artistic book making. It is the most comprehensive and enduringly valuable publication devoted to the Library decorations. The page is 12x9½ inches; the prints average 9x5 inches. Price, $3.00; postage, 23 cents.

Thirty-two of the plates of the volume just described are collected in the ***Portfolio Edition*** with a short descriptive list of the pictures. The prints are mounted on heavy paper of harmonious shade, and bound into a portfolio in such a way that without injury to the book any print may be taken out for framing. Price, $2.00 (or $2.15 postpaid).

The ***Book of the Paintings, Library of Congress,*** contains 89 engravings in black and white, comprising all the important paintings of the Library and many architectural views. It is the largest and most comprehensive collection of the Library paintings and decorations. Price in paper cover, 75 cents; postpaid, 85 cents. Cloth, $1.00; postpaid, $1.18.

The ***Practical Guide to the Library of Congress*** describes all the paintings and the architecture. It is the best aid to seeing the Library intelligently. Ninety-two illustrations. Price, 10 cents.

All the Foster & Reynolds Books on the Library of Congress are sold also at the Sales Stand in the Library Building, at The National Remembrance Shop, and at Book and Souvenir Stores throughout the City.

FOSTER & REYNOLDS,

1333 Pennsylvania Ave., - Washington, D. C.

Your Summers— Spend Them *in the Heart of the Canadian Rockies*

The Hotel System of the **Canadian Pacific Railway Company** includes in the Rockies of Canada eight of the best appointed and most comfortable hotels on the continent. Private bath rooms and all modern conveniences.

BANFF, Alba.—In the Canadian National Park, at Banff, Alba., is situated the Banff Springs Hotel, which is owned and operated by the Canadian Pacific Railway Company. The hotel contains 250 rooms, is lighted by electricity and heated by steam throughout. The house was recently enlarged and improved; the company has spared no expense in furnishing, and the hotel is provided with all modern conveniences. In connection with the Hotel is a large plunge bath fed from the famous Banff Hot Spring. Amusements—Fishing, Boating, Hunting, Mountain Climbing, Driving, Riding, etc. Livery service operated by the Management of the Hotel. Cuisine and service unexcelled. Open from May 1 until October. Rates from $3.50 per day upward.

LAGGAN, Alba.—Two and a half miles from Laggan Station the Company has built a beautiful Chalet near Lake Louise. The hotel is charmingly situated in the valley lying between Mounts St. Piran, Fairview, Beehive, Victoria, Lefroy, Aberdeen and Whyte, and is excellently placed as a center from which to make excursions to the many beautiful valleys and lakes in the vicinity. The far-famed "Lakes in the Clouds" are but 30 minutes' walk from the hotel. There is accommodation for 125 guests, and the house is thoroughly up-to-date in its appointments; is lighted by electricity and heated by steam. Swiss Mountain Guides are retained for use by Mountain Climbers. The livery service is operated in connection with the hotel. Open from June 1 until October. Rates from $3 per day upward.

FIELD, B. C.—In the shadow of Mount Stephen the Canadian Pacific Railway Company built that modern hostelry, "The Mount Stephen House." This house has accommodation for 175 guests, is lighted by electricity, heated by steam, and is thoroughly up-to-date. Open Winter and Summer. From Field parties start for the Yoho Valley, the Ice River and Kiwetinok Valleys, Lake O'Hara, Emerald Lake, and many other points that offer attractions to the tourist. Swiss Guides are retained by the Canadian Pacific Railway, and every facility afforded those who desire to climb mountains. An excellent livery service is operated between Field and Emerald Lake. Saddle and pack ponies are always to be had for excursions into the surrounding districts. Tennis and Croquet lawns and Golf Links in connection with the hotel. Rates, $3 per day and upward.

EMERALD LAKE, B. C.—A Swiss Chalet, with accommodation for 40 guests, has been built at Emerald Lake, which is situated seven miles north of Field, and is reached by carriage from Field. Parties are outfitted from this point for trips to the Yoho Valley. Good fishing and boating. Open June 1 until October. Rates, $3 per day and upward.

GLACIER, B. C—About a mile from the base of the Illecillewaet or Great Glacier of the Selkirks is situated a well appointed and comfortable hotel called "Glacier House." At Glacier House there is accommodation for 200 guests. The hotel is heated by steam and lighted by electricity, and it contains all the conveniences of a modern city hotel. Cuisine and service first-class. Pony livery in connection. Swiss guides for mountain climbing. Open Winter and Summer. Rates, $3 per day and upward.

REVELSTOKE, B. C.—At Revelstoke is a well furnished and comfortable hotel of 75 rooms. Electric lighted and steam heated. Operated by Mr. H. A. Perley. From Revelstoke connection is made with the branch line which joins the Arrow Lake Steamers with the main line. Good Fishing and Hunting in the vicinity of Revelstoke. Hotel is open Winter and Summer. Rates $3 per day.

SICAMOUS JCT.—Hotel Sicamous, on Shuswap Lake, is a small hotel of 35 rooms, and is operated by Mr. F. W. Padmore. The house is well furnished and up-to-date. Open Winter and Summer. Excellent Fishing and Boating. Branch to Okanagan connects with main line at Sicamous. Rates, $3 per day.

NORTH BEND, B. C.—The Canadian Pacific Railway Company own and operate the Fraser Canyon House at North Bend. This hotel is a small house of 30 rooms, is well furnished and provided with all modern conveniences. Open Winter and Summer. Rates, $3 per day and upward.

Special arrangements for parties making extended visits at any of the hotels.

For further information as to rates, etc., apply to manager of the hotel concerned, or to **GEORGE McL. BROWN,** Superintendent, Montreal, Can.

NEW YORK AVENUE.

Admission, 25 Cents.

THE Halls of the Ancients are constructed for illustration of the art, architecture, religion, and life of the ancient Egyptian, Assyrian, Graeco-Roman, and Saracenic peoples.

The design for the Egyptian portal is a section of the Hypostyle Hall of Karnak in exact size of the original: columns 70 ft. high and 12 ft. in diameter.

It enters the Hall of Columns, more grand in dimensions and beautiful in color, than the Säulenhof built by Lepsius at Berlin.

Therein are twelve decorated columns, larger than any existing models, in three styles: the Lotus Bud, the Palm, and Hathor capitals, with wall decorations.

The Egyptian Hall of Arts and Crafts contains the beautiful interior of an Egyptian House and Court designed by Racinet. It illustrates the Arts and Crafts of the Egyptians. A dado 72 ft. in length is a facsimile of the Book of the Dead from the British Museum. On the wall is a copy, 10 ft. by 7 ft., of Richter's Building of the Pyramids, and adjacent, one of like size of Long's Egyptian Feast. There is a model of the tomb brought by Lepsius to Berlin. A mummy is in the inner vault, and in the outer (Serdab) are illustrated offerings to the dead.

The Assyrian Throne Room is gorgeous in blue and gold according to authority of Place. A section is walled with casts from the Nimroud slabs in the British Museum, and paintings of others by Botta, Layard, and Smith. The portal is between the four colossal human-headed bulls found in the Palace of Sennacherib. The Throne of Xerxes from Persepolis is upon the exact scale of the cast in the Louvre. King Sennacherib is seated, modeled in costume from the bas-relief, the throne supported by captives.

The Roman House, with entrance from the Hall of Columns, covers 10,000 square feet. Its decorations, 15,000 square feet of surface, are in part from the beautiful House of Vettius.

The Lecture Hall, in Persian style, contains the painting of the Grandeur of Rome, 500 square feet, after the original by Buhlmann and Wagner, of Munich.

The Saracenic Halls are in counterparts of a house in Tangiers, and a hall plated with traceries from the Alhambra.

The Art Gallery is devoted to Roman History. Walls are covered by plates from Pinelli's Istoria Romana (102 in number), in historical order. Three have been painted by Pascal and Zucher 10 ft. by 7 ft., to show the powerful educational impressions when the whole shall be thus enlarged to range the Galleries as modeled, enclosing the Roman Court.

In the Taberna are superb illustrations of Greek vases, full size. Replica copies thereof will be made for schools and individuals, as models of form and beauty, at minimum cost, thus demonstrating the usefulness of the proposed National Galleries of History and Art, and following the British Museum and the Louvre, in distribution of models of art to the world at lowest possible prices.

The HALL OF THE MODELS, 52 ft. by 40 ft., is named from the models on 1-64 scale of the PROPOSED NATIONAL GALLERIES, the promotion of which for our country is the sole purpose of the construction of the Halls; to demonstrate the realism with which all art, architecture, mythology, etc., of past nationalities may be revived for instruction. Designed by Franklin Webster Smith.

Mount Vernon Souvenir Spoons.

IN TEA OR COFFEE SIZES.

THERE are a number of spoons with views of Mt. Vernon offered for sale throughout the country. This is the official Mt. Vernon spoon unanimously approved by the Mt. Vernon Ladies' Association and the only spoon which has ever received their official endorsement. It is our own patent, controlled by us solely and alone, and has no connection with any other Mt. Vernon spoon. Moreover, it can only be bought on Mt. Vernon grounds. So, before purchasing elsewhere, examine ours when you visit Mt. Vernon, or send for our descriptive circular with cut of spoon, etc. We send by mail all over the U. S.

Articles made of wood from our Mt. Vernon grounds cannot be purchased anywhere else on earth except on grounds. Do not confound these with articles made of wood from up north and ornamented with a picture of Mt. Vernon, and sold in Washington and elsewhere.

Surely a souvenir of Mt. Vernon is only interesting as coming from Mt. Vernon.

Is the finest summer and winter hotel on the Great Lakes for families, tourists and transient guests. Has nearly 1000 feet of broad veranda, like the above. Built of stone and pressed brick. 450 large rooms. All outside. No courts. Furnished throughout in mahogany. 220 private bath rooms. Just 10 minutes by Illinois Central Express from the shopping and theater district of the city. Cool in summer, away from the city's dust, noise and smoke. Golf, tennis, boating, bathing and fishing. Send for handsome, new, illustrated booklet. Manager, **Geo. W. Reynolds,** late manager Hotel Del Monte, California.

THE MANOR, ALBEMARLE PARK, ASHEVILLE, NORTH CAROLINA

AN EXCLUSIVE INN.

THE MANOR, open the year round, is neither a hotel nor a boarding house; it differs from both. It is unique in itself. It provides a perfectly comfortable place to live, attractive in its surroundings, complete but modest in its appointments, and carrying that air of refinement essential to the comfort of cultivated people. The Manor has come to be known as the most home-like public house in the South, and is particularly adapted for persons making a prolonged stay in the mountains. Cottages in connection are rented by room, or suite, or entire cottage. The table is good. Electric lights, steam heat and open wood fireplaces. Golf, tennis and other amusements. For further information, address

ALBEMARLE PARK COMPANY, Asheville, N. C.

TOXAWAY INN

The Beautiful Sapphire Country

in the Blue Ridge Mountains of Western North Carolina, with its clear streams, crystal lakes, and sweeping mountain views, has unique and unexcelled attractions for the tourist, sportsman and health-seeker. Provision has been made for visitors in the Toxaway Co.'s admirable system of hotels. All are new and perfectly equipped for the comfort and pleasure of guests. For booklet and terms, address

MONON ROUTE

REST RECUPERATION RECREATION

Of the Spring Waters found at these Springs, Dr. Samuel Gross, of Philadelphia, wrote as follows:

"I have had opportunity to try various medicines and the various mineral waters of this country and Europe, and I am free to confess that, as an eliminator of diseased conditions of the digestive organs, and as a healing agent to the mucous membrane lining the alimentary tract, the waters of these springs are certainly superior to any curative agents I have ever examined."

Beneficial to Stomach, Liver, Kidney and Bowels

Hotel Rates range from $8 to $35 per week, including free use of waters. Accommodations from the plain boarding house up to the finest apartments, and service to be obtained in the best metropolitan hotels.

Booklet telling all about the waters and giving list of the hotels and boarding houses with their rates sent free.

DAILY CIRCULATION OVER 32,000

Some of the reasons why

THE WASHINGTON POST

is acknowledged to be the leading newspaper in its territory, and one of the best advertising mediums in the country

---

It is the leading newspaper published at the National Capital.

It is the only morning newspaper in the city of Washington.

It goes into 90 per cent. of the white homes in Washington.

It has an unrivaled house-to-house delivery.

It carries more foreign advertising than any paper in the city of Washington.

It carries more resort advertising than any other paper in Washington.

It has a "Resort Information Bureau" for the benefit of resort advertisers in the distribution of booklets.

It has an "Educational Information Bureau" for the distribution of school catalogues.

These are some of the reasons why it brings results to advertisers of legitimate articles.

Also why The Post is used by the majority of advertisers who advertise in but one paper in Washington.

SUNDAY CIRCULATION OVER 46,000
